UMGC IN MARYLAND AND AROUND THE WORLD

At University of Maryland Global Campus (UMGC), a high-quality education is always within reach. UMGC is dedicated to offering on-site and online courses and resources to adult students in Maryland and around the world. Under contract to the U.S. Department of Defense, UMGC is one of the largest providers of education to the U.S. military worldwide and serves more than 50,000 active-duty military servicemembers, reservists, veterans, and their families. With more than 140 worldwide classroom and service locations in more than 20 countries and territories and more than 90 undergraduate and graduate degree, certificate, and specialization curricula offered entirely online, UMGC makes it possible to earn a widely respected degree from just about anywhere.

UMGC's commitment to students around the globe extends far beyond providing access to excellent degree programs. An online academic and administrative services portal, MyUMGC, makes it simple for you to register for courses, pay tuition, apply for graduation, and update your personal information when it's convenient for you. You can also access academic and career advising, financial aid counseling, library services, and much more online via the university's website or by phone or e-mail. All over the world, UMGC gives you what you need to succeed.
Welcome to University of Maryland Global Campus! We are delighted that you have chosen us to help you achieve your education and career goals.

You may already be aware that in 2019 we officially changed our name from UMUC to University of Maryland Global Campus. Our new website—umgc.edu—launched last year; e-mail addresses are expected to change in the spring, but current e-mails will continue to function for a while after the transition.

With the start of 2020 we are making another big change, with you—the learner—at the center. We have restructured the former Undergraduate School and Graduate School into three discipline-aligned schools: the School of Arts and Sciences, the School of Business, and the School of Cybersecurity and Information Technology. This change is designed to enhance academic quality and better provide you with the clearest, most efficient, and most career-relevant degree pathways and student services.

The information in the 2019–2020 catalog is still relevant and valid. This update includes corrections to course number typos in environmental management, new information about using veterans benefits to pay for your education, and a revised list of personnel in the Administration section. The rest of the content remains as originally published in July 2019.

Our goal is to give you access to the best education possible, everywhere, anytime. Congratulations on taking this first step. We are excited to support you throughout your academic journey.

Sincerely,

Peter Smith, EdD
Interim Senior Vice President and Chief Academic Officer
Orkand Chair and Professor of Innovative Practices in Higher Education

POLICY STATEMENT

This publication and its provisions do not constitute and should not be regarded as a contract between UMGC and any party or parties, nor is it a complete statement of all policies, procedures, rules, regulations, academic requirements, or tuition and fees applicable to UMGC, its students, or its programs. UMGC reserves the right to make changes to the policies, procedures, rules, regulations, and academic requirements set out in this publication without prior notice. Such changes will be reflected on the university’s website or other appropriate publication.

This catalog provides the degree requirements and recommended curriculum for students who begin continuous enrollment on or after August 1, 2019. (Details are listed on p. 148.) When a curriculum or graduation requirement is changed, it is not made retroactive unless the change is to the student’s advantage and can be accommodated within the span of years normally required for graduation. See additional policies on pp. 168–170.

Sources for any claims made throughout this catalog may be found on the UMGC website (umgc.edu).

Welcome to UMGC

MADE FOR YOU

From its founding in 1947, University of Maryland Global Campus (UMGC) was designed to meet the educational needs of adult students like you—students who must balance study with the demands of work and family life.

Since then, the university has grown to be the largest public university in the nation, serving students throughout the state, the country, and the world. And although its name has changed more than once over the decades—from the College of Special and Continuation Studies to University College, from UMUC to UMGC, the university's focus on providing open access to high-quality educational programs and services—eliminating the barriers that can keep you from achieving your educational goals—remains unchanged.

CARRYING OUT THE MISSION

Students First

At UMGC, your success as a student is of paramount importance. The university seeks not only to help you fulfill your current education goals but also to create an educational partnership that will last throughout your life.

To that end, the university looks first for ways to ensure that you can easily access programs and services. Admission policies are designed to simplify the process (standardized tests are not generally required), making it possible for you to apply and register for most programs at the same time.

As a global university, UMGC makes it possible for you to take classes any time, any place, by offering a large selection of online programs—in addition to classes at sites throughout Maryland and the Washington, D.C., metropolitan area and at military sites all over the world. You can also access student services online and by phone, as well as on-site at many locations.

Convenience and flexibility are not the only concerns, however. UMGC seeks to create a learning environment that is respectful of diverse backgrounds, inclusive, responsive, and relevant.

Recognizing that financial concerns often present the biggest obstacle to higher education, UMGC also strives to keep tuition costs low and provides numerous financial aid opportunities, including scholarships for military and community college students.

Excellence

A regionally accredited university, UMGC is dedicated to providing the highest quality programs and services and ensuring excellence in its online and on-site classes.

In providing these programs, UMGC relies on a renowned faculty of scholar-practitioners—teachers who bring real-world experience as well as advanced academic credentials to your courses—and the use of the latest technologies. UMGC also is able to provide you with a wealth of resources because of its place within the University System of Maryland.

The success of UMGC’s efforts over the years is evident. UMGC has garnered awards from such notable organizations as the World Affairs Council, E-C Council, University Professional and Continuing Education Association, Online Learning Consortium (formerly the Sloan Consortium), and Maryland Distance Learning Association.

Innovation

UMGC has always looked for new and better ways to serve students. Long before the online revolution, the university was delivering courses to students at distant locations, using any and all available technologies—from interactive television to voice mail. Today, you can access both courses and services online, using the university’s learning management system and MyUMGC, its online gateway to services and information. Through its Center for Innovation in Learning and Student Success, UMGC leads the search for next-generation learning models and best practices for online learning.

FACILITIES AND PROGRAMS

UMGC offers degree programs from the associate level to the doctorate. Most undergraduate and graduate programs are available online. These academic programs are administered by The Undergraduate School and The Graduate School.

The university’s administrative headquarters are located in Adelphi, Maryland, and also serve as home to a prestigious art collection and a conference facility, the College Park Marriott Hotel & Conference Center at UMGC. Both The Undergraduate School and The Graduate School, as well as all related academic support units, are housed at the Academic Center at Largo.

FOR ASSISTANCE

Contact us by e-mail at gradinfo@umuc.edu or by phone at 800-888-8682.
MISSION STATEMENT

UMGC’s Graduate School prepares you for effective leadership and citizenship in a global environment characterized by workforce diversity, increasing competition, and technological innovation. Programs are designed to extend educational access through multiple formats.

The Graduate School strives for excellence in the quality of programs offered and innovative delivery formats. The curriculum provides discipline-specific knowledge with emphasis on leadership, communication, technology, globalization, diversity, systems thinking, critical thinking, information literacy, research competency, and ethical practices. The Graduate School challenges you to continually demonstrate effective leadership as you apply what you study to your professions and your daily lives.

ACADEMIC PROGRAMS

UMGC’s graduate degrees are designed to provide a career-focused curriculum. Over the years, many of these programs have won awards for excellence. Recently, UMGC’s graduate program in data analytics received the University and Professional Continuing Education Association (UPCEA) Mid-Atlantic Region Outstanding Program and Partnership Award in 2016. UMGC teams won both first and third place in the 2018 Watson Analytics Global Competition, and the university’s cybersecurity competition team placed first and second at MAGIC’s Capture the Flag cybersecurity competition.

A list of UMGC’s graduate programs, organized by career field, is provided on the following pages.

Virtually all programs are available online. Coursework for some programs is available on-site at Maryland/national capital area locations in a hybrid format that combines on-site attendance with online study. For more information, e-mail grad.advisor@umuc.edu or call 800-888-8682.

CONTINUOUS INNOVATION

As a leader in distance education, UMGC continuously strives to ensure that its academic programs, course delivery formats, and student services meet the highest standards for excellence. Ongoing efforts focus on improving the student experience online and ensuring that programs meet the needs of today’s workforce. These changes may involve the introduction of new or revised programs later in the academic year. Visit umgc.edu/grad for the latest program information, especially if you intend to enroll in 2019–2020. Also check umgc.edu for possible addenda to this catalog.

EDUCATIONAL RELATIONSHIPS

The Graduate School has established educational relationships for some of its existing programs with a number of academic and government institutions, some of which are listed below.

The Undergraduate School
Articulation agreements and vertical pathways between The Graduate School and UMGC’s Undergraduate School allow students who completed their undergraduate degree at UMGC with majors in accounting, computer networks and cybersecurity, computer science, criminal justice, English, history, and social science, as well as those who have completed coursework in emergency management and homeland security, to reduce their total coursework for certain related graduate degrees. Details on each of these agreements are provided under the individual program descriptions.

Military Relationships
UMGC has established special relationships with a number of professional military education institutions: Air War College, Air University, Defense Acquisition University, Defense Information School, Naval War College, National Defense University Information Resources Management College (iCollege), and Marine Corps College of Distance Education and Training. In most of these educational relationships, you may complete coursework at the military institution as part of the Master of Science in Management or the Master of Science in Information Technology. More information on these educational relationships is available online at umgc.edu/military-and-veterans or by e-mail at MilitarySupportServices@umuc.edu.
Preparation for Graduate Study

More is expected at the graduate level than what is normally required at the undergraduate level. In addition, you usually must complete special requirements at the end of your graduate program. UMGC’s master’s degree programs require you to complete an integrative end-of-program capstone course in which you must demonstrate mastery of content covered throughout the program. At the doctoral level, UMGC requires you to complete a dissertation.

As long as you are continuously enrolled, you should refer to the catalog of the year in which you began graduate study for the specific requirements related to your program of study. Continuous enrollment is defined on p. 148.

In all programs, you must maintain a term and cumulative grade point average (GPA) of 3.0 to remain in good academic standing; in some, you must also earn a grade of B or higher in each class to progress to the next class. Academic progress is assessed at the end of each term. Other requirements—such as time limits for degree completion and minimum GPA—also apply; details are provided on pp. 147–148.

While UMGC’s course formats offer you considerable flexibility, graduate study requires a significant time commitment. Most courses involve group projects. Each week, you should expect to devote at least three hours of outside study for every credit in which you are enrolled. For example, for a 3-credit course, you would need to devote at least nine hours per week to outside study.

### NONPROGRAM COURSES

Because UMGC graduate students often enter graduate study with academic backgrounds in very different fields and may return to study after a gap of many years, UMGC offers a number of courses outside the usual required program courses that are designed to help you succeed in your graduate studies. Complete course descriptions are provided on pp. 98–137.

#### Required Introductory Course

**UCSP 615 Orientation to Graduate Studies** at UMGC is designed to help you develop the skills and techniques you need to understand and manage the challenges involved in successfully completing a graduate program at UMGC and to familiarize you with research strategies and online library resources—material that is critical for 21st-century professionals.

This noncredit course is required for all new master’s degree students, except those in programs that require CBR, DCL, or PRO 600. At the successful conclusion of the course, a grade of S (Satisfactory) or U (Unsatisfactory) is posted; the mark of I (Incomplete) is not an option. UCSP 615 must be completed within the first 6 credits of graduate study. It is recommended that you take this as your first course before beginning program coursework.

#### Optional Noncredit Courses

Noncredit courses (currently designated UCSP or ASC) are available in computer programming, financial accounting, information technology, writing, and research methods and generally last five to eight weeks. Although these courses carry no UMGC credit, they appear on your official academic transcript. At the successful conclusion of the course, a grade of S (Satisfactory) or U (Unsatisfactory) is posted; the mark of I (Incomplete) is not an option. You must be admitted or have an application on file before registering for any noncredit courses.

Current information about fees for noncredit courses is available at umgc.edu/tuition.

### COURSE FORMATS

UMGC offers courses online and in a hybrid format that combines on-site and online instruction.

Hybrid classes typically meet on-site at a UMGC location for four to six sessions per term; the remainder of the teaching and learning in the course occurs in the online classroom. The schedule of on-site sessions is provided at the beginning of the term. Hybrid classes are identified in the most current graduate schedule of classes.

Online courses maintain the same academic standards as on-site courses. Course content, learning materials, requirements, assignments, and class participation are comparable for online and hybrid courses; for example, you need to adhere to a course schedule for assignment deadlines.

#### Computer and Internet Access

UMGC is committed to ensuring that you acquire the level of technological fluency needed for active participation in contemporary society and have access to up-to-date resources.

As a UMGC student, you must be prepared to participate in asynchronous, computer-based class discussions; study groups; online database searches; course evaluations; and other online activities—whether you are taking a course online or in a hybrid format.
You must, therefore, ensure that you have some type of internet access. Bar- ring individual course requirements, this access may be through use of a UMGC computer lab; university or public library; or other readily available, reliable source if you do not have home access. However, such access should be regularly available, and you must have a current e-mail address.

Some academic programs may have specific technical requirements.*

Taking Online Classes
Before registering for an online course, you may want to consider the following:

■ You need to be prepared to write extensively, because nearly all communication is written. You need strong reading and writing skills in English.

■ You need to be competent in the use of computers and commonly used software programs.

■ Because the online classroom is asynchronous and you are expected to be an active participant, you are encouraged to log in frequently to check what has transpired in your online classroom (instead of classroom meetings).

■ You need disciplined work habits, effective time management skills, and the ability to work both alone and collaboratively.

Technical Requirements
You must meet certain minimum technical requirements to take graduate online courses; these requirements are subject to change. Review the current information about technical requirements at umgc.edu/techreq. You are responsible for your own internet access costs.

Some academic programs may have additional technical requirements, such as requiring you to download and install computer programs. To determine whether such requirements apply to your program, you should consult the program chair (listed under Contact Information).

Course Evaluations
UMGC uses feedback from you and your fellow students to make decisions about future courses. Individual responses are kept confidential. For online and hybrid classes, the notice appears in the online classroom when three-quarters of the class has been completed.

The following pages provide descriptions of the degree and certificate programs available through the UMGC Graduate School, including all course requirements and any academic or professional preparation required or recommended beyond general graduate admission requirements.

These descriptions also provide possible career fields toward which graduates of these programs may aim. Besides conferring an often necessary credential upon completion, our degree programs can help provide you with the skills for making a good start toward attaining a career in these fields.

Most degree and certificate programs follow a very specific curriculum with little or no choice. However, in some cases you may substitute a single 6-credit course that covers the same content as two required 3-credit courses or vice versa. These options are listed in the course requirements.

* Certain project management courses require the use of a computer with a Microsoft Windows operating system.
## Program Overview

### DOCTORAL PROGRAMS

- Doctor of Business Administration ★
- Doctor of Management in Community College Policy and Administration ★

### ACCOUNTING AND FINANCE PROGRAMS

- Master of Science in Accounting and Financial Management
- Master of Science in Accounting and Information Systems

Project Management

◆ Offered jointly with University of Maryland, Baltimore.
Stand out with a Doctor of Business Administration, a degree that defines accomplishment.

Designed for executive-level working professionals, the Doctor of Business Administration (DBA) program emphasizes management theory and strategic thinking, organizational leadership and change, research and innovation, and sustainability in the global business environment. Through applied research and analysis of real-world management issues, you’ll gain sophisticated knowledge for the executive level of management.

The cohort structure promotes close, interactive partnerships among students, faculty, and staff and a supportive network for lifelong learning. You’ll also benefit from exposure to national and global perspectives and experiences with geographically diverse classmates and faculty.

What You’ll Learn

Through your coursework, you will learn how to

- Conduct and evaluate management research for decision making
- Investigate the overall business intelligence environment in an organization
- Develop ethical solutions to complex organizational problems
- Initiate and lead successful change

Career Preparation

This program is designed to help prepare you for management and leadership roles in for-profit, nonprofit, governmental, and nongovernmental organizations; internal and external consulting; and higher education administration.

Your Coursework

The DBA program will help you gain the research and management competencies necessary to acquire, appraise, analyze, apply, and assess information for complex evidence-based decision making.

Coursework Examples

- Perform qualitative management research and effectively communicate findings to practitioners
- Assess management environments and develop problem-concept models
- Design and implement evidence-based solutions aligned with organizational needs
- Assess an enterprise’s analytic capabilities to develop recommendations for a stronger business intelligence climate
- Present innovative ideas at professional conferences and submit for publication

Program Overview

The DBA program requires the completion of 48 credits of coursework, including 36 credits in academic content coursework and 12 credits of dissertation coursework. Attendance at a two-day residency on-site in Maryland each term is mandatory. DBA 600 (described on p. 108) is prerequisite to the program; this course is held entirely online with no on-site residency requirement.

Admission Requirements

To apply to the DBA program, you must have a master’s degree in an appropriate field of study. You cannot enroll in the prerequisite course DBA 600 until your application has been reviewed and accepted by the department.

Application Procedures

To apply, you must submit

- A completed doctoral program admission application with the $100 application fee
- An official transcript indicating completion of a master’s degree or higher from a regionally accredited university or college (Equivalent degrees from other accredited institutions may be considered on a case-by-case basis. If you were educated abroad, see umgc.edu/internationalstudent for additional requirements.)
DOCTORAL PROGRAMS

- An up-to-date résumé indicating professional leadership and management experience
- Two letters of reference (professional or academic)
- A personal statement that outlines your interest in doctoral study and future goals
- Two reviews of scholarly, peer-reviewed, academic research-based articles that pertain to your area of interest in management research (Guidelines for article reviews are outlined at umgc.edu/doctorate.)

Preparation Recommended for Success

Expectations
You are expected to have supervisory management experience and a management or business background.

Recommendations
UMGC's doctoral program is writing-intensive. To improve your writing skills, you should take the noncredit course ASC 601.

Degree Requirements

Doctor of Business of Administration

PREREQUISITE COURSE
DBA 600 Foundations of Doctoral Studies (3)

REQUIRED CORE COURSES
DBA 800 Interpreting and Translating Management Theory in Practice (6)
DBA 810 Research as a Tool for Management Decision Making (6)
DBA 820 Evidence-Based Research Methods (6)
DBA 830 Data Analytics in Practice (6)
DBA 840 Designing Evidence-Based Management Solutions (6)
DBA 850 Producing Original Management Ideas That Influence: Publishing and Conferencing (6)
DBA 860 Producing Actionable Knowledge: Dissertation Problem Statement and Literature Review (4)
DBA 870 Producing Actionable Knowledge: Dissertation Methodology and Analysis (4)
DBA 880 Producing Actionable Knowledge: Management Implications from Dissertation Research (4)

COURSE SEQUENCING
Courses must be taken in the order listed.

Criteria for Program Progression
You must complete each course with a grade of B or better to advance to the next course. (The grade of C is not available for these courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Become a scholar-practitioner by pursuing a Doctor of Management (DM) in Community College Policy and Administration in a hybrid program that fits your life and can transform your potential to lead change in higher education.

Designed for college faculty and administrators who aspire to lead effectively and advance in administrative careers, the unique concentration in community college policy and administration offers exceptional scholarship, intimate cohorts, online courses, short residencies, distinguished faculty, and dissertation support in a program that can be completed within three years. Plus, you’ll gain knowledge you can apply right away to your current professional environment.

You’ll work together in the same group of 15–20 students throughout the entire program and build a virtual community, while benefiting from leadership assessments and executive coaching, developed and led by current and former community college presidents and senior executives.

With a highly respected credential, sophisticated knowledge, and an accomplished dissertation, you’ll emerge from the program with the tools to transform student achievement and successfully guide community colleges into the essential role they will play in the future of higher education.

**What You’ll Learn**

Through your coursework, you will learn how to

- Lead change in a rapidly changing sector of higher education
- Advocate for the needs of community colleges and students at local, state, and federal levels
- Apply indicators of institutional effectiveness to all sectors of community college operations

**Career Preparation**

This program is designed to help community college faculty and administrators and other professionals who are interested in leading and advancing careers in the upper administration of community colleges.

**Your Coursework**

The community college policy and administration curriculum was developed in conjunction with community college presidents and senior executives to help you pursue the highest level of leadership and management knowledge. Your courses and residencies will focus on building your leadership competencies, policy expertise, and the skills you need to support dissertation research.

**Coursework Examples**

In past projects, students have had the opportunity to

- Undergo guided dissertation development, exploring various research methods for the dissertation
- Explore topics in leadership and management theory, higher education policy, and community college advancement
- Interview current community college administrators to expand their understanding of key issues and management practice
- Perform a guided analysis of the budgets and alternative revenue sourcing of their own community college
- Prepare advocacy materials and engage in an advocacy visit to congressional offices in Washington, D.C.

**Program Overview**

The DM program with a concentration in community college policy and administration requires the completion of 48 credits of coursework, including a practitioner dissertation. A comprehensive leadership development program, which includes a battery of individual assessments and career coaching, is an integral part of the program. Attendance at a two-day residency on-site in Maryland each term is mandatory.
DOCTORAL PROGRAMS

Admission Requirements
To enroll in the DM program in community college policy and administration, you must have a master’s degree in an appropriate field of study and some familiarity with the American community college. The DM in Community College Policy and Administration is not available to Maryland residents.

Application Procedures
To apply, you must submit
- A completed doctoral program admission application and payment of the $100 application fee
- An official transcript indicating completion of a master’s degree or higher from a regionally accredited university or college (Equivalent degrees from other accredited institutions may be considered on a case-by-case basis. If you were educated abroad, see umgc.edu/internationalstudent for additional requirements.)
- An up-to-date résumé indicating professional management experience in a community college environment or its equivalent
- Two letters of reference (professional or academic)
- A personal statement that outlines your interest in doctoral study (guidelines for the personal statement are available at umgc.edu/applydmccpa)

Preparation Recommended for Success
Expectations
Applicants are expected to have management experience in a community college.

Recommendations
UMGC’s doctoral program is writing-intensive. To improve your writing skills, you should take the noncredit course UCSP 605.

Degree Requirements
DM in Community College Policy and Administration

REQUIRED CORE COURSES
DMCC 810 Leadership and Change (6)
DMCC 800 Foundations of Management Theory (6)
DMCC 830 Research Methods (6)
DMCC 890 Dissertation Part I (4)
DMCC 821 Higher Education Policy (6)
DMCC 891 Dissertation Part II (4)

DMCC 892 Dissertation Part III (4)
MASTER OF SCIENCE IN ACCOUNTING AND FINANCIAL MANAGEMENT

Prepare to rise to an executive level of responsibility and earning power by pursuing a master’s degree in accounting and financial management.

The graduate program in accounting and financial management can help you move toward organizational leadership positions. This program, ideal for midcareer professionals, can give you the skills to make high-level decisions that can impact your organization's current operations and financial future.

What You’ll Learn

Through your coursework, you will learn how to

- Manage your organization's current financial operations (cash, inventory, accounts receivable, payables, short-term loans, etc.)
- Make long-term financial decisions (evaluating and selecting capital investments, financing capital requirements, taking a company public, navigating mergers and acquisitions, and assessing bankruptcy/liquidation)
- Manage costs and mitigate risks
- Evaluate investments using industry software
- Perform financial analysis and modeling
- Make strategic management decisions and solve operational problems
- Analyze financial reporting and its effect on financial markets
- Incorporate international environments and opportunities into your planning
- Handle ethical problems that arise in your field
- Assess the state of corporate governance and internal controls in your organization
- Use case studies of real organizations facing financial challenges to analyze their situations and propose a course of action
- Examine the sources of the 2008 global financial crisis and analyze how organizations acted to moderate its effects or recover
- Play the role of a new chief financial officer tasked with performing a comprehensive analysis of a new S&P 500 company
- Present a paper to a chief executive officer

Career Preparation

This program is designed to help you prepare for an organizational leadership position in accounting and/or financial management. See umgc.edu/professional-licensure for information about professional licensure in this field.

Your Coursework

Courses in the accounting and financial management curriculum feature projects for real companies, studies of real crises, and analysis of real-time data sets. Additionally, a board of industry leaders and employers advises our faculty to make sure our graduate accounting and financial management programs are covering emerging areas and those relevant to your career growth.

Coursework Examples

In past projects, students have had the opportunity to

- Examine the sources of the 2008 global financial crisis and analyze how companies acted to recover or moderate its effects
- Play the role of a new CFO tasked with performing a comprehensive analysis of a hypothetical S&P 500 company and document findings in a paper for review by the company’s CEO
- Conduct tax research to prepare IRS Form 1040 (individual tax return) and IRS Form 1120 (corporate tax return)
- Communicate tax research findings with clients
- Prepare comparative financial analyses of Fortune 100 companies and orally present findings to a group of investors

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Industry Certification
This program is designed to help prepare you for the following certification exams, listed in alphabetical order:

**ACCOUNTING CERTIFICATION**
- Certified Fraud Examiner (CFE)
- Certified Government Auditing Professional (CGAP)
- Certified Internal Auditor (CIA)
- Certified Public Accountant (CPA)*
- Chartered Global Management Accountant (CGMA)
- Enrolled Agent (EA)

**FINANCIAL MANAGEMENT CERTIFICATION**
- Certified Economic Policy Analyst (CEPA)
- Certified Financial Examiner (CFE)
- Certified Financial Services Auditor (CFSA)
- Certified Government Financial Manager (CGFM)
- Certified Healthcare Financial Professional (CHFP)
- Certified in Financial Forensics (CFF)
- Certified Risk Professional (CRP)
- Certified Treasury Professional (CTP)
- Certified Valuation Analyst (CVA)
- Chartered Asset Manager (CAM)
- Chartered Economist (ChE)
- Chartered Financial Analyst (CFA)
- Chartered Market Analyst (CMA)
- Chartered Portfolio Manager (CPM)
- Chartered Trust and Estate Planner (CTEP)
- Chartered Wealth Manager (CWM)
- Financial Risk Manager (FRM)
- Master Analyst in Financial Forensics (MAFF)
- Master Financial Manager (MFM)
- Master Financial Professional (MFP)
- Registered Business Analyst (RBA)

**OTHER CERTIFICATION**
- Accredited Automated Clearing House Professional (AAP)

---

**Academic Preparation**
You must have completed 15 credits of undergraduate accounting coursework, with a grade of C or better in each course, before enrolling in any graduate accounting course. Upon submission of an official transcript, you may be accepted into the degree program with fewer than the required 15 credits of undergraduate accounting coursework, but you must complete that coursework before enrolling in your first graduate accounting course.

**Preparation Recommended for Success**

**Expectations**
You are expected to have some familiarity with Microsoft Excel.

**Recommendations**
If you have not recently graduated with an undergraduate degree in accounting, finance, or financial management, we highly recommend that you take the noncredit course UCSP 620 before ACCT 610 and MGMT 640. Taking UCSP 605 is recommended to help improve writing skills.

**Degree Requirements**

**MS in Accounting and Financial Management**

**INITIAL REQUIREMENT**
(to be taken within the first 6 credits of study)
- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**ACCOUNTING COURSES**
- ACCT 610 Financial Accounting (3)
- ACCT 613 Federal Income Taxation (3)
- ACCT 628 Auditing (3)

*Requirements for CPA certification vary from state to state. See p. 171 or umgc.edu/professional-licensure for more information.*
Take two of the following for a total of 6 credits:
ACCT 625 Government and Not-for-Profit Accounting (3)
ACCT 630 Fraud Examination (3)
ACCT 635 Accounting Ethics (3)
ACCT 640 International Accounting (3)

REQUIRED FINANCIAL MANAGEMENT COURSES
MGMT 640 Financial Decision Making for Managers (3)
FIN 610 Financial Management in Organizations (3)
FIN 620 Long-Term Financial Management (3)
FIN 630 Investment Valuation (3)
FIN 645 Behavioral Finance (3)
FIN 660 Strategic Financial Management (3)

REQUIRED CAPSTONE COURSE
MSAF 670 Accounting and Financial Management
Capstone (3)

COURSE SEQUENCING
- ACCT 610 is prerequisite to all graduate accounting courses.
- You are advised to take ACCT 628 before ACCT 630.
- MGMT 640 is prerequisite to FIN 610.
- FIN 610 is prerequisite to all other FIN courses.
- FIN 620 and FIN 630 are prerequisite to FIN 660.
- FIN 630 is prerequisite to FIN 645.
- FIN 645 is the only course that can be taken simultaneously with MSAF 670.

Educational Relationship
An articulation agreement between The Graduate School and UMGC’s Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in accounting to reduce their total coursework for a related graduate degree by up to 6 credits (two courses).

The Graduate School will accept up to two of the following toward the completion of the MS in Accounting and Financial Management, Accounting and Information Systems, or Management with a specialization in accounting for a maximum of 6 credits:
- ACCT 438 Fraud and Forensic Accounting and ACCT 440 Forensic and Investigative Accounting instead of ACCT 630 Fraud Examination
- ACCT 422 Auditing Theory and Practice and ACCT 436 Internal Auditing instead of ACCT 628 Auditing

The substitutions listed above are the only ones possible. Note that a minimum grade of B must be earned in each undergraduate course for the credits to be accepted at the graduate level. Eligible credits must have been completed no earlier than two years before the beginning of graduate studies. Admission requirements and time limits for degree completion apply to all applicants.
Combine cutting-edge skill sets in accounting and information systems by earning a master’s degree that blends content in state-of-the-art cyber accounting, accounting data analytics, and information assurance.

Secure your future with the stability and flexibility of an accounting career and seize the vast growth opportunities in information systems security, cyber accounting risk management, and information technology auditing. Suited to students at any career stage, this program can help you transition into accounting positions with its heavy emphasis on accounting information systems, mitigating cyber accounting risks, and cyber forensics in accounting.

What You’ll Learn

Through your coursework, you will learn how to

■ Design and build an accounting information system
■ Manage the financial aspects of an accounting information system
■ Apply the principles of information systems management and integration to private-sector organizations served by accounting professionals
■ Apply administrative and technical security controls to prevent, detect, respond to, and recover from cyber attacks on accounting data
■ Apply cyber accounting risk management techniques using the AICPA Cybersecurity Risk Management Reporting Framework
■ Integrate tools, techniques, and technologies used in cyber forensic investigations, data analytics, and litigation involving accounting information
■ Conduct a fraud investigation using tools and techniques typically recommended by the Association of Certified Fraud Examiners
■ Perform financial analysis and modeling
■ Audit financial statements and information systems using practitioner software, such as IDEA, Tableau, and ACL
■ Create and analyze corporate financial statements using data analytics
■ Apply information assurance techniques such as testing, validation, verification, and certification within given information security evaluation contexts

Career Preparation

This program is designed to help you prepare for an organizational leadership position in accounting with specialized competencies in information systems, cyber accounting, information assurance, and cyber accounting risk management. See umgc.edu/professional-licensure for information about professional licensure in this field.

Your Coursework

The accounting and information systems curriculum can help you develop practical skills in high-demand fields to make you an indispensable member of cyber accounting and information assurance teams. The curriculum makes extensive use of case studies involving real business issues, so what you learn is immediately applicable in your career.

Coursework Examples

In past projects, students have had the opportunity to

■ Compare accounting systems for effectiveness and efficiency
■ Design a cyber accounting information system that meets needs within a budget
■ Assess the effectiveness of AIS to detect fraud using ACL, IDEA, and Tableau
■ Integrate tools and techniques using ACL, IDEA, and Tableau
■ Develop cyber accounting initiatives
■ Apply cyber accounting risk management in an accounting environment
■ Conduct an information risk assessment report
■ Use a formalized risk assessment methodology via the case-study method
■ Perform data analytics using Tableau, Power BI, or other industry-standard software for data analytics
Industry Certification
This program is designed to help prepare you for the following certification exams, listed in alphabetical order:

**ACCOUNTING CERTIFICATION**
- Certified Fraud Examiner (CFE)
- Certified in Financial Forensics (CFF)
- Certified Information Technology Professional (CITP)
- Certified Public Accountant (CPA)*

**INFORMATION SYSTEMS CERTIFICATION**
- Certification in Control Self-Assessment (CCSA)
- Certified Information Systems Auditor (CISA)
- Certified Information Security Manager (CISM)
- Certified in Risk and Information Systems Control (CRISC)

**REQUIRED INTEGRATED ACCOUNTING AND INFORMATION SYSTEMS SECURITY COURSES**
- ACCT 618 Accounting Information Systems (3)
- ACCT 620 Cyber Accounting: Management and Compliance (3)
- ACCT 645 Cyber Forensics in Accounting (3)
- ACCT 660 Information Technology Auditing (3)

**REQUIRED CAPSTONE COURSE**
- ACCT 670 Capstone in Cyber Accounting: Risk Management (3)

**ALTERNATE COURSES**
If you have already earned 3 undergraduate credits in accounting ethics, you may replace ACCT 635 with INFA 660: The Law, Regulation, and Ethics of Information Assurance (3).

**COURSE SEQUENCING**
- ACCT 610 is prerequisite to all graduate accounting courses.
- ACCT 618 is prerequisite to ACCT 620.
- ACCT 628 should be completed before ACCT 630.
- ACCT 618, ACCT 628, and ACCT 630 are prerequisite to ACCT 645.

* Requirements for CPA certification vary from state to state. See p. 171 or [umgc.edu/professional-licensure](umgc.edu/professional-licensure) for more information. Course descriptions are found on pp. 97–137. Before enrolling, check [umgc.edu/catalogs](umgc.edu/catalogs) for possible updates to program offerings.
ACCT 618, ACCT 628, ACCT 630, and INFA 610 are prerequisite to ACCT 660.

You must complete all program coursework except ACCT 635 or INFA 660 before enrolling in ACCT 670.

Educational Relationship
An articulation agreement between The Graduate School and UMGC’s Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in accounting to reduce their total coursework for a related graduate degree by up to 6 credits (two courses). Details are on p. 16.
SPECIALIZATIONS IN
Accounting
Financial Management

Compete for today’s—and tomorrow’s—jobs with a career-focused master’s degree in management.

The master's degree program in management allows you to combine a broad management education with specific knowledge for your field or industry. We design our graduate management degree program with input from today's top employers to provide you with decision-making skills, real-world experience, and a firm foundation for career advancement.

Degree Requirements
Specific course requirements are detailed under each specialization.

Prepare to rise to the executive level of responsibility and earning power by developing advanced skills in the career-focused master’s degree program in management with a specialization in accounting.

The graduate accounting specialization can help you move toward a position as a comptroller, managing partner, or senior accountant or into another career with maximum flexibility. Ideal for midcareer professionals, the accounting specialization teaches you the skills to communicate financial information with high-level decision makers, as well as the advanced accounting knowledge that every business needs.

What You’ll Learn
Through your coursework, you will learn how to

- Assist in developing strategic plans
- Assist in the decision-making process required of top managers
- Communicate effectively with top-level executives and diverse populations
- Design and build an accounting information system
- Guide management in making effective decisions regarding financial planning
- Prepare and analyze financial statements
- Prepare individual and corporate federal income tax returns
- Serve in leadership roles
- Serve on an internal audit team

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Career Preparation
This program is designed to help you prepare for an organizational leadership position in accounting. See umgc.edu/professional-licensure for information about professional licensure in this field.

Your Coursework
The accounting curriculum features case studies of real accounting issues, so you’ll build accounting and management skills you can apply immediately in the workplace.

Coursework Examples
In past projects, students have had the opportunity to
- Prepare and present financial budgets for organizational leaders
- Prepare an activity-based costing analysis for comparison to traditional costing methods
- Use SEC 10K reports to research and compare accounting disclosures for multiple organizations in the same and diverse industries
- Use the case-study method to research circumstances and consequences of corporate accounting misrepresentations to detect fraud
- Learn to use XBRL, an open-data standard for financial reporting required for many SEC filings
- Conduct tax research of Fortune 500 companies using the U.S. Internal Revenue Code, IRS tax regulations, issuances, rulings, and case law

Industry Certification
This program is designed to help prepare you for the following certification exams, listed in alphabetical order:
- Accredited Tax Preparer (ATP)
- Certified Internal Auditor (CIA)
- Certified Management Accountant (CMA)
- Certified Public Accountant (CPA)*
- Chartered Global Management Accountant (CGMA)
- Enrolled Agent (EA)

Academic Preparation
You must have completed 15 credits of undergraduate accounting coursework, with a grade of C or better in each course, before enrolling in any graduate accounting course. Upon submission of an official transcript, you may be accepted into the degree program with fewer than the required 15 credits of undergraduate accounting coursework, but you must complete that coursework before enrolling in your first graduate accounting course.

Preparation Recommended for Success

Expectations
You are expected to have some familiarity with Microsoft Excel.

Recommendations
If you lack a recent background in finance or accounting, you should take the noncredit course UCSP 620 before ACCT 610 and MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements

**MS in Management: Accounting Specialization**

**INITIAL REQUIREMENT**
*(to be taken within the first 6 credits of study)*
- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED CORE COURSES**
- MGMT 630 Organizational Theory and Behavior (6)
- MGMT 640 Financial Decision Making for Managers (3)
- MGMT 650 Statistics for Managerial Decision Making (3)

**SPECIALIZATION COURSES**
Complete the following five courses:
- ACCT 610 Financial Accounting (3)
- ACCT 611 Management Accounting (3)
- ACCT 613 Federal Income Taxation (3)
- ACCT 618 Accounting Information Systems (3)
- ACCT 628 Auditing (3)

Take two of the following for a total of 6 credits:
- ACCT 625 Government and Not-for-Profit Accounting (3)
- ACCT 630 Fraud Examination (3)
- ACCT 635 Accounting Ethics (3)
- ACCT 640 International Accounting (3)

**REQUIRED CAPSTONE COURSE**
- MGMT 670 Strategic Management Capstone (3)

* Requirements for CPA certification vary from state to state. See p. 171 or umgc.edu/professional-licensure for more information.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
ALTERNATE COURSES
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- ACCT 610 is prerequisite to all other accounting courses.
- You are strongly advised to take ACCT 628 before ACCT 630.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.

Educational Relationship
An articulation agreement between The Graduate School and UMGC’s Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in accounting to reduce their total coursework for a related graduate degree by up to 6 credits (two courses). Details are on p. 16.

Gain a strong foundation in management principles and specialized skills in financial decision making by pursuing a master’s degree in management with a specialization in financial management.

The financial management specialization provides you with solid management skills that are essential to the core functions of every organization. This program offers you the tools to make high-level decisions that can impact an organization’s current operations and financial future.

What You’ll Learn
Through your coursework, you will learn how to
- Manage your organization’s current financial operations (cash, inventory, accounts receivable policy, payables, short-term loans, etc.)
- Make long-term financial decisions, such as evaluating and selecting capital investments; financing capital requirements; taking a company public; and navigating mergers and acquisitions, as well as bankruptcy/liquidation
- Incorporate international environments and opportunities into your planning
- Manage costs and risks and evaluate investments using industry software
- Perform financial analysis and modeling
- Make strategic management decisions to solve operational problems

Career Preparation
This program is designed to help prepare you for a leadership position in financial management in areas such as financial planning, financial analysis, investments analysis, loans, and consulting.

Your Coursework
Courses in the financial management specialization feature projects for real companies, studies of real crises, and analysis of real-time data sets. You’ll study financial management methods used by government agencies, nonprofit groups, and privately held companies, as well as behavioral finance, long-term financial management and investing, international finance, and strategic financial management, among other topics. A board of industry leaders and employers advises our faculty to make sure courses stay up-to-date with industry trends.

Coursework Examples
In past projects, students have had the opportunity to
- Use Harvard University’s case studies on companies facing financial challenges to analyze their situation and propose solutions
- Examine the sources of the 2008 global financial crisis and analyze how companies acted to recover or moderate its effects

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Play the role of a new CFO tasked with performing a comprehensive analysis of a hypothetical S&P 500 company and document findings in a paper for review by the company’s CEO.

Industry Certification
This program is designed to help prepare you for the following certification exams, listed in alphabetical order:

- Accredited Valuation Analyst (AVA)
- Certified Economic Policy Analyst (CEPA)
- Certified Financial Examiner (CFEx)
- Certified Government Financial Manager (CGFM)
- Certified Healthcare Financial Professional (CHFP)
- Certified Risk Professional (CRP)
- Certified Treasury Professional (CTP)
- Certified Valuation Analyst (CVA)
- Chartered Asset Manager (CAM)
- Chartered Economist (ChE)
- Chartered Financial Analyst (CFA)
- Chartered Market Analyst (CMA)
- Chartered Portfolio Manager (CPM)
- Chartered Trust and Estate Planner (CTEP)
- Chartered Wealth Manager (CWM)
- Financial Risk Manager (FRM)
- Master Financial Manager (MFM)
- Master Financial Professional (MFP)
- Registered Business Analyst (RBA)

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Degree Requirements
MS in Management: Financial Management Specialization

Initial Requirement
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

- FIN 610 is prerequisite to all other FIN courses.
- FIN 630 is prerequisite to FIN 645.
- FIN 620 and FIN 630 are prerequisite to FIN 660.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.
BUSINESS AND MANAGEMENT PROGRAMS

MASTER OF BUSINESS ADMINISTRATION

Advance your career in an award-winning MBA program that can help you gain the skills and abilities desired by today’s employers.

The MBA program can help you learn how to strategically manage an organization for growth and success. Develop and advance your competencies in finance, marketing, human resources, strategy, and leadership. Apply your learning from multiple disciplines and specializations to real-life business problems.

What You’ll Learn

Through your coursework, you’ll learn how to

■ Create and implement a personal leadership development plan
■ Foster mutual respect, trust, and high standards of ethics, performance, and teamwork
■ Assess and manage critical knowledge and skill gaps related to core organizational functions and managerial responsibilities
■ Complete a comprehensive analysis of the costs of operations, pricing options, financing, product mix, distribution channels, and supply chain relationships
■ Evaluate your cultural intelligence, ethical values, and skills in decision making, and implement specific actions to leverage your strengths and further develop areas of relative weakness
■ Evaluate your organization’s policies for managing legal and ethical risks, with a focus on contracts, agency, and tort law
■ Design and develop a marketing plan for a new product or service in both domestic and international markets
■ Prepare a detailed project management plan for an initiative in a new international location that presents business, language, cultural, legal, and other challenges for your organization
■ Develop a comprehensive strategy for expanding your organization’s products or services in a selected country

Career Preparation

This program is designed to help you prepare for management careers in business, government, or nonprofit organizations in areas such as team leadership, project supervision, and creation and implementation of business solutions.

Your Coursework

Courses in the MBA curriculum use high-quality online learning resources and emphasize teamwork, information literacy, technology fluency, ethics, communication, problem solving, and critical thinking. Additionally, the MBA offers you the opportunity to learn from highly qualified faculty with significant managerial and leadership experience in emerging areas relevant to your career growth.

Coursework Examples

In past projects, students have had the opportunity to

■ Analyze costs of operations for an organization using managerial finance techniques
■ Determine optimal prices for goods and services by analyzing costs, revenues, and profitability
■ Evaluate the opportunities and risks involved in an organization’s decision to expand its operations to a global market by assessing issues of culture, business ethics, employment law, contracts, and criminal law in the context of a global business
■ Design and present a marketing plan for a new product or service, including a comprehensive situation analysis, a strong value proposition, an effective marketing mix strategy, and a holistic marketing communications plan

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
MBA

Required Core Courses 36

Total Credits 36

Preparation Recommended for Success

Recommendations
If you need to improve your computing skills, you should take the noncredit course ASC 605. Taking ASC 601 is recommended to improve writing and analytical skills.

Degree Requirements

MBA

REQUIRED CORE COURSES

PRO 600 Communicating, Problem Solving, and Leading in Professional Fields (6)
MBA 610 Leading Organizations and People (6)
MBA 620 Financial Decision Making (6)

Project Management

Compete for today’s—and tomorrow’s—jobs with a career-focused master’s degree in management.

The master’s degree program in management allows you to combine a broad management education with specific knowledge for your field or industry. We design our graduate management degree program with input from today’s top employers to provide you with decision-making skills, real-world experience, and a firm foundation for career advancement.

Degree Requirements

Specific course requirements are detailed under each specialization.

Prepare for advancement in contracting, acquisition, supply chain management, or procurement.

The acquisition and supply chain management specialization is designed for midcareer professionals but is also suitable for newcomers. You’ll build a foundation in the strategic and operational aspects of the end-to-end supply chain and procurement functions.

Learn best practices to use in your current role in this career-focused specialization.

What You’ll Learn

Through your coursework, you will learn how to

- Apply the legal structure for public and private acquisition processes
- Use technology effectively to establish sustainable supply chains that support product and service delivery
- Apply knowledge of efficient contract management processes throughout the acquisition life cycle
- Explain how acquisition and supply chain management will evolve through the next decade
- Interpret the Federal Acquisitions Regulation Universal Commercial Code as it relates to acquisitions and American Bar Association model procurement codes for state and local governments
- Plan, conduct, and manage negotiated procurements

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Perform cost analysis preparations and understand all categories of costs, including profit
Apply strategic purchasing and logistics methodologies
Conduct supply chain management case studies and simulations of managing material flows to optimize supply chains for efficiency

Career Preparation
This program is designed to help prepare you for work in contracting, acquisition, supply chain management, or procurement.

Your Coursework
Our curriculum is designed with input from employers, industry experts, and scholars. You’ll learn theories combined with real-world applications and practical skills you can apply on the job right away.

Coursework Examples
In past projects, students have had the opportunity to
- Serve as a supply chain manager in a simulation, analyzing critical supply chain problems by using a hands-on SCM Globe simulation tool
- Serve as a procurement manager to develop an acquisition plan and create contract solicitations based on real-world requirements
- Evaluate vendors and develop criteria for reward and performance management
- Analyze a collaborative supply chain case study for a real-world candy company
- Develop a strategic profit model for a company and determine how inventory should be handled for efficient production

Industry Certification
This program is designed to help prepare you for certifications from the following organizations:
- APICS
- Council of Supply Chain Management Professionals (CSCMP)
- Defense Acquisition University
- National Contract Management Association (NCMA)

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Master management skills and the latest best practices by pursuing a master’s degree in management with a specialization in human resource management.

The master’s degree in management with a specialization in human resource management is designed to give you the knowledge and skills you need to move up the ranks in the HR field and is aligned with the Society for Human Resource Management guidelines for graduate education. Gain practical, management-level experience in the theory, research, knowledge, and procedures used by HR executives, generalists, and specialists—and develop a skill set you can take anywhere.

What You’ll Learn

Through your coursework, you will learn how to

- Design human resources policies and processes to support changing environmental factors and organizational goals
- Evaluate employee relations in union and nonunion organizations
- Design efficient and effective recruitment and selection methods
- Evaluate strategies, procedures, and techniques of job analysis, design, and evaluation; performance appraisal; and compensation management
- Prescribe appropriate organizational development strategies and techniques
- Plan a training program
- Diagnose problems and identify solutions for managing virtual and global teams

This program is designed to help you prepare for a career in human resource management in the private or public sector.

Your Coursework
The curriculum for the specialization in human resource management can teach you practical skills to make you a strong decision maker and manager in any human resources setting. You’ll explore topics in staffing, compensation, training, change management, labor relations, and more.

Coursework Examples
In past projects, students have had the opportunity to
- Plan a job analysis and develop a new position description to address an employee's claim of unfair treatment
- Create a proposal for an onboarding program for new consultants in a company experiencing high turnover
- Evaluate an organization's labor relations status and report findings in a five-page briefing paper

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Degree Requirements

MS in Management: Human Resource Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
MGMT 630 Organizational Theory and Behavior (6)
MGMT 640 Financial Decision Making for Managers (3)
MGMT 650 Statistics for Managerial Decision Making (3)

REQUIRED SPECIALIZATION COURSES
HRMD 610 Issues and Practices in Human Resource Management (3)
HRMD 620 Employee and Labor Relations (3)
HRMD 630 Recruitment and Selection (3)
HRMD 640 Job Analysis, Assessment, and Compensation (3)
HRMD 650 Organizational Development and Change (3)
HRMD 651 Current Perspectives in Training and Development (3)
HRMD 665 Managing Virtual and Global Teams (3)

REQUIRED CAPSTONE COURSE
MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.
- Courses should be taken in the order listed.

Gain advanced skills and broad exposure to all the major areas in management for maximum career flexibility with a specialization in interdisciplinary studies in management.

The interdisciplinary studies in management specialization can provide you with the skills that are essential for managers in every organization. The curriculum covers fundamentals in human resources, project management, marketing, and information systems. Whether you are new to the field, changing careers, or looking to move up in your current organization, you need look no further for a respected credential that can boost your professional value and pave the way to management.

**What You’ll Learn**

Through your coursework, you will learn how to

- Assess employee performance at the individual, group, and organization levels
- Market an organization’s services through advertising and sales promotions
- Coach and mentor employees
- Manage culturally diverse work environments and work groups
- Motivate and incentivize employees

**Career Preparation**

This program helps you develop skills in human resources, project management, marketing, and information systems to prepare for a career managing any or all of these areas.

**Your Coursework**

The curriculum for the specialization in interdisciplinary studies in management has been crafted, reviewed, and updated by a team of advisors and industry experts to ensure that what you learn aligns with trends in today’s workplace. Courses feature topics in leadership, managing change, decision making, employee relations, business law, ethics, and more.

**Coursework Examples**

In past projects, students have had the opportunity to

- Design change management training for managers using presentation software
- Participate in a group project to develop criteria and strategies to address performance deficiencies among employees
- Participate in a series of leadership questionnaires to identify leadership style and development needs

**Preparation Recommended for Success**

**Recommendations**

If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Total Credits 36

Put yourself on the path to an executive director position by pursuing a master's degree in management with a specialization in nonprofit and association management.

The specialization in nonprofit and association management can help you learn to successfully direct an organization in the nonprofit sector. Whether you’re in an association, development organization, foundation, or political organization, you’ll learn the latest governance strategies, as well as the fundamentals of solid financial management and leadership to help your organization fulfill its mission.

What You’ll Learn
Through your coursework, you will learn how to
■ Manage finances and generate revenue for a nonprofit organization
■ Analyze legal and governance-related issues
■ Recruit and manage volunteers
■ Promote, market, and fundraise for a nonprofit organization
■ Measure outcomes and processes
■ Develop a leadership style and strategy

Career Preparation
This program is designed to help prepare you for organizational leadership in the nonprofit sector in associations, development organizations, foundations, or political organizations.

Your Coursework
Your courses in the nonprofit and association management specialization will provide you with a thorough understanding of the nonprofit sector, with courses in nonprofit management,
financial management, revenue generation and cost control, and law and governance, as well as approaches to promotion, marketing, and fund-raising.

Coursework Examples
In past projects, students have had the opportunity to
- Complete a team project using cash-flow analysis resource leveling; quantitative risk analysis; and techniques for estimating actual versus expected project duration and cost, scheduling projects based on resource availability, and expediting projects
- Proactively manage issues that adversely impact the successful scope, scheduling, control, and completion of a project

Industry Certification
This program can help prepare you for the Certified Associate Executive exam.

Preparation Recommended for Success

Expectations
You are expected to have some familiarity with Microsoft Excel.

Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Learn to successfully lead large projects by pursuing a master's degree in management with a specialization in project management.

The specialization in project management allows you to develop advanced business management skills while building expertise for project management certification.

What You’ll Learn
Through your coursework, you will learn how to

- Initiate, plan, track, and close projects
- Manage the schedule of a complex project and conflicts that arise
- Perform quantitative analyses and manage risks involved in complex projects
- Coach and mentor employees
- Manage culturally diverse work environments
- Assess performance at the individual, group, and organization levels

Career Preparation
This program is designed to help prepare you for work in project coordination, project management, and potentially program management.

Your Coursework
Your courses will include project risk management, project procurement management, and quantitative methods in project management, while core management courses will give you the tools you need to take on leadership roles in today's workplace. You will complete a comprehensive project in an industry you select to gain experience and learn relevant skills you can apply immediately in the workplace.

Coursework Examples
In past projects, students have had the opportunity to

- Complete a team project using cash-flow analysis; resource leveling; quantitative risk analysis; and techniques for estimating actual versus expected project duration and cost, scheduling projects based on resource availability, and expediting projects
- Proactively manage issues that adversely impact the successful scope, scheduling, control, and completion of a project

Industry Certification
This program is designed to help prepare you for the following certification exams:

- PMI Certified Associate in Project Management (CAPM)
- PMI Project Management Professional (PMP)

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Degree Requirements
MS in Management: Project Management Specialization

**INITIAL REQUIREMENT**
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

PMAN 639 Project Quality Management (3)  
PMAN 641 Project Procurement Management (3)  
PMAN 650 Financial and Strategic Management of Projects (3)  

**REQUIRED CAPSTONE COURSE**  
MGMT 670 Strategic Management Capstone (3)  

**ALTERNATE COURSES**  
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.  

**COURSE SEQUENCING**  
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.  
- MGMT 640 should not be attempted simultaneously with MGMT 650.  
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.  
- PMAN 634 is prerequisite to all other PMAN courses and must be taken as the first specialization course.  
- MGMT 640 (or an approved course in finance) and MGMT 650 (or an approved course in statistics) must be taken before PMAN 635.  
- PMAN 635 must be taken before PMAN 637, PMAN 639, and PMAN 650.  

**Program Recognition**  
UMGC’s master’s degree programs with project management specializations are recognized by the Global Accreditation Center (GAC) of the Project Management Institute (PMI).  

**Academic Relationship**  
Completing this program earns you the project management education hours required to sit for the Project Management Professional (PMP) Credential Examination or the Certified Associate in Project Management (CAPM) Exam. If you are already certified as a Project Management Professional by the Project Management Institute, you may receive credit for PMAN 634 Foundations of Project Management if you begin study for the master’s degree within five years of earning certification. Graduate advisors can provide more information.

Reposition your military leadership skills and gain new competencies to transition to civilian organizations.

The Master of Science (MS) in Transformational Leadership program is designed for students with military experience who want to build on and maximize their leadership training and skills to transition to corporate, nonprofit, or government organizations. Each course offers you practical experience by using workplace scenarios to apply your strategic-thinking and decision-making skills in both group and individual activities with civilian organizations. You “learn by doing” and graduate better prepared for workplace opportunities. The program provides hands-on experience with transformational leadership strategies and techniques that will enable you to effect change at the individual, group, and organizational levels and prepare you for positions in civilian organizations. You’ll utilize theories and concepts in leadership in a civilian context, focusing on the dynamics of leadership and building skills in communication, strategic planning and management, team building, conflict resolution and mediation, fiscal and performance-based decision making, change management, project management, and organizational learning.

What You’ll Learn
Through your coursework, you will learn how to

■ Analyze your strengths and weaknesses as a leader and leverage them to accomplish strategic goals
■ Manage civilian employees and help them perform at higher levels
■ Analyze the performance of an organization through metrics and formulate strategies to improve that performance
■ Manage change in the organization’s environment

Career Preparation
The program is designed to prepare you for senior leadership positions in public, private, and nonprofit organizations in various fields.

Your Coursework
The curriculum is designed to enhance the knowledge you have already gained through your military experience, by examining the organization first from the inside, then looking outward at the environment it navigates. Ultimately, you’ll work on a project with a civilian organization.

Coursework Examples
In past projects, students have had the opportunity to

■ Assess and evaluate one’s own leadership skills using a leadership instrument created by experts in the field
■ Create an individual development plan to leverage strengths and address skills that could benefit from development
■ Develop performance and productivity metrics for individual employees and project teams
■ Assess employee engagement and satisfaction and strategies for setting goals for individuals, departments, and the organization as a whole
■ Evaluate workforce readiness to meet the immediate and long-term goals of an organization.
■ Create employee development plans that outline strategies tailored to individual employees based on their employee profile and in support of the organization’s succession strategies and workforce plan
■ Analyze trends and specific data points to support decision making within an organization
■ Develop a performance predictive indicators report that provides guideposts for the organization’s strategic planning

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Admission Criteria
To be admitted to the program, you must meet the standard criteria for graduate admission and belong to one of the following military populations:

- Full-time active-duty members of the U.S. Armed Forces
- Members of the National Guard
- Reservists
- Veterans of the U.S. Armed Forces
- Commissioned Corps members of the U.S. Public Health Service
- Commissioned Corps members of the National Oceanic and Atmospheric Administration

Note: You are responsible for providing the documentation necessary to verify your military status.

If you are a civilian without military experience and are interested in developing your leadership and strategic skills, you may benefit by pursuing the MBA or MS in Management.

Preparation Recommended for Success

Expectations
You are expected to have some leadership experience as an officer (noncommissioned or commissioned).

Recommendations
Taking ASC 601 is recommended to improve writing skills.
Boost your career by gaining the skills and knowledge to address cybersecurity threats from a management perspective.

The graduate program in cybersecurity management and policy can help you gain the tools you need to join the management track in cybersecurity, so you can establish, implement, and oversee a cybersecurity structure for an organization. Learn how to create a security approach that combines technology, governance, and compliance perspectives. Gain advanced knowledge in organizational structures, communications, operational business processes, and the legal framework for cybersecurity policy.

**What You’ll Learn**

Through your coursework, you will learn how to
- Understand multinational compliance requirements for cybersecurity
- Apply risk analysis concepts and models to a variety of organizations
- Incorporate cybersecurity into numerous organizations, including healthcare and financial services organizations
- Create and establish cybersecurity frameworks in both the public and private sectors
- Develop complete cybersecurity incident response plans

**Career Preparation**

This program is designed to help you prepare to join the management team in a public- or private-sector cybersecurity organization and develop and oversee cybersecurity policy. Potential career fields include cybersecurity and policy, data protection, and information security.

**Your Coursework**

Coursework in cybersecurity management and policy features emerging topics in the field. Additionally, a board of industry leaders and employers advises our faculty to make sure our cybersecurity programs are covering emerging areas that are relevant to your career growth.

**Coursework Examples**

In past projects, students have had the opportunity to
- Develop a cybersecurity program for a government entity or private-sector organization
- Create cybersecurity policies for a government entity or private-sector organization
- Perform a cybersecurity threat analysis, including a vulnerability assessment, and develop a risk management approach for a government entity or private-sector organization
- Develop and determine cyber incident response procedures based on management best practices

**Industry Certification**

This program is designed to help prepare you for the following certification exams:
- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Disaster Recovery Institute (DRI)
- Global Information Assurance Certification (GIAC)
- Project Management Professional (PMP)

**MS IN CYBERSECURITY MANAGEMENT AND POLICY**

<table>
<thead>
<tr>
<th>Required Core Courses</th>
<th>36</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Credits</td>
<td>36</td>
</tr>
</tbody>
</table>

**Technology Requirements**

The cybersecurity management and policy program requires that you use a computer with the following:
- Microphone and speakers or headset with microphone or equivalent device(s)
- 5 GB (gigabytes) of free hard drive space
The higher the processor speed of your computer (e.g., 2.4–3.4 GHz), the larger the amount of available memory (e.g., 4–12 GB), and the larger the amount of available hard drive space (e.g., 5–20 GB), the better your computer will perform and the smoother your experience will be.

**Expectations**
You are expected to have some background in information technology. This background may be acquired through noncredit preparatory coursework, listed below.

**Recommendations**
If you do not have previous coursework or experience in programming, you should first enroll in ASC 605, ASC 609, and ASC 611 to gain the appropriate foundation. Taking ASC 601 is recommended to help improve writing skills.

### Degree Requirements

#### General Requirements

**Minimum Hours Required:** 36

**Language Requirement:** A foreign language is not required.

**Residency Requirement:** At least 12 credits in residence at UMGC.

**Varied Coursework Requirement:** No coursework may be repeated.

**Preliminary Exam:** An oral or written examination may be required before enrollment in a program.

### Educational Relationship

The vertical pathway between The Graduate School and UMGC's Undergraduate School allows students who completed their undergraduate degree at UMGC with a major in computer networks and cybersecurity to earn 6 credits toward the Master of Science in Cybersecurity Management and Policy, the Master of Science in Cybersecurity Technology, the Master of Science in Digital Forensics and Cyber Investigation, or a certificate in Cybersecurity Management and Policy or Cybersecurity Technology.

To be eligible for the pathway, you must have also completed CMIT 495 Current Trends and Projects in Computer Networks and Cybersecurity no earlier than spring 2019. If eligible, you may be awarded credit for CBR 600 Communicating, Problem Solving, and Leading in Cybersecurity. CBR 600 is the only course for which credit may be granted through the vertical pathway.

Admission requirements and time limits for degree completion apply to all applicants.
Prepare for the future by developing the next generation of advanced cyber threat prevention skills in this nationally recognized program.

Cybersecurity technology underpins the success of organizations and national critical infrastructures. Modern executives need to be able to use that technology, as well as people and policy, to minimize risks while ensuring success for their organizations. They also need to balance risks and opportunities holistically through an interdisciplinary lens. This innovative graduate program offers that wide perspective, providing a blend of people, policy, and technology skills to prepare the modern digital strategists that organizations need.

**What You’ll Learn**

Through your coursework, you will learn how to

- Tailor digital strategies to the mission of an organization
- Understand how to balance the use of people, policy, and technology
- Understand how to analyze, think critically, and improve perpetually
- Be a cybersecurity technology leader in the modern world
- Develop a cybersecurity technology strategy for an organization
- Build cybersecurity technology environments and operations
- Develop resilient and highly fault-tolerant technology environments
- Enable organizations to make better business decisions through reliable data analytics and intelligence
- Perform proactive business risk management and solve problems
- Develop strategies for mobile, cloud, and emerging environments such as the internet of things

**Career Preparation**

This program is designed to help prepare you to develop mission-focused digital strategies for organizations. Potential career fields include cybersecurity and technology architecture, information security, cybersecurity analysis and engineering, board advising, and cybersecurity consulting.

**Your Coursework**

The cybersecurity technology curriculum features emerging topics and projects that develop the skills and knowledge employers are seeking. It also provides the opportunity to interact with employers through conferences and recruitment and networking events. In your courses, you will also have access to a state-of-the-art technology lab to strengthen your practical understanding of the concepts discussed. Faculty with experience in the field guide your progress throughout your courses. Additionally, a board of industry leaders and employers advises our faculty to make sure our cybersecurity programs are covering emerging areas that are relevant to your career growth.

**Coursework Examples**

In past projects, students have had the opportunity to

- Use protocol analyzers, intrusion detection and prevention systems, network mapping tools, network scanning tools, encryption/decryption tools, digital forensics tools, and password exploitation tools
- Perform ethical hacking, penetration testing, and vulnerability assessments

**Industry Certification**

This program can help prepare you for the following exams:

- Certified Information Systems Security Professional (CISSP)
- Global Information Assurance Certification (GIAC)
- Certified Ethical Hacker (CEH)
Technology Requirements
The cybersecurity technology program requires that you use a computer with the following:
- Microphone and speakers or headset with microphone or equivalent device(s)
- 5 GB (gigabytes) of free hard drive space
- 2 GB RAM or higher
- A high-speed internet connection
- Computer processor (Intel Pentium 4 or AMD Athlon 64) running at speeds of at least 1 GHz
- Windows 7 or Mac OS X 10.6 or higher for an operating system (Linux operating systems can also be used but require more technical knowledge from the user.)

Note: The higher the processor speed of your computer (e.g., 2.4–3.4 GHz), the larger the amount of available memory (e.g., 4–12 GB), and the larger the amount of available hard drive space (e.g., 5–20 GB), the better your computer will perform and the smoother your experience will be.

Preparation Recommended for Success
Expectations
You are expected to have a strong understanding of information technology, computer networks, databases, and the internet. This background may be acquired through noncredit preparatory coursework, listed below.

Recommendations
If you do not have such IT knowledge or experience, you are strongly advised to take the noncredit course ASC 605 first. Taking ASC 601 is recommended to help improve writing skills.

Degree Requirements
MS in Cybersecurity Technology

REQUIRED CORE COURSES
- CBR 600   Communicating, Problem Solving, and Leading in Cybersecurity (6)
- CST 610   Cyberspace and Cybersecurity Foundations (6)
- CST 620   Prevention of Cyber Attack Methodologies (6)
- CST 630   Advanced Cyber Exploitation and Mitigation Methodologies (6)
- CST 640   Digital Forensics Technology and Practices (6)
- CYB 670   Capstone in Cybersecurity (6)

COURSE SEQUENCING
Courses must be taken in the order listed.

Criteria for Program Progression
You must complete each course with a grade of B or better to advance to the next course. (The grade of C is not available for these courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

COURSE SEQUENCING
Courses must be taken in the order listed.

Educational Relationship
Vertical pathways between The Graduate School and UMGC’s Undergraduate School allow students who recently completed their undergraduate degree at UMGC with a major in computer networks and cybersecurity to earn 6 credits toward a related graduate degree. Details are on p. 38.
MASTER OF SCIENCE IN DIGITAL FORENSICS AND CYBER INVESTIGATION

Develop the cutting-edge skills and knowledge you need to become a digital forensics expert.

The graduate program in digital forensics and cyber investigation is designed to prepare you to meet the growing demand for investigative, leadership, and executive skills in evaluating and managing complex cybersecurity incidents and threats. Learn how to determine whether a digital system has been attacked or compromised, and master reliable methods to identify, preserve, analyze, and present evidence for legal prosecution, administrative proceedings, and business purposes. In this program, you can develop investigative problem-solving skills, contribute to important team deliverables, analyze complex data scenarios, examine digital media for evidentiary artifacts, and write detailed digital forensic examination reports. The applied knowledge and skills you acquire can help government, business, and law enforcement organizations in detecting data breaches, mitigating cyber attacks, identifying responsible parties, and evaluating evidence of digital crime.

What You’ll Learn

Through your coursework, you will learn how to
- Design procedures at a suspected crime scene to ensure that the digital evidence obtained is not corrupted
- Conduct hands-on forensic searches to identify intrusion methods
- Employ rigorous procedures to enable forensic results that can withstand scrutiny in a court of law
- Explain the operation of digital components
- Seize, image, deconstruct, and analyze digital media for evidence
- Prepare professional reports
- Present digital forensics results in a court of law as an expert witness

Career Preparation

This program is designed to help prepare you for work in government organizations, the private sector, and law enforcement agencies in the areas of computer and digital crime.

Your Coursework

Coursework in the digital forensics and cyber investigation program can help you gain the technical competencies and knowledge needed to investigate system security breaches and recover lost or compromised data. The curriculum features hands-on learning experiences that use the same evidence and scenarios encountered in real-world investigations.

Coursework Examples

In past projects, students have had the opportunity to
- Create an investigation plan for a digital forensics incident
- Conduct a mobile incident response and investigation based on a classroom scenario
- Use appropriate tools and procedures to check for the use of anti-forensics techniques
- Conduct a Linux/Windows/Mac machine image investigation using FTK/EnCase
- Identify malicious software, network activity, suspect traffic, and intrusion artifacts through a review and analysis of artifacts
- Conduct a digital forensic investigation in a challenging environment

Industry Certification

This program is designed to help prepare you for the following certification exams:
- AccessData Certified Examiner (ACE)
- Certified Cyber Forensics Professional
- EC-Council Certified Incident Handler
- EnCase Certified Examiner (EnCE)
## MS IN DIGITAL FORENSICS AND CYBER INVESTIGATION

<table>
<thead>
<tr>
<th>Required Core Courses</th>
<th>36</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Credits</td>
<td>36</td>
</tr>
</tbody>
</table>

### Technology Requirements

The digital forensics and cyber investigation program requires that you use a computer with the following:

- Microphone and speakers or headset with microphone or equivalent device(s)
- 5 GB (gigabytes) of free hard drive space
- 2 GB RAM or higher
- A high-speed internet connection
- Computer processor (Intel Pentium 4 or AMD Athlon 64) running at speeds of at least 1 GHz
- Windows 7 or Mac OS X 10.6 or higher for an operating system (Linux operating systems can also be used but require more technical knowledge from the user.)

**Note:** The higher the processor speed of your computer (e.g., 2.4–3.4 GHz), the larger the amount of available memory (e.g., 4–12 GB), and the larger the amount of available hard drive space (e.g., 5–20 GB), the better your computer will perform and the smoother your experience will be.

### Preparation Recommended for Success

**Expectations**

You are expected to have some background in computing and programming. This background may be acquired through non-credit preparatory coursework, listed below.

**Recommendations**

If you do not have experience in computing, you are strongly advised to take the noncredit course ASC 605. If you have not taken programming courses previously, you are strongly advised to take ASC 609. Taking ASC 601 is recommended to help improve writing skills.

### Degree Requirements

**MS in Digital Forensics and Cyber Investigation**

**COURSE SEQUENCING**

Courses must be taken in the order listed.

**Criteria for Program Progression**

You must complete each course with a grade of B or better to advance to the next course. (The grade of C is not available for these courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

**Educational Relationship**

Vertical pathways between The Graduate School and UMGC’s Undergraduate School allow students who recently completed their undergraduate degree at UMGC with a major in computer networks and cybersecurity to earn 6 credits toward a related graduate degree. Details are on p. 38.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Gain a competitive advantage in the IT marketplace and develop specialized skills in high-tech management by pursuing a master’s degree in information technology.

In UMGC’s comprehensive graduate information technology program, you’ll combine technical know-how with business savvy to gain a powerful IT skill set and maximum career flexibility. Whether you are new to the field, changing careers, or looking to move up, you’ll find that the information technology program can boost your professional value.

We designed our information technology program with input from today’s top employers to help you prepare for career advancement.

**MS IN INFORMATION TECHNOLOGY: INFORMATION ASSURANCE SPECIALIZATION**

<table>
<thead>
<tr>
<th>Course Type</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required Core Courses</td>
<td>15</td>
</tr>
<tr>
<td>Required Specialization Courses</td>
<td>21</td>

</tbody>
</table>

Earn your master’s degree in information technology with a specialization in information assurance while building skills to stand out in the fast-growing fields of information assurance and cybersecurity.

The graduate specialization in information assurance will provide you with a practical understanding of the principles of data protection, cybersecurity, and computer forensics. Perfect for midcareer professionals or career changers, the information assurance specialization offers sought-after skills in network and internet security, intrusion detection and prevention, and cryptology, while also strengthening your core IT knowledge and project management abilities.

**What You’ll Learn**

Through your coursework, you will learn how to

- Secure information using knowledge of symmetric and asymmetric keys, protocols for exchanging secure data (including the Data Encryption Standard and the Advanced Encryption Standard), and other cryptographic methods and cryptanalysis tools
- Protect networks using risk analysis, defense models, security policy development, authentication and authorization controls, firewalls, packet filtering, virtual private networks (VPNs), and wireless network security
- Respond to attacks with damage assessments, data forensics, attack tracing, and system recovery processes for continuity of operation
- Identify system vulnerabilities and attack patterns and solve problems with intrusion detection tactics
- Navigate ethics, relevant laws, regulations, policies, and standards
- Lead successful teams with advanced project management skills

**Career Preparation**

This program is designed to help prepare you for a career in the cybersecurity and information assurance field in the areas of network and internet security, intrusion detection and prevention, cryptology, cyber law, and software assurance.

**Your Coursework**

The information assurance curriculum can help you gain valuable experience through laboratory exercises that mimic the requirements of a real-world environment. You’ll learn job-relevant skills from case studies of real information assurance crises.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Coursework Examples
In past projects, students have had the opportunity to study and experiment with real-world tools and techniques to perform

- Information risk analysis
- Network packet analysis
- Forensic evidence collection and preservation
- Protocol analysis
- Intrusion detection and prevention
- Encryption/decryption of files and messages
- Vulnerability assessments

Industry Certification
This program is designed to help prepare you for the following certification exams:

- CompTIA CertMaster for Security+
- (ISC)² Associate
- Systems Security Certified Practitioner (SSCP)
- Certified Information Systems Security Professional (CISSP)

Preparation Recommended for Success
Expectations
You are expected to have some background in information technology. This background may be acquired through noncredit preparatory coursework, listed below.

Recommendations
If you do not have previous coursework or experience in programming, you are strongly advised to first enroll in UCSP 635 and UCSP 636 to gain the appropriate foundation. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Information Assurance Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ITEC 610 Information Technology Foundations (3)
ITEC 625 Computer Systems Architecture (3)
ITEC 626 Information Systems Infrastructure (3)
ITEC 630 Information Systems Analysis, Modeling, and Design (3)
ITEC 640 Information Technology Project Management (3)

REQUIRED SPECIALIZATION COURSES
INFA 610 Foundations of Information Security and Assurance (3)
INFA 620 Network and Internet Security (3)
INFA 630 Intrusion Detection and Intrusion Prevention (3)
INFA 640 Cryptology and Data Protection (3)
INFA 650 Computer Forensics (3)
INFA 660 The Law, Regulation, and Ethics of Information Assurance (3)
INFA 670 Information Assurance Capstone (3)

COURSE SEQUENCING
- ITEC 610 must be taken in the first term of coursework.
- INFA 610 must be taken as the first specialization course.
- You must complete all other specialization coursework before taking INFA 670. (One 3-credit course may be taken concurrently.)

Program Recognition
UMGC’s MS in Information Technology with a specialization in information assurance has been designated a Professional Science Master’s degree program through the Council of Graduate Schools.

Related Certificate Program
Information Assurance

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED COURSES
INFA 610 Foundations of Information Security and Assurance (3)
INFA 620 Network and Internet Security (3)
INFA 630 Intrusion Detection and Intrusion Prevention (3)
INFA 640 Cryptology and Data Protection (3)
INFA 650 Computer Forensics (3)
Start your career off right with a flexible teaching program that prepares you for classroom success and Maryland certification.

In the Master of Arts in Teaching program, you’ll learn the latest teaching strategies and gain the experience you need to enter the field of secondary education with confidence. Develop skills in teaching to diverse student bodies, integrating technology in the classroom, and responding to varying learning styles in a wide range of secondary school environments.

This program is designed for students with a bachelor’s degree who want to earn teaching certification in a specific subject area (available areas listed at umgc.edu/MAT). Whether you’re new to teaching, retiring from a previous profession, relocating, returning to the workforce, teaching overseas, or simply seeking a second career that builds on previous study, we’ll help you prepare for a rewarding career as an educator.

What You’ll Learn

Through your coursework, you will learn how to

■ Design and deliver instructional plans
■ Manage a middle or high school classroom
■ Assess student learning
■ Use technology to maximize student learning
■ Differentiate teaching methods
■ Teach secondary students in a variety of settings, including conventional classrooms; urban, suburban, and rural schools; and learning communities that have cultural, ethnic, language, and socioeconomic diversity

Career Preparation

This program is designed to help you achieve Maryland teaching certification in the field of secondary education and can be helpful for becoming certified in other states. See umgc.edu/professional-licensure for information about professional licensure in this field and contact information for the professional licensure boards in other states.

Your Coursework

MAT courses, developed in conjunction with school districts, feature the latest theory in pedagogy and help you apply what you’re learning right away on the job.

Every course in the MAT program includes field experience components in which you’ll develop and practice your knowledge, skills, and dispositions for working effectively with diverse learners. This experience culminates in a full-time, on-site teaching internship of at least 80 in-school days (approximately 18 calendar weeks), which you complete under the supervision of a mentor teacher who is certified in your content area.

You will be responsible for following procedures for arranging field experiences and classroom observations within the school district of your choice. While UMGC is able to provide support and assistance in securing field placements, we cannot guarantee that all school districts will grant MAT students permission to enter the classroom. Also, states and local school districts have varying regulations and policies regarding field experiences and student teaching. We recommend you familiarize yourself with the student teaching requirements for your state and locality.

Coursework Examples

In past projects, students have had the opportunity to

■ Collaborate with a mentor teacher in the field to determine a target outcome for a group of students, then develop a strategy for achieving the target, carry out the initiative, and measure the results
■ Conduct observations in inclusion classrooms (grades K–12) to identify and describe developmentally appropriate practices that work effectively with adolescent learners and identify and describe classroom management procedures that are effective with adolescent students

Program Accreditation

The graduate education department at University of Maryland Global Campus has been accredited by the National Council for Accreditation of Teacher Education (now the Council for the Accreditation of Educator Preparation, caepnet.org). This accreditation covers the Master of Arts in Teaching program.
for initial teacher preparation and the Master of Education in instructional technology program at UMGC. However, the accreditation does not include individual education courses that the institution offers to P–12 educators for professional development, relicensure, or other purposes.

This program is also approved by the Maryland Higher Education Commission and by the Maryland State Department of Education as a professional education program leading to state teacher certification in the state of Maryland.

#### Admission Requirements
To be admitted to the program, you must meet the standard criteria for graduate admission (detailed on p. 151) and provide the following:

- Official transcripts in the original sealed envelopes demonstrating all of the following:
  - Completion of a bachelor’s degree from a regionally accredited institution
  - Completion of a major in the content area for which certification will be sought (or, subject to UMGC approval, 30 credits in content-related courses)
  - A cumulative GPA of 2.75 or higher in content area coursework
- Proof of a qualifying composite test score on the Praxis CORE Assessment test or a qualifying composite score on the Praxis I, SAT, ACT, or GRE. Titles and qualifying scores for these exams can be found at the Maryland State Department of Education at marylandpublicschools.org/about/Pages/DEE/Certification/testing_info/praxis1.aspx.
- If you are looking to teach computer science and your degree or coursework is older than five years, you must take the Praxis II content exam for computer science (5652) and submit a qualifying test score (149) to apply to the MAT program, in addition to submitting a qualifying test score on any one of the Maryland basic skills tests.

- If you are looking to teach a foreign language, you must also submit scores on the ACTFL Oral Proficiency Interview and Written Proficiency Test.

You can find the deadlines for application to the MAT program, information on how to submit test scores, and information on how to conduct a self-assessment of your transcript for your preferred specialty at umgc.edu/MAT. Note that UMGC’s graduate education department will make the determination regarding admission to the program.

Residents of Kentucky may be admitted on a case-by-case basis only.

**Note:** The complete admission file must be reviewed before you can enroll in EDTP 600.

### Technology Requirements
As a student in the MAT program, you are required to purchase a one-time $100 subscription (good for seven years) to Tk20 HigherEd before your first class. Tk20 is a comprehensive assessment and management system that supports all education students at UMGC. You may also need access to a webcam/microphone for certain assignments. More information is available online at umgc.edu/tk20.

### Preparation Recommended for Success

#### Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

### Degree Requirements

#### MAT

**INITIAL REQUIREMENT**
*(to be taken within the first 6 credits of study)*

- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED CORE COURSES**

- EDP 600 Foundations of Teaching for Learning (6)
- EDP 635 Adolescent Development and Learning Needs (6)
- EDP 639 Reading and Multiple Literacies (6)
- EDP 645 Subject Methods and Assessment (6)

**REQUIRED PROFESSIONAL INTERNSHIP**

- EDP 650 Professional Internship and Seminar (6)
COURSE SEQUENCING

- Courses should be taken in the order listed.
- EDTP 600 and EDTP 635 must be taken before EDTP 639 and may be taken together.
- EDTP 639 and EDTP 645 must be completed before EDTP 650 and may be taken together.

Criteria for Program Progression

In accordance with the requirements of the Council for Accreditation of Educator Preparation (CAEP), the MAT program requires that you earn grades of 80 percent (B) or better on major assignments. Therefore, you must complete each course with a grade of B or better to advance to the next course. (The grade of C is not acceptable for MAT courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

Graduation Requirements

Before beginning the professional internship, you must pass a content assessment. To graduate, you must also complete a performance-based teaching portfolio and student learning objectives project and register for the Praxis II pedagogy exam.

Professional Certification

Fulfilling the requirements of the MAT provides eligibility for the Maryland Standard Professional Certificate I (SPC I), which is granted by the graduate education department. The Maryland certification enables you to teach in the state of Maryland once you graduate and provides enhanced opportunities for interstate reciprocity.

Note that while Maryland state certification to teach world languages is valid for grades pre-K through 12, the MAT program focuses on teaching at the secondary school level.

Teacher certification requirements are constantly evolving in many states. You are responsible for remaining informed about the teacher certification requirements of the state in which you seek to become certified. You should also confirm requirements and any reciprocity arrangements with the state’s certifying agency.

More information about professional licensure is available at umgc.edu/professional-licensure.

Educational Relationship

Undergraduate students who are pursuing a bachelor’s degree from UMGC in an appropriate major (computer science, English, history, or social science or a general studies degree with a minimum of a 30-credit specialization in social studies) and other students who have the appropriate coursework (including biology and mathematics coursework) can reduce the total coursework for the MAT degree by up to 12 credits (three courses, including the noncredit introductory course UCSP 615) and complete both degrees with a total of 138 credits of coursework. This accelerated program option allows you to take graduate-level coursework before you complete your undergraduate degree.

To be eligible for this accelerated MAT option, you must have completed the courses listed below before being accepted in The Graduate School. The 500-level courses listed below are the only courses eligible for the 12 articulated credits available through this agreement. If successfully completed with a grade of C, these credits apply toward the undergraduate degree only. If completed with a grade of B or above, the credits will be accepted by The Graduate School toward the completion of the MAT degree.

- EDTP 500 Professional Fundamentals of Teaching and Learning (6) instead of EDTP 600
- EDTP 535 Adolescent Development and Learning Needs (6) instead of EDTP 635

To be admitted to the MAT program, you must meet all MAT admission requirements, including content area GPA (2.75), and achieve qualifying scores on basic skills assessment(s). If you meet these requirements, you will need only 18 credits (three 6-credit courses) to complete the MAT degree. Time limits for degree completion apply to all applicants.
MASTER OF DISTANCE EDUCATION AND E-LEARNING

Gain the practical knowledge needed to lead distance education programs in academic, business, government, and nonprofit organizations by pursuing a master’s degree in distance education and e-learning.

In UMGC’s Master of Distance Education and E-Learning (MDE) program, you’ll learn management strategies and gain the practical experience needed to design and lead distance education programs with confidence. You’ll develop essential skills in implementing distance learning technology, managing online faculty, and directing the business aspects of distance education programs. This program will help you acquire the unique skills and knowledge needed to maintain a successful enterprise in a technology-mediated learning environment. Although the MDE is not intended as a teacher preparation program, it provides the theory, best practices, and background that are relevant for teaching and administration. You can make a difference by expanding learning opportunities for others.

UMGC is an internationally recognized leader of distance education programming and policy. Whether you’re new to the field, changing careers, or looking to move up, you’ll enhance your credentials with a respected degree and prepare for a wide range of mid- and senior-level management roles in the rapidly growing field of distance education and e-learning.

Note: The MDE program does not lead to teacher certification in Maryland.

What You’ll Learn

Through your coursework, you will learn how to

- Apply education theory, learning models, and various teaching and learning frameworks in distance education
- Develop and manage distance education curricula
- Manage intellectual property and digital rights
- Select learning technologies
- Perform cost/benefit analyses for distance learning programs
- Work with various organizational and staffing models in distance education, as well as different leadership styles
- Apply distance learning programs in the workplace to drive professional development
- Manage change in organizations
- Perform quality assurance and project management of e-learning initiatives

Career Preparation

This program is designed to help prepare you to lead, manage, develop, evaluate, and implement distance learning programs in a wide range of academic and training contexts.

Your Coursework

Your courses will give you hands-on experience in the many aspects of distance learning. The curriculum covers instructional design, technology selection, business proposals, student support systems, and distance learning project management.

Coursework Examples

In past projects, students have had the opportunity to

- Create a personal learning environment to use throughout the course of the program
- Submit a project proposal for the introduction of multimedia learning in a corporate or academic setting, and prepare an audio or video presentation to convince the director of an e-learning department to provide the project funds
- Submit a proposal for improving enterprise learning based on a case study and needs analysis for a real organization
- Create a design and proposal for a new distance learning enterprise
- Create a prototype online course, including context analysis, learning design, a storyboard, and a project management plan
- Design a learner support model for a public or private educational institution or corporate or military training program

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
### Degree Requirements

**MDE**

**INITIAL REQUIREMENT**
*(to be taken within the first 6 credits of study)*

**REQUIRED CORE COURSES**

- OMDE 601 Foundations of Distance Education and E-Learning (3)
- OMDE 610 Teaching and Learning in Online Distance Education (3)
- OMDE 603 Technology in Distance Education and E-Learning (3)
- OMDE 608 Learner Support in Distance Education and Training (3)
- OMDE 606 Costs and Economics of Distance Education and E-Learning (3)
- DETT 611 Library and Intellectual Property Issues in Distance Education and E-Learning (3)
- DETT 607 Instructional Design and Course Development in Distance Education and E-Learning (3)
- DETC 620 Training and Learning with Multimedia (3)
- DEPM 604 Management and Leadership in Distance Education and E-Learning (3)
- DETT 621 Online Learning and Development in the Workplace (3)
- DEPM 622 The Business of Distance Education and E-Learning (3)

**REQUIRED CAPSTONE COURSE**

- OMDE 670 Portfolio and Project in Distance Education and E-Learning (3)

**COURSE SEQUENCING**

Courses must be taken in the order listed. Sequential courses may be taken concurrently.

---

**Preparation Recommended for Success**

**Recommendations**

Taking UCSP 605 is recommended to help improve writing skills.
MASTER OF EDUCATION IN INSTRUCTIONAL TECHNOLOGY

Enhance your credentials and bring your classroom into the digital age by pursuing a Master of Education degree in instructional technology.

In the instructional technology program, you’ll learn advanced skills in curriculum and instruction, technology integration, and leadership in pre-K through grade 12 education. This program is designed to help you develop expertise in current and emerging instructional technologies; gain a deep understanding of the role of technology in the contemporary school; and lead change efforts at the classroom, school, and district levels to improve student achievement.

Note: The MEd program does not lead to teacher certification in Maryland.

What You’ll Learn

Through your coursework, you will learn how to

- Integrate current and emerging technologies into the curriculum to strengthen and transform teaching and learning
- Use technology to create and cultivate your personal learning network
- Extend your classroom with blended and online learning experiences
- Integrate and manage mobile learning environments
- Assess the effectiveness of technology to support student learning
- Create multimedia and web-based products that support instruction
- Develop standards-based (Common Core), technology-supported lessons
- Provide innovative professional development experiences for teachers and other educators
- Advocate for and lead technology initiatives

Career Preparation

This program is designed to help you prepare for work in curriculum development and instruction, technology integration, and leadership in P–12 learning environments. Although Maryland does not offer licenses, certifications, or endorsements for graduates of the MEd program, other states may do so. See umgc.edu/professional-licensure for information about professional licensure in this field and contact information for the professional licensure boards in other states.

Your Coursework

Your instructional technology courses, designed for P–12 teachers, technology integration specialists, staff developers, and administrators, will help you develop expertise in digital-age learning by using technology, mobile devices, and active learning techniques to transform the educational experience.

Coursework Examples

In past projects, students have had the opportunity to

- Develop a professional web presence with social media connections for their classroom
- Create and implement flipped classroom and other blended learning modules in their classroom
- Integrate mobile learning devices and BYOD projects into their curriculum
- Develop and implement blended professional development experiences for teachers in their schools
- Lead an action research project investigating a critical area of need in their school, and propose, implement, and evaluate a research-based solution
Program Accreditation
The graduate education department at University of Maryland Global Campus has been accredited by the National Council for Accreditation of Teacher Education (now the Council for the Accreditation of Educator Preparation, caepnet.org). This accreditation covers the Master of Arts in Teaching program for initial teacher preparation and the Master of Education in instructional technology program at UMGC. With this accreditation, the Master of Education program has also earned national recognition by its professional association, the International Society for Technology in Education (ISTE). However, the accreditation does not include individual education courses that the institution offers to P–12 educators for professional development, relicensure, or other purposes.

Degree Requirements

MEd in Instructional Technology

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
EDTC 600 Foundations of Technology in Teaching and Learning (3)
EDTC 605 Teaching Information and Media Literacies in the Digital World (3)
EDTC 610 Web-Based Teaching and Learning: Design and Pedagogy (3)
EDTC 615 Using Technology for Instructional Improvement: Research, Data, and Best Practices (3)
EDTC 620 Technology in K–12 Education: Synchronous, Asynchronous, and Multimedia Technologies (3)
EDTC 625 Hardware and Software in Instructional Development (3)
EDTC 630 Administration of Technology Initiatives: Planning, Budgeting, and Evaluation (3)
EDTC 640 Leading Technology Change in Schools (3)
EDTC 645 Integration of Technology: Global Perspectives (3)
EDTC 650 Teaching and Learning in K–12 Virtual Schools (3)

REQUIRED CAPSTONE COURSE
EDTC 670 Integrative Capstone Project (3)

COURSE SEQUENCING
- The first nine courses in the program must be taken in the order listed; sequential courses may be taken concurrently.
- You must have completed the first nine courses in the program before taking EDTC 670.
- Currently, EDTC 670 is not available during the summer term; availability of the capstone course is provided online at umgc.edu/education.

Preparation Recommended for Success

Expectations
The MEd in Instructional Technology is designed for students with professional experience teaching in P–12 schools. If you lack teaching experience, you may want to choose another of UMGC’s education-related graduate programs.

Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

Technology Requirements
As a student in the MEd degree or Instructional Technology Integration certificate program, you are required to purchase a one-time $100 subscription (good for seven years) to Tk20 HigherEd before your first class. Tk20 is a comprehensive assessment and management system that supports all education students at UMGC. You may also need access to a webcam/microphone for certain assignments. More information is available online at umgc.edu/tk20.

Criteria for Program Progression
To maintain national professional accreditation, the MEd program requires that you earn grades of 80 percent (B) or better on major assignments in certain courses—namely EDTC 600, EDTC 615, EDTC 630, EDTC 640, and EDTC 645, which are offered before specific transition points in the program—to move forward in the program.

 Courses must be taken in the order listed; sequential courses may be taken at the same time.
MASTER OF SCIENCE IN LEARNING DESIGN AND TECHNOLOGY

Boost your career by gaining skills and knowledge that can help you design and operate the learning platforms of the future.

The graduate program in learning design and technology can help you gain the skills and competencies you need to use emerging technologies, learning analytics, and learning theory to design adaptive and personalized online learning experiences. You can explore, develop, and integrate digital media, new pedagogical approaches, and online interactive resources to give students greater access to education and prepare them for success.

Note: The MS in Learning Design and Technology program does not lead to teacher certification in Maryland.

What You’ll Learn

Through your coursework, you will learn how to

- Apply learning sciences to design and implement transformative, personalized online and hybrid learning experiences
- Identify and apply learning analytics, current research, and theory to optimize the online learning environment
- Analyze data and create visualization models to inform learning design
- Create authentic assessment strategies to evaluate online learning
- Select, evaluate, and design media and technologies to support learning online
- Communicate effectively online and in print using visual, oral, and written formats
- Initiate and lead learning design projects
- Evaluate legal and ethical issues and develop appropriate strategies for online learning projects
- Use social media tools to create a personal learning network for ongoing professional development

Career Preparation

This program is designed to help prepare you for work in learning environment design using digital pedagogy, emerging technologies, and data analytics.

Your Coursework

The learning design and technology curriculum is designed to give you the technical and leadership competencies you need to design personalized, adaptive learning experiences. In the culmination of your hands-on coursework, you will conduct an online internship in education or business, in which you will design real-world online learning programs.

Coursework Examples

In past projects, students have had the opportunity to

- Research, propose, and design an adaptive and personalized online course
- Create a scope and sequence document used to initiate and organize work of a design project
- Analyze a learning design project and create a risk management plan
- Collect and analyze online learner data to create a data visualization of results that influence curricular and instructional design changes
- Identify and incorporate adaptive learning elements to information course design
- Interview subject matter experts to initiate and develop the design specifications for an online learning project
- Identify, lead, and promote collaboration and relationships between stakeholders critical to the learning design process
- Develop interactive instructional materials
- Use social media tools to create a personal learning network for ongoing professional development
MS IN LEARNING DESIGN AND TECHNOLOGY

### Preparation Recommended for Success

**Expectations**
A background in teaching, education, or professional development and basic experience in word processing and G Suite is expected.

**Recommendations**
Taking ASC 601 is recommended to help improve writing skills.

### Degree Requirements

**MS in Learning Design and Technology**

**REQUIRED CORE COURSES**
- DCL 600  Decisive Thinking, Communicating, and Leading (6)
- LDT 610  Learning Design and Digital Pedagogy (6)
- LDT 620  Learning Design, Media, and Emerging Technologies (6)
- LDT 630  Learning Design and Data Analytics (6)
- LDT 640  Advanced Practicum in Learning Design (6)
- LDT 670  Learning Design Seminar (6)

**COURSE SEQUENCING**
Courses must be taken in the order listed.

**Criteria for Program Progression**
You must complete each course with a grade of B or better to advance to the next course. (The grade of C is not available for these courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

### Related Certificate Program

**Learning Design and Technology**

**REQUIRED COURSES**
- DCL 600  Decisive Thinking, Communicating, and Leading (6)
- LDT 610  Learning Design and Digital Pedagogy (6)
- LDT 620  Learning Design, Media, and Emerging Technologies (6)

**COURSE SEQUENCING**
All courses must be taken in the order listed. You must complete each course with a grade of B or better to advance to the next course. The grade of C is not available for these courses.
MASTER OF SCIENCE IN BIOTECHNOLOGY

SPECIALIZATIONS IN
Bioinformatics
Biosecurity and Biodefense
Biotechnology Management
Biotechnology Regulatory Affairs

CERTIFICATE IN
Bioinformatics

Master the business side of science and technology to accelerate your career growth in UMGC’s master’s degree program in biotechnology.

In the graduate biotechnology program, you’ll combine science and technology with business savvy to gain the ultimate skill set and maximum career flexibility. The program features a hands-on project with a biotech company and symposia by industry leaders to give you real-world experience and perspectives. Whether you are new to the field, changing careers, or looking to move up in your current organization, this program can open doors for you on the cutting edge of biotechnology.

Academic Preparation
A molecular biology background is required for this program. Upon submission of an official transcript, you may be accepted into the degree program without a molecular biology background, but you must take either a college-level molecular biology course or BIOT 601 Introduction to Molecular Biology before the required program core.

Degree Requirements
Specific course requirements are detailed under each specialization.

Recognition
UMGC’s MS in Biotechnology has been designated a Professional Science Master’s degree program through the Council of Graduate Schools.

Academic Relationship
If you are certified as a Project Management Professional by the Project Management Institute, you may receive credit for PMAN 634 Foundations of Project Management if you begin study for the master’s degree within five years of earning certification. Graduate advisors can provide more information.

Learn the tools to unlock the next big discovery while gaining real-world industry experience by pursuing a master’s degree in biotechnology with a specialization in bioinformatics.

Bioinformatics is a blend of biology, computer science, and mathematics. Modern biology generates massive quantities of big data. Hidden in this data might be the next blockbuster cancer therapy, the definitive proof that a certain gene is responsible for a disease, or the information needed to replicate a crucial biological process—and you could be on the team that discovers it.

A specialization in bioinformatics helps prepare you to become a qualified bioinformatics professional for public- or private-sector organizations. You’ll gain cutting-edge knowledge, and you’ll also develop experience in the field, which can give you an advantage in the job market.

What You’ll Learn
Through your coursework, you will learn how to
- Code in Python and Java
- Analyze big data, next-generation sequencing data, and scientific data

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Perform sequence alignments and phylogenetic analyses
Use biostatistics, databases and data structures, algorithms, and mathematical modeling

Career Preparation
This program is designed to help prepare you for a high-demand job in bioinformatics in a public- or private-sector organization. Potential employers include corporate organizations and government agencies, as well as academic institutions.

Your Coursework
The bioinformatics curriculum covers a broad range of subjects at the interface of molecular biology and computational science. You’ll gain real-world experience through interactions with biotechnology and learn from case studies of tackling real challenges.

Coursework Examples
In past projects, students have had the opportunity to
- Align and analyze DNA, RNA, and protein sequences, then perform phylogenetic analyses on them
- Write computer scripts to automate complex tasks and analyze biological data
- Work on a team for a sponsoring organization to tackle a real project

Preparation Recommended for Success
Expectations
You are expected to have completed undergraduate coursework in molecular biology, programming, and statistics. This background may be acquired through preparatory coursework, most of which is noncredit, listed below.

Requirements/Recommendations
If you lack previous coursework in molecular biology, you must take BIOT 601, which may be taken with BIOT 640. If you do not have demonstrated experience or prior coursework in software programming, you should take UCSP 635 and UCSP 636 (or equivalent) before beginning any BIFS classes. If you don’t have recent statistics experience, you should take STAT 200 (or equivalent). Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Biotechnology: Bioinformatics Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
BIOT 640 Societal Issues in Biotechnology (3)
BIOT 630 Introduction to Bioinformatics (3)
BIOT 645 The Business of Biotechnology (3)
BIOT 643 Techniques of Biotechnology (3)

REQUIRED SPECIALIZATION COURSES
BIFS 613 Statistical Processes for Biotechnology (3)
BIFS 614 Data Structures and Algorithms (3)
BIFS 617 Advanced Bioinformatics (3)
DBST 651 Relational Database Systems (3)
BIFS 618 Java for Biotechnology Applications (3)
DBST 652 Advanced Relational/Object-Relational Database Systems (3)
BIFS 619 Systems-Level Approaches in Bioinformatics (3)

REQUIRED CAPSTONE COURSE
BIOT 670 Capstone in Biotechnology (3)

COURSE SEQUENCING
- BIOT 601, if required, may be taken concurrently with BIOT 640.
- BIOT 640 must be taken as the first program course.
- You must complete all core courses with the BIOT designator in the order listed before starting any specialization.
- STAT 200 or an equivalent statistics course (with a minimum grade of C for an undergraduate course, B for a graduate course) is prerequisite to BIFS 613.
- UCSP 635 and UCSP 636 or an equivalent programming course (with a minimum grade of C for an undergraduate course, B for a graduate course) is prerequisite to BIFS 617.
- BIFS 617 is prerequisite to BIFS 618 and BIFS 619.
- BIOT 670 must be taken after you complete 30 credits of program coursework. The course is not offered in summer. Availability of the capstone course is provided online at umgc.edu/schedule.

What You’ll Learn
Through your coursework, you will learn how to

- Develop preparedness and response strategies for bioterrorism simulations
- Analyze cases of real epidemics, biowarfare, and bioethical research problems
- Communicate current trends in biodefense policies, laws, and best practices for global, interagency responses
- Develop advanced project management skills to lead teams
- Perform risk assessments and potential impact analyses and select treatments to handle adverse events

Career Preparation
This program is designed to help you prepare for work applying policy and using technology against biosecurity threats. Potential employers are in the government and public and private sectors.

Your Coursework
The biosecurity and biodefense curriculum is case-based and hands-on to help you build a strong foundation in the science of biotechnology and expertise in current issues and strategies in bioterrorism response.

Coursework Examples
In past projects, students have had the opportunity to

- Gain real-world experience through interactions with actual biodefense agencies and industries
- Work on a team for a sponsoring agency or organization to tackle a real project for that organization
- Participate in a simulation of a bioterrorist attack and prepare detection, response, and recovery plans
- Write a brief for policymakers on a current epidemic

Preparation Recommended for Success

Expectations
You are expected to have completed undergraduate coursework in molecular biology. This background may be acquired through preparatory coursework, listed on the following page.
Requirements/Recommendations
If you lack previous coursework in molecular biology, you must take BIOT 601, which may be taken with BIOT 640. Taking UCSP 605 is recommended to help improve writing skills.

MS IN BIOTECHNOLOGY:
BIOTECHNOLOGY MANAGEMENT SPECIALIZATION

| Required Core Courses | 15 |
| Required Specialization Courses | 18 |
| Required Capstone Course | 3 |
| Total Credits | 36 |

Sharpen your entrepreneurial and managerial skills for biotech business opportunities by pursuing a master's degree in biotechnology with a specialization in biotechnology management.

Specializing in biotechnology management within UMGC's graduate biotechnology program, you’ll learn how to evaluate, launch, and manage biotechnology ventures, from life-saving biopharmaceuticals to environment-friendly biofuels. Build a powerful skill set in both business and biology to become a sought-after professional or a successful entrepreneur with a master's degree in biotechnology with a specialization in biotechnology management.

What You’ll Learn

Through your coursework, you will learn how to

- Assess your organization’s needs for capital, personnel, technology, and marketing
- Evaluate forecasts, cost effectiveness, and performance of biotech projects
- Weigh the advantages and disadvantages of forming international ventures
- Interpret bioinformatic data and understand the latest technical advances in biotechnology
- Comprehend the economics of bioprocessing, regulatory affairs, and different global business models used in biotechnology
- Implement advanced project management skills to lead a successful team
Career Preparation
This program is designed to help prepare you for work in laboratory management, project management, instruction, and bioethics in both science- and business-focused biotechnology organizations.

Your Coursework
In the biotechnology management specialization, you’ll develop a deep understanding of the molecular science behind biotechnology while also building an advanced skill set in business management, marketing, and financial analysis. You can gain actual management experience through your coursework by working on a team for an organization in the biotechnology sector.

Coursework Examples
In past projects, students have had the opportunity to
- Write a business plan for a new biotechnology venture
- Pick a technology and analyze its potential for success
- Work on a team for a sponsoring agency or organization to tackle a real biotechnology project to fit that organization’s needs

Preparation Recommended for Success
Expectations
You are expected to have completed undergraduate coursework in molecular biology. This background may be acquired through preparatory coursework, listed below.

Requirements/Recommendations
If you lack previous coursework in molecular biology, you must take BIOT 601, which may be taken with BIOT 640. Taking UCSP 605 is recommended to help improve writing skills.

BIOT 630 Introduction to Bioinformatics (3)
BIOT 645 The Business of Biotechnology (3)
BIOT 643 Techniques of Biotechnology (3)
PMAN 634 Foundations of Project Management (3)

REQUIRED SPECIALIZATION COURSES
BTMN 632 Commercializing Biotechnology in Early-Stage Ventures (3)
BTMN 634 Selection and Evaluation of Biotechnology Projects (3)
BTMN 636 Biotechnology and the Regulatory Environment (3)
ISAS 610 Information Systems and Integration (3)
MRKT 600 Marketing Management (3)
MGMT 640 Financial Decision Making (3)

REQUIRED CAPSTONE COURSE
BIOT 670 Capstone in Biotechnology (3)

COURSE SEQUENCING
- BIOT 601, if required, may be taken concurrently with BIOT 640.
- BIOT 640 must be taken as the first program course.
- You must complete all core courses with the BIOT designator in the order listed before starting any specialization.
- BIOT 670 must be taken after you complete 30 credits of program coursework. The course is not offered in summer. Availability of the capstone course is provided online at umgc.edu/schedule.
Strengthen your marketability with specialized skills in the growing industry of international biotech business by pursuing a master's degree in biotechnology with a specialization in biotechnology regulatory affairs.

Specializing in biotechnology regulatory affairs, you'll develop expertise in the life cycle of biotechnology products and learn how to help businesses and regulators work together for safety and quality. This rare program, one of only a few in the nation, will give you a unique credential to help you stand out from the crowd.

Your biotechnology regulatory affairs specialization could prepare you to help bring a new medical technology to market, bring a life-saving drug to a new country, manage a top-quality research laboratory, or work for a regulating agency to improve drug and device safety for millions of people. You'll build strong skill sets in molecular biology, business, and policy to make yourself an indispensable asset to the public and private sectors of the biotech industry.

What You’ll Learn

Through your coursework, you will learn how to

- Develop a management plan for a clinical trial
- Assemble packages for an investigational new drug, a new drug application, a new device exemption, or a Biological License Application
- Demonstrate your knowledge of Federal Drug Administration regulations, including Title 21
- Navigate the policies and procedures for gaining marketing approval for a medical product within the United States, European Union, Japan, Canada, Brazil, India, and China
- Comprehend the economics of bioprocessing, regulatory affairs, and global business models used in biotechnology
- Implement advanced project management skills to lead a successful team

Career Preparation

This program is designed to help prepare you for preclinical and clinical trial management, data interpretation, product safety work, and work with regulatory agencies. Potential employers include corporate organizations and government agencies.

Your Coursework

In your core courses, you'll study the science and techniques used in biotechnology, as well as the industries surrounding them. In your regulatory affairs specialization courses, you'll learn how regulations and policies impact domestic and global biotech business, clinical trials, and product life cycles. The biotechnology regulatory affairs curriculum also covers laboratory and manufacturing best practices, quality control and assurance, and bioethics.

Coursework Examples

In past projects, students have had the opportunity to

- Complete a group project simulating the development of a drug or device through the product life cycle
- Generate a management plan and outline a funding proposal for a clinical trial
- Write a review of a 510(k) submission for a medical device from the point of view of an FDA reviewer
- Assemble several types of applications for marketing approval using real-world data sets
- Work on a team for a sponsoring agency or organization to tackle a real biotechnology project to fit that organization's needs

Industry Certification

This program can help prepare you for the Regulatory Affairs Certification exam.
Preparation Recommended for Success

Expectations
You are expected to have completed undergraduate coursework in molecular biology. This background may be acquired through preparatory coursework, listed below.

Requirements/Recommendations
If you lack previous coursework in molecular biology, you must take BIOT 601, which may be taken with BIOT 640. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements

MS in Biotechnology: Biotechnology Regulatory Affairs Specialization

BIOT 640 Societal Issues in Biotechnology (3)
BIOT 630 Introduction to Bioinformatics (3)
BIOT 645 The Business of Biotechnology (3)
BIOT 643 Techniques of Biotechnology (3)
PMAN 634 Foundations of Project Management (3)

REQUIRED SPECIALIZATION COURSES
BTMN 636 Biotechnology and the Regulatory Environment (3)
BTRA 640 Preclinical and Clinical Research Design (3)
BTRA 641 Product Life-Cycle Approval, Production, and Marketing for Devices and Drugs (3)
BTRA 642 Global Biotechnology Business Issues (3)
BTRA 643 Practical Applications of Biotech Regulatory Affairs (6)

REQUIRED CAPSTONE COURSE
BIOT 670 Capstone in Biotechnology (3)

COURSE SEQUENCING
- You must complete all core courses with the BIOT designator in the order listed before starting any specialization.
- BIOT 670 must be taken after you complete 30 credits of program coursework. The course is not offered in summer. Availability of the capstone course is provided online at umgc.edu/schedule.

■ BIOT 601, if required, may be taken concurrently with BIOT 640.
■ BIOT 640 must be taken as the first program course.
Improve the environment while improving your career outlook in the graduate environmental management program.

In the environmental management program, you’ll learn the business management skills, industry-standard technology, and environmental science needed to assume high-level management responsibilities for environmental programs in a wide range of organizations.

Almost every industrial, commercial, governmental, and military organization has to solve problems in pollution prevention and waste management. Perfect for midcareer professionals, the environmental management program will give you expert decision-making skills and practical experience that can boost your professional value and give you the confidence to lead.

What You’ll Learn

Through your coursework, you will learn how to

■ Assess threats, hazards, and risks to the environment from an organization’s operations
■ Analyze and communicate health, safety, and environmental risks
■ Manage, plan, and conduct comprehensive environmental compliance, managerial, and liability audits for various industrial and commercial facilities
■ Develop a team and manage an environmental project/program for an organization or government agency
■ Use key technologies and software tools, such as Crystal Ball and ARC GIS
■ Develop planning documents for watershed management and air quality programs
■ Use different methods of measurement and modeling to complete the four core parts of a risk assessment
■ Lead projects involving hazardous and municipal solid waste, pollution prevention techniques, and waste minimization
■ Apply environmental economic principles to property rights, pollution damage and abatement costs, and cost/benefit analyses

■ Develop strategies for protecting workers in the context of organizational and budgetary constraints
■ Understand U.S. environmental and energy law and policy, including its development, implementation, and enforcement
■ Apply best practices in land use management, including where to build, where not to build, how to build, and when to build

Career Preparation

This program is designed to help you prepare for high-level environmental management in a wide range of organizations, including industrial, commercial, governmental, and military organizations. Possible career areas include environment and safety analysis, sustainability management, environmental policy analysis, and environmental management.

Your Coursework

The environmental management curriculum was designed with employers and industry experts to give you the qualifications, experience, and knowledge required of top professionals in the field. You’ll gain real-world experience through interactions with actual organizations and use case studies to develop practical, applicable knowledge that you can apply right away on the job.

Coursework Examples

In past projects, students have had the opportunity to

■ Select a disposal-facility site and implement a plan for waste collection, recycling, and environmental monitoring
■ Analyze land use issues in the local community, using ARC GIS software, tools, and real data sets
■ Use Crystal Ball, a risk assessment tool, to conduct an environmental and ecological risk assessment
■ Work on a team for a sponsoring agency or organization to tackle a real environmental management project related to energy issues, siting of facilities, or sustainability

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
MS IN ENVIRONMENTAL MANAGEMENT

Preparation Recommended for Success

Expectations
You should have completed at least one undergraduate course each in chemistry and biology. Prior experience in an environmental field is also helpful.

Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements

MS in Environmental Management

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ENVM 600 Fundamentals of Environmental Systems (3)
ENVM 610 Environmental/Energy Law and Policy Development (3)
ENVM 641 Environmental Auditing (3)
ENVM 643 Environmental Communications and Reporting (3)
ENVM 644 Emerging Environmental Technologies (3)
ENVM 647 Environmental Risk Assessment (3)
ENVM 649 Principles of Waste Management and Pollution Control (3)
ENVM 650 Environmental and Natural Resources Economics (3)
ENVM 651 Water Resources Management (3)
ENVM 652 Principles of Air Quality Management (3)
ENVM 653 Land Use Management (3)

REQUIRED CAPSTONE COURSE
ENVM 670 Capstone in Environmental Management (3)

COURSE SEQUENCING
- ENVM 600 and ENVM 610 must be taken within the first 9 credits of study.
- You must complete 27 credits of program coursework before enrolling in ENVM 670.

Program Recognition
UMGC’s MS in Environmental Management has been designated a Professional Science Master’s degree program through the Council of Graduate Schools.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Develop advanced managerial skills in the graduate healthcare administration program to become an agile, adaptive leader.

Healthcare administrators manage complex organizations that serve diverse individual and community needs. The master’s degree program in healthcare administration is designed to develop leaders in this dynamic field that touches all of us. In this program, you can gain the expert knowledge, management skills, and strong professional development you need to seize career opportunities and maximize your potential in this era of rapid healthcare transformation.

UMGC is nationally recognized as a leader in online graduate healthcare programs. By actively participating in national-level discussions that shape healthcare education, we help to ensure that your UMGC degree is recognized, relevant, and respected.

What You’ll Learn

Through your coursework, you will learn how to

- Demonstrate knowledge of different models in healthcare administration, including contemporary theories, critical perspectives, and best practices for performance excellence in a highly competitive healthcare environment
- Apply strong financial management skills and techniques for responding to uncompensated care, cost increases, increased competition, and increased regulation
- Employ statistical tools to analyze health data and make effective business decisions
- Use decision-making skills for institutional management, organizational development, and intercultural work environments
- Strategically plan, implement, and evaluate information systems
- Evaluate regulatory constraints, provider liability, patient rights, employment law and labor relations, and administrative law for healthcare organizations
- Analyze public health issues and their impact on healthcare organizations
- Solve ongoing problems in healthcare financing and delivery
- Develop a comprehensive business plan for a healthcare product, service, or organization

Career Preparation

This program is designed to help prepare you for a leadership role in a dynamic sector that touches every life. Career opportunities include department management, health systems analysis, legislative work, and executive leadership in the private sector, professional societies, nonprofit organizations, the military, and all levels of government.

Your Coursework

The healthcare administration curriculum features emerging topics in the field. Our faculty lend their extensive field experience, and we build in opportunities for you to network with employers through your coursework.

Coursework Examples

In past projects, students have had the opportunity to

- Interview key healthcare professionals about current and future trends in the healthcare marketplace
- Develop a strategic plan and budget for improving the delivery of care
- Analyze the implications of evolving statutes and regulations on healthcare costs, access, and quality
- Contact a public health agency to analyze and give a presentation on a public health program or policy

Industry Certification

This program can help prepare you for the Board of Governors examination for certification as a Fellow of the American College of Healthcare Executives (FACHE).
**Honor Society**

Information on eligibility for membership in the UMGC chapter of Upsilon Phi Delta, the national academic honor society of the Association of University Programs in Health Administration, is available on p. 146.

### Preparation Recommended for Success

**Recommendations**

If you lack a recent background in finance or accounting, you should take UCSP 620 before HCAD 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

### Degree Requirements

**MS in Healthcare Administration**

**INITIAL REQUIREMENT** *(to be taken within the first 6 credits of study)*

- UCSP 615  Orientation to Graduate Studies at UMGC (0)

**REQUIRED MANAGEMENT FOUNDATION COURSES**

- MGMT 615 Intercultural Communication and Leadership (3)
- MGMT 650 Statistics for Managerial Decision Making (3)

**REQUIRED HEALTHCARE ADMINISTRATION COURSES**

- HCAD 600  Introduction to Healthcare Administration (3)
- HCAD 610  Information Technology for Healthcare Administration (3)
- HCAD 620  The U.S. Healthcare System (3)
- HCAD 625  The Business of Healthcare (3)
- HCAD 630  Public Health Administration (3)
- HCAD 635  Long-Term Care Administration (3)

- HCAD 640  Financial Management for Healthcare Organizations (3)
- HCAD 645  Strategic Financial Management in Healthcare (3)
- HCAD 650  Legal Aspects of Healthcare Administration (3)
- HCAD 660  Healthcare Institutional Organization and Management (3)
- HCAD 665  Strategic Issues in Healthcare Leadership (3)

**REQUIRED CAPSTONE COURSE**

- HCAD 670  Healthcare Administration Capstone (3)

**COURSE SEQUENCING**

- You are strongly encouraged to take HCAD 600 and MGMT 615 as the first courses in the program.
- MGMT 650 should be taken in the second or third semester.
- HCAD 620 is prerequisite to HCAD 625.
- HCAD 640 is prerequisite to HCAD 645.
- MGMT 650 should not be taken at the same time as HCAD 640 or HCAD 645.
- You must complete 36 credits before enrolling in HCAD 670.

### Related Certificate Program

**Global Health Management**

This program is offered jointly with the University of Maryland, Baltimore (UMB). The first two courses follow the UMB graduate academic calendar and use UMB’s learning management system, while the final course follows the UMGC academic calendar and use UMGC’s learning management system.

**RECOMMENDED PREPARATION**

Consult an advisor to determine whether you are academically or professionally prepared for this program.

**INITIAL REQUIREMENT** *(to be taken within the first 6 credits of study)*

- UCSP 615  Orientation to Graduate Studies at UMGC (0)

**REQUIRED COURSES**

- GHMT 610  Perspectives on Global Health (3)
- GHMT 620  National and International Approaches to Healthcare Delivery (3)
- GHMT 630  Strategic Management of Global Health Services (6)
Advance your career by building expertise and combining skills in three prime healthcare areas: healthcare administration, health information systems and technology, and management and leadership.

The cutting-edge health informatics administration program is taught by healthcare technology professionals who can help you develop the expertise to oversee the complex coordination of your organization's health informatics and administration needs.

If you are an experienced healthcare professional or an information technology specialist working in a healthcare setting, or are looking to transition to this exciting field, the health informatics administration program can help you obtain the skills and knowledge you need to apply best practices in health informatics or information management in a dynamic healthcare environment.

What You’ll Learn

Through your coursework, you will learn how to

- Apply advanced knowledge of electronic health record systems, medical coding, and IT system security and interoperability
- Design, manage, and interpret health classification systems, healthcare databases, data warehouses, healthcare data sets, registries, and other mediums of health information management
- Design and implement various health informatics and information management policies and procedures (e.g., those related to fraud and surveillance, data management, personnel management, data privacy, security and confidentiality, and clinical documentation improvement)
- Interpret and comply with various aspects of state and federal legal and regulatory standards (e.g., coding and revenue, privacy, security, federal employee labor laws, confidentiality, release of information, maintenance of health records, licensure, and accreditation)

Career Preparation

This program is designed to help prepare you for health informatics and information management within the dynamics of the healthcare environment. Career fields include clinical/health data analysis, clinical informatics, health information management, and health information/informatics consulting.

Your Coursework

Developed with input from employers, the courses in the graduate health informatics administration program feature projects with real data sets and guest speakers from the industry. Additionally, an advisory board of industry leaders and employers advises the program managers to ensure that the curriculum is covering emerging areas and staying current with 21st-century healthcare industry requirements.

Coursework Examples

In past projects, students have had the opportunity to

- Construct a workflow process redesign depicting positions conducive to an enterprise information management landscape
- Prepare Request for Information (RFI) and Request for Proposal (RFP) documents for acquiring electronic health record (EHR) systems.
- Research and delineate factors acting as barriers to EHR adoption
- Develop a data quality management system assessment tool
- Create a data breach notification letter to advise patients of a recent breach of data that affects a large integrated delivery system
- Create a project management plan to integrate the use of artificial intelligence
- Prepare a comprehensive healthcare finance fraud, abuse, and compliance program to establish a gateway between revenue and reimbursement practices and ensure ethical and professional adherence to applicable federal laws
Industry Certification
This program is designed to help prepare you for the following certification exams:

- Registered Health Information Administrator (RHIA)
- Certified Professional in Health Informatics (CPHI)
- Certified Associate in Healthcare Information and Management Systems (CAHIMS)
- Certified Professional in Healthcare Information and Management Systems (CPHIMS)

Program Accreditation
UMGC’s MS in Health Informatics Administration is accredited by the Commission for Health Informatics and Information Management Education (CAHIIM), an independent organization that accredits health informatics and health information management degree programs. CAHIIM is a specialized accrediting agency recognized by the Council for Higher Education Accreditation and an approved education partner of the Health Information and Management Systems Society (HIMSS).

**Degree Requirements**
**MS in Health Informatics Administration**

**INITIAL REQUIREMENT**
*(to be taken within the first 6 credits of study)*
- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED CORE COURSES**
- HCAD 600 Introduction to Healthcare Administration (3)
- ITEC 610 Information Technology Foundations (3)
- INFA 610 Foundations of Information Security and Assurance (3)
- HIMS 650 Research Methods for Healthcare Managers (3)
- HIMS 655 Health Data Management (3)
- HCAD 640 Financial Management for Healthcare Organizations (3)
- HCAD 650 Legal Aspects of Healthcare Administration (3)
- HIMS 661 The Application of Information Technology in Healthcare Administration (3)
- ITEC 640 Information Technology Project Management (3)
- DBST 651 Relational Database Systems (3)
- IMAT 637 IT Acquisitions Management (3)

**REQUIRED CAPSTONE COURSE**
- HIMS 670 Health Informatics Administration Capstone (3)

**COURSE SEQUENCING**
- You are advised to take HCAD 600 and ITEC 610 first.
- You will benefit most by taking the courses in the order listed.
- You must have successfully completed 30 credits of program coursework, including HIMS 650, HIMS 655, and HIMS 661, before enrolling in HIMS 670.

**Preparation Recommended for Success**

Expectations
Candidates for this program should preferably have three years of professional work experience in a healthcare setting, especially in health or general information technology, although it is not required.

Recommendations
Taking UCSP 605 is recommended to help improve writing skills.
Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
MS in Cloud Computing Architecture

Required Core Courses 36

Total Credits 36

Preparation Recommended for Success

Expectations
The cloud computing architecture program is designed for students with academic or professional experience in information technology. This background may be acquired through noncredit preparatory coursework, listed below.

Recommendations
If you do not have any recent IT coursework or experience, you should take the noncredit course ASC 605 before taking any cloud computing courses. Taking ASC 601 is recommended to help improve writing skills.

Degree Requirements

MS in Cloud Computing Architecture

REQUIRED CORE COURSES

DCL 600  Decisive Thinking, Communicating, and Leading (6)
CCA 610  Cloud Services and Technologies (6)
CCA 620  Cloud Management (6)
CCA 630  Cloud Infrastructure Planning, Design, and Configurations (6)
CCA 640  Cloud Computing Implementations and Migrations (6)
CCA 670  Capstone: Cloud Computing Orchestration (6)

COURSE SEQUENCING
Courses must be taken in the order listed.

Criteria for Program Progression
You must complete each course with a grade of B or better to advance to the next course. (The grade of C is not available for these courses.) Your course syllabus will explain options for and consequences of requesting an Incomplete.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
The state-of-the-art graduate data analytics program is designed with input from leading employers to give you a competitive advantage in the job market.

The master’s degree program in data analytics is designed to meet the rising need for highly skilled professionals who can transform the growing amount of institutional data into valuable assets. You’ll gain hands-on experience with a variety of analytical tools and learn how to manage and manipulate data, create data visualizations, and make strategic data-driven recommendations to influence business outcomes. By using industry knowledge and contextual understanding and questioning existing assumptions, you’ll learn to uncover hidden solutions to business challenges, allowing your organization to build and sustain a long-term competitive advantage.

What You’ll Learn
Through your coursework, you will learn how to

- Evaluate a business problem or opportunity to determine the extent to which data analytics can provide a viable solution and translate the business problem to a data analytics project
- Manage data analytics projects to ensure delivery of a successful data analytics initiative throughout its life cycle
- Create a data mining application specific to an individual domain or area (e.g., finance; cybersecurity; biological, medical, or scientific applications; or retail)
- Apply statistical and machine learning techniques for data analysis and interpret and communicate the results
- Transform large data sets into actionable information in an easy-to-understand format to support organizational decision making through the use of advanced analytical tools
- Apply big data analytics technology to a specific area such as healthcare; marketing; insurance; cybersecurity; or biological, medical, and scientific applications
- Evaluate the appropriate methods and tools for data analysis (including selecting a modeling approach, building a model using appropriate tools, validating the model, and deploying the model for prediction and analysis) in specific organizational contexts

Career Preparation
This program is designed to help prepare you for work in the high-demand field of data science and analysis in a public- or private-sector organization. Potential career fields include data mining, machine learning, and predictive modeling for large data sets.

Your Coursework
The curriculum for the master’s degree in data analytics is crafted, reviewed, and updated by a team of advisors and industry experts to ensure that what you learn aligns with the trends and technologies in the workplace today. It covers advanced software tools and programming language, as well as the foundations and application of data mining, predictive modeling, and visual analytics using large data sets.

Coursework Examples
In past projects, students have had the opportunity to

- Plan, design, and implement the data mining process, including data extraction, data cleaning, data load, and transformation
- Identify and implement appropriate techniques for or approaches to a given situation for descriptive, predictive, and prescriptive analytics using wide a range of supervised and unsupervised data mining algorithms
- Evaluate the accuracy and performance of classifiers and predictors
- Integrate a data mining system with a database, distributed file system, or data warehouse system using emerging technology
- Identify and apply techniques for stream, time-series, social networks, and multirelational data mining
- Employ real-time analytics and business intelligence directly on massive-scale data, including stream data
- Identify and apply techniques for spatial, multimedia, text, web content, web structure, and web usage mining
- Apply modern technology for text processing, natural language processing, and cognitive computing

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
### MS in Data Analytics

**Required Core Courses** 30

**Required Capstone Course** 6

**Total Credits** 36

#### Admission Requirements

To be admitted to the program, you must meet the standard criteria for graduate admission (detailed on p. 151) and provide one of the following:

- An official transcript reflecting completion of coursework at the 200-level or higher in statistic and computer programming from a regionally accredited college or university with a minimum grade of B. (Coursework from other accredited universities will be considered on a case-by-case basis.)

- Industry certification such as IBM certification in Cognos, Risk Analytics, SPSS, SAS certification, Microsoft certification, Certified Analytics Professional, Certified Business Intelligence Professional, or Certified Health Data Analyst

**Note:** The complete admission file must be reviewed before you can enroll in DATA 610.

#### Preparation Recommended for Success

**Expectations**

You are expected to have a background in software programming and statistics. This background may be acquired through noncredit preparatory coursework, listed below.

**Recommendations**

If you do not have recent coursework or experience in programming, you are strongly advised to take UCSP 635 and UCSP 636 (or their equivalent). If you don’t have recent statistics experience, you should take UCSP 630. Taking UCSP 605 is recommended to help improve writing skills.

---

### Degree Requirements

**MS in Data Analytics**

**INITIAL REQUIREMENT**

(to be taken within the first 6 credits of study)

- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED CORE COURSES**

- DATA 610 Decision Management Systems (6)
- DATA 620 Data Management and Visualization (6)
- DATA 630 Machine Learning (6)
- DATA 640 Predictive Modeling (6)
- DATA 650 Big Data Analytics (6)

**REQUIRED CAPSTONE COURSE**

- DATA 670 Data Analytics Capstone (6)

**COURSE SEQUENCING**

Courses must be taken in the order listed.

### Related Certificate Program

**Foundations in Business Analytics**

**INITIAL REQUIREMENT**

(to be taken within the first 6 credits of study)

- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED COURSES**

- DATA 610 Decision Management Systems (6)
- DATA 620 Data Management and Visualization (6)

**COURSE SEQUENCING**

Courses must be taken in the order listed.

**ADMISSION REQUIREMENTS**

You must meet the same admission requirements as those for the degree in data analytics.

---

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

SPECIALIZATIONS IN
- Database Systems Technology
- Informatics
- Project Management
- Software Engineering
- Systems Engineering
- Telecommunications Management

CERTIFICATE IN
Project Management

Gain a competitive advantage in the IT marketplace and develop specialized skills in high-tech management by pursuing a master's degree in information technology.

In UMGC’s comprehensive graduate information technology program, you’ll combine technical know-how with business savvy to gain a powerful IT skill set and maximum career flexibility. Whether you are new to the field, changing careers, or looking to move up, you’ll find that the information technology program can boost your professional value.

We designed our information technology program with input from today’s top employers to help you prepare for career advancement. Choose from specializations to tailor your education, prepare for certification, and develop highly marketable skills.

Degree Requirements
Specific course requirements are detailed under each specialization.

MS IN INFORMATION TECHNOLOGY: DATABASE SYSTEMS TECHNOLOGY SPECIALIZATION

<table>

Prepare to advance your career by learning the newest management methods and tools for today’s data-driven world in the graduate database systems technology specialization.

A database systems technology specialization can prepare you to meet the demand for data professionals who can manage complex databases for large organizations. You’ll develop expertise in relational and distributed databases and acquire the newest knowledge in data warehousing, mining, modeling, security, and other sought-after areas of database administration.

Prepare for a number of certifications and work on real-world projects in a respected graduate program as you build your professional value in this fast-growing field.

What You’ll Learn
Through your coursework, you will learn how to
- Manage, mine, model, and warehouse data
- Utilize your database administration and security techniques and skills
- Use ETL for data warehousing
- Complete projects using Microsoft Project and Microsoft Visio
- Apply your skills in NoSQL, Oracle 12c, SQL, and UNIX to the professional environment

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Career Preparation
This program is designed to help you prepare to manage complex databases for large organizations.

Your Coursework
The database systems technology specialization will give you thorough instruction on the design, development, and management of data technology and can help you develop the core competencies to conquer your career goals.

Coursework Examples
In past projects, students have had the opportunity to
■ Create a distributed database solution
■ Complete a database security project using Oracle 12c security features
■ Create advanced databases using object-oriented modeling and NoSQL modeling for big data
■ Create a database for a company to increase business proficiency; backup the database using Oracle tools; and monitor the database with different commands, including UNIX/Linux commands
■ Mine industry data to solve real-world challenges, such as using census data or Amazon public data to extract useful patterns and predict events regarding society, nature, commerce, and the world economy

Industry Certification
This program is designed to help prepare you for the following certification exams:
■ ICCP Certified Data Management Professional (ICCP CDMP)
■ Oracle Certified Professional (OCP)
■ Oracle Database Administration (DBA)

Academic or Professional Preparation
If you do not have demonstrated experience or prior coursework in software programming, you may be required to complete UCSP 635.

Preparation Recommended for Success
Recommendation
Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Database Systems Technology Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ITEC 625 Computer Systems Architecture (3)
ITEC 626 Information Systems Infrastructure (3)
ITEC 630 Information Systems Analysis, Modeling, and Design (3)
ITEC 640 Information Technology Project Management (3)

REQUIRED SPECIALIZATION COURSES
DBST 651 Relational Database Systems (3)
DBST 660 Advanced Data Modeling (3)
DBST 652 Advanced Relational/Object-Relational Database Systems (3)
DBST 663 Distributed Database Management Systems (3)
DBST 665 Data Warehouse Technologies (3)
DBST 667 Data Mining (3)
DBST 668 Database Security (3)
DBST 670 Database Systems Administration (3)

COURSE SEQUENCING
■ ITEC 625 and ITEC 626 must be taken as the first two courses.
■ You must complete 6 credits of core coursework before beginning specialization coursework.
■ DBST 651 is prerequisite for all other specialization coursework and may not be taken concurrently with other specialization coursework.
■ You must complete all other specialization coursework before taking DBST 670.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Strengthen your technical skills as you learn the business of IT in an informatics specialization that can help accelerate your career growth.

The informatics specialization gives you a strong foundation in all major categories of IT management, so you can take your career in any direction you choose. Develop advanced skills in networking, security, software development, databases, web design, and IT acquisitions to become a valuable asset to any industry.

Whether you are new to the field, changing careers, or looking to move up in your current organization, you’ll find that the informatics specialization can boost your professional value and open doors for you on the cutting edge of high tech.

What You’ll Learn

Through your coursework, you will learn how to

- Design information systems, determine system requirements, understand modeling, make decisions, and develop and implement proposals
- Write system and software requirements, formal specification analyses, formal description reasonings, models of “standard” paradigms, and translations into formal notations
- Manage emerging technologies such as cloud computing, BYOD, and virtualization
- Write successful website development plans
- Design for the web using Java and CGI scripts, as well as usability best practices
- Develop web benchmarks, standards for representing common media formats, compression algorithms, file format translation tools, and hardware requirements and standards
- Ensure and manage information security, including risk and vulnerability analysis, security planning, and security architecture
- Apply legal, ethical, and privacy considerations to information assurance decisions
- Master techniques for relational database design, query optimization, concurrency control, recovery, and integrity
- Use a suite of development software, including rapid application development and agile development, Scrum, extreme programming, Evolutionary Project Management, lean software development, test-driven development, feature-driven development, Crystal solutions, Rational Unified Process, and other Unified Process methods
- Apply management practices related to the acquisition of IT systems, components, and services, including enterprise strategic planning, financial planning and budgeting, and integration

Career Preparation

This program is designed to help prepare you for work in all major areas of IT management, including networking, security, software development, databases, web design, and IT acquisitions.

Your Coursework

The specialization in informatics teaches you strong quantitative and managerial skills, as well as knowledge in information theory and best practices for developing a variety of systems and products.

Coursework Examples

In past projects, students have had the opportunity to

- Build a website that contains at least five different media/interactive components, including at least one video component adapted for a smartphone
- Execute an individual project based on templates and models related to the CMMI Acquisition Module from Carnegie Mellon’s Software Engineering Institute

Preparation Recommended for Success

Recommendations

Taking UCSP 605 is recommended to help improve writing skills.

Earn your master’s degree in information technology with a specialization in project management to successfully lead large projects and grow your career advancement opportunities.

The project management specialization allows you to gain advanced IT management skills while building expertise for project management certification. Your specialization courses include project risk management, project procurement management, and advanced project methods, while your core IT courses give you the tools you need to take on leadership roles in today’s technology-based work environments.

**What You’ll Learn**

Through your coursework, you will learn how to

- Initiate, plan, track, and close projects
- Manage the schedule of a complex project on time and within budget, solving conflicts as they arise
- Perform quantitative analyses and manage risks involved in a complex project
- Apply advanced knowledge in computer systems architecture
- Analyze, design, and implement information systems
- Plan projects, build teams, and create and modify effective control mechanisms

**Career Preparation**

This program is designed to help prepare you for work in project coordination and management and, potentially, program management.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Your Coursework
The project management curriculum features a comprehensive project in an industry you select, so you can gain real-world experience. The curriculum covers project risk management, project procurement management, and quantitative methods in project management. You’ll learn career-relevant skills you can apply immediately in the workplace.

Coursework Examples
In past projects, students have had the opportunity to
- Initiate, plan, track, and close projects
- Complete a team project using cash flow analysis, scheduling projects based on resource availability, resource leveling, expediting projects, quantitative risk analysis, and techniques for estimating actual versus expected project duration and cost
- Manage issues that adversely affect the successful scope, scheduling, control, and completion of a project

Industry Certification
This program is designed to help prepare you for the following certification exams:
- Certified Associate in Project Management (CAPM)
- Project Management Professional (PMP)

Preparation Recommended for Success
Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Project Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ITEC 610 Information Technology Foundations (3)
ITEC 625 Computer Systems Architecture (3)
ITEC 626 Information Systems Infrastructure (3)

REQUIRED SPECIALIZATION COURSES
PMAN 634 Foundations of Project Management (3)
PMAN 635 Quantitative Methods in Project Management (3)
PMAN 637 Project Risk Management (3)
PMAN 638 Project Communication Management (3)
PMAN 639 Project Quality Management (3)
PMAN 641 Project Procurement Management (3)
PMAN 650 Financial and Strategic Management of Projects (3)

COURSE SEQUENCING
- ITEC 610 must be taken in the first term of coursework.
- PMAN 634 is prerequisite to all other PMAN courses and must be taken as the first specialization course.
- ITEC 640 (or an approved course in finance) and MGMT 650 (or an approved course in statistics) must be taken before PMAN 635.
- PMAN 635 must be taken before PMAN 637, PMAN 639, and PMAN 650.

Program Recognition
UMGC’s master’s degree programs with project management specializations are recognized by the Global Accreditation Center (GAC) of the Project Management Institute (PMI). 

Academic Relationship
Completing this program earns you the project management education hours required to sit for the Project Management Professional (PMP) Credential Examination or the Certified Associate in Project Management (CAPM) Exam. If you are already certified as a Project Management Professional by the Project Management Institute, you may receive credit for PMAN 634 Foundations of Project Management if you begin study for the master’s degree within five years of earning certification. Graduate advisors can provide more information.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.

</table>

Earn your master's degree in information technology with a specialization in software engineering to build large, complex systems—as well as an executive-track career.

The software engineering specialization provides software developers with advanced software methodology, design, and coding techniques. You’ll learn aspect-oriented programming, object-oriented programming, and the principles and techniques to lead a software development team.

Gain hands-on experience performing all functions of building software and develop job-relevant expertise in implementing large software engineering projects within cost and on schedule. The software engineering courses include usability engineering, software design and implementation, software verification and validation, and more.

What You’ll Learn

Through your coursework, you will learn how to
- Write a software requirements document
- Design software using UML models
- Develop and test software
- Apply advanced knowledge in computer systems architecture
- Manage the schedule of a complex project on time and within budget, solving conflicts as they arise
- Analyze, design, and implement information systems
- Plan projects, build teams, and create and modify effective control mechanisms

Career Preparation

This program is designed to help you prepare for work in the implementation of large software engineering projects.

Your Coursework

The software engineering curriculum features projects sponsored by real clients, so you can build software engineering skills to apply immediately on the job.

Coursework Examples

In past projects, students have had the opportunity to
- Complete the development of a corporate-sponsored project through its entire life cycle
- Build software products using object-oriented programming and aspect-oriented programming
- Evaluate user interfaces using contextual inquiry, task analysis, and usability testing

Preparation Recommended for Success

Expectations

The software engineering specialization is designed for students with a degree and/or professional experience in software development and programming languages. This background may be acquired through noncredit preparatory coursework, listed on the following page.
Recommendations
If you have not had any recent programming coursework or have experience in old programming languages such as COBOL or RPG, you are strongly encouraged to take UCSP 635 and UCSP 636 before taking any SWEN courses. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Software Engineering Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

</tbody>
</table>

Earn your master’s degree in information technology with a specialization in systems engineering to learn the design, development, and deployment of complex systems—and prepare for broader responsibility in a range of industries.

The systems engineering specialization can help you apply traditional and modern life-cycle models, techniques, and tools in the specification, design, development, and deployment of complex systems. The specialization is designed for midcareer professionals with a technical background who are seeking to enhance their skills in systems engineering theory and practice.

You’ll study a variety of cases across different application domains to learn the wide scope of systems concepts. Courses include requirements engineering, system design and development, model-based systems engineering, system integration and testing, system engineering management, and more.

What You’ll Learn
Through your coursework, you will learn how to
■ Organize and manage a systems engineering team
■ Apply a wide variety of domestic and international standards to systems engineering practice
■ Use various computer-aided design and testing tools

Career Preparation
This program is designed to help prepare you for work in systems engineering theory and practice.

Your Coursework
The systems engineering specialization within the master’s degree in information technology features projects involving real clients, so you’ll learn systems engineering skills you can apply immediately on the job.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Coursework Examples
In past projects, students have had the opportunity to
■ Develop a system requirements document
■ Break down a complex system into manageable subsystems
■ Specify strategies for verifying and validating that the overall system meets requirements

Industry Certification
This program is designed to help prepare you for the International Council on Systems Engineering (INCOSE) certification exams.

Preparation Recommended for Success
Expectations
The systems engineering specialization is designed for students with a degree and/or professional experience in a technical discipline such as engineering or computer science.

Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Systems Engineering Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ITEC 610 Information Technology Foundations (3)
ITEC 625 Computer Systems Architecture (3)
ITEC 626 Information Systems Infrastructure (3)
ITEC 630 Information Systems Analysis, Modeling, and Design (3)

SYSE 670 Systems Engineering Capstone (3)

COURSE SEQUENCING
■ ITEC 610 must be taken in the first term of coursework.
■ You must complete 6 credits of core coursework before beginning specialization coursework.
■ Specialization courses must be taken in the order listed.
■ You must take SYSE 670 in your final term.

MS in INFORMATION TECHNOLOGY:
TELECOMMUNICATIONS MANAGEMENT SPECIALIZATION

| Required Core Courses | 15 |
| Required Specialization Courses | 21 |
| Total Credits | 36 |

Advance your IT career in a master’s degree program in information technology with a telecommunications management specialization that combines business savvy and technical skills essential for managing telecommunication systems.

The telecommunications management specialization is designed to provide you not only with technical knowledge and understanding of the structure and environment of the telecommunications industry but also with critical management concepts, such as strategic planning, financial management, and quality improvement.

Courses in the telecommunications management specialization cover telecommunications networks, satellite communication systems, network management and design, wireless telecommunication systems, and more. The specialization includes instruction on network technologies, network design, satellite communications, wireless telecommunications, mobile cloud, and other job-relevant topics.
What You’ll Learn
Through your coursework, you will learn how to

- Manage networks using strategies for network planning, implementation, management, and security
- Manage the schedule of a complex telecommunications project, including conflicts that arise
- Speak fluently about the market trends, regulations, and standards in telecommunications
- Become fluent in cellular communication principles, coding, antenna and propagation effects, channel access schemes, traffic engineering, and wireless network design
- Apply advanced knowledge in computer systems architecture
- Manage the schedule of a complex project on time and within budget, solving conflicts as they arise
- Analyze, design, and implement information systems
- Plan projects, build teams, and create and modify effective control mechanisms

Career Preparation
This program is designed to help you prepare for work in network architecture design and management in areas such as telecommunications/sensor networks, satellite communication systems, and optical and wireless telecommunication systems.

Your Coursework
The telecommunications management specialization features guest speakers from telecommunications industries and projects sponsored by real clients, so you’ll build telecommunications management skills you can apply immediately in the workplace.

Coursework Examples
In past projects, students have had the opportunity to

- Craft a global Cisco strategy for the Washington, D.C., Metrorail system
- Analyze Cisco productivity returns, cost savings, and green implications of virtualization technologies in government
- Build a business case for Cisco for delivering IPv6 connectivity and services to the consumer market
- Build a business case and conduct market research on network/WAN management tools for GTSI
- Assess the information security of a non-LAN network for GTSI and make recommendations
- Create a smart grid for Maravedis with a new utility and new carrier
- Work on an unmanned aerial systems maintenance certification process for the Federal Aviation Administration (FAA)
- Analyze mobile object technology for the FAA’s SWIM Team
- Perform an FAA SWIM cloud suitability assessment
- Conduct a survey for the National Institute of Standards and Technology on commercial AC products to see how those products support NIST SP 800-162
- Analyze standards or schemes (such as XACML and SMAL) for their capabilities to support enterprise ABAC implementation
- Create complex AC policies to test ACPT functions for the ABAC model

Preparation Recommended for Success
Expectations
You are expected to have some background in information technology.

Recommendations
Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Telecommunications Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
- ITEC 610 Information Technology Foundations (3)
- ITEC 625 Computer Systems Architecture (3)
- ITEC 626 Information Systems Infrastructure (3)
- ITEC 630 Information Systems Analysis, Modeling, and Design (3)
- ITEC 640 Information Technology Project Management (3)
REQUIRED SPECIALIZATION COURSES
TLMN 602  Telecommunications Industry: Structure and Environment (3)
TLMN 623  Telecommunications Networks (3)
TLMN 630  Satellite Communication Systems (3)
TLMN 641  Network Management and Design (3)
TLMN 645  Wireless Telecommunications Systems (3)
INFA 620  Network and Internet Security (3)
TLMN 670  Capstone Course in Telecommunications Management (3)

COURSE SEQUENCING
- ITEC 610 must be taken in the first term of coursework.
- You must complete 6 credits of core coursework before beginning specialization coursework.
- ITEC 626 should be taken before any specialization courses.
- You must complete 27 credits of program coursework before taking TLMN 670.
- Currently, TLMN 670 is not available during the summer term.

Program Recognition
UMGC's MS in Information Technology with a specialization in telecommunications management has been designated a Professional Science Master’s degree program through the Council of Graduate Schools.
Compete for today’s—and tomorrow’s—jobs with a career-focused master’s degree in management.

The master’s degree program in management allows you to combine a broad management education with specific knowledge for your field or industry. We design our graduate management degree program with input from today’s top employers to provide you with decision-making skills, real-world experience, and a firm foundation for career advancement.

Learn how to integrate and use information systems to create value within your organization by pursuing a master’s degree in management with a specialization in information systems and services.

The information systems and services specialization teaches you how to procure and use computer-based information systems for decision making and organizational effectiveness. This specialization is designed for professionals who have little or no experience with computers, as well as those with advanced computer skills.

**What You’ll Learn**

Through your coursework, you will learn how to:

- Make IT decisions using statistics and financial information
- Use organizational theory, effectiveness measurement, and systems thinking to solve problems
- Manage intercultural environments
- Use advanced project management skills
- Develop databases
- Analyze systems
- Outsource appropriate tasks

**Career Preparation**

This program is designed to help you prepare to move into management positions that include responsibility for information systems.

**Your Coursework**

The curriculum in information systems and services uses case studies of companies in real situations, so you’re learning practical skills and knowledge that you can immediately apply at work. In addition to building a strong technological foundation, you’ll learn about the interaction of technology, organizational behavior, strategic planning, project management, and systems analysis methods used to support an organization through its information systems.

**Coursework Examples**

In past projects, students have had the opportunity to:

- Create an IT database based on real-world circumstances
- Review case studies for analysis and evaluation
- Use decision support tools to assist in decision making
- Design web pages using standards for representing common media formats, compression algorithms, file format translation tools, hardware requirements and standards, system constraints, Java, CGI scripts, and virtual reality

**Preparation Recommended for Success**

**Recommendations**

If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.
Degree Requirements

**MS in Management: Information Systems and Services Specialization**

**INITIAL REQUIREMENT**
*(to be taken within the first 6 credits of study)*

- UCSP 615 Orientation to Graduate Studies at UMGC (0)

**REQUIRED CORE COURSES**

- MGMT 630 Organizational Theory and Behavior (6)
- MGMT 640 Financial Decision Making for Managers (3)
- MGMT 650 Statistics for Managerial Decision Making (3)

**REQUIRED SPECIALIZATION COURSES**

- ISAS 600 Information Systems for Managers (3)
- ISAS 610 Information Systems Management and Integration (3)
- ISAS 620 Information Systems Sourcing Management (3)
- ISAS 630 Systems Analysis and Design (3)
- ISAS 640 Decision Support Systems and Expert Systems (3)
- ISAS 650 Information Technology, the CIO, and Organizational Transformation (3)
- IMAT 639 Internet Multimedia Applications (3)

**REQUIRED CAPSTONE COURSE**

- MGMT 670 Strategic Management Capstone (3)

**ALTERNATE COURSES**

- MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

**COURSE SEQUENCING**

- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- ISAS 600 should be taken before any other ISAS courses.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Compete for today’s—and tomorrow’s—jobs with a career-focused master’s degree in management.

Develop your marketing expertise and gain leading-edge management skills by pursuing a master’s degree in management with a specialization in marketing.

The specialization in marketing can help you move toward a senior position with leadership skills essential to the core function of every organization, public or private. Whether you’re new to marketing, looking to move up, or changing careers, you’ll learn the latest marketing strategies, as well as the foundations of solid management practice, to gain an edge in the job market.

**What You’ll Learn**
Through your coursework, you will learn how to
- Develop marketing strategies and plans effectively
- Develop creative strategies that communicate successfully with prospects
- Assess the effectiveness of a marketing program and develop recommendations for improvement
- Choose between many media options and use media effectively to achieve results
- Understand and implement research design
- Apply ethical principles in business situations

**Career Preparation**
This program is designed to help prepare you for a senior-level marketing position in the private and public sectors, leading consumer-focused and business-to-business organizations.

**Your Coursework**
The curriculum for the marketing specialization includes courses in brand management, consumer behavior, direct marketing, international marketing, legal and ethical issues in marketing, marketing management, and marketing research. Coursework also covers data mining, data analysis, digital marketing, and elements of marketing analytics.

**Coursework Examples**
In past projects, students have had the opportunity to
- Prepare a marketing plan for a real-world product or solution
- Complete a consumer experience project focused on ethical marketing tactics
- Develop an effective consumer intervention strategy based on insights obtained from consumer research
- Understand the major digital marketing channels and learn how to measure digital marketing efforts and calculate ROI
Preparation Recommended for Success

Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements

MS in Management: Marketing Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615  Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
MGMT 630 Organizational Theory and Behavior (6)
MGMT 640 Financial Decision Making for Managers (3)
MGMT 650 Statistics for Managerial Decision Making (3)

REQUIRED SPECIALIZATION COURSES
MRKT 620 Marketing Management, Legal, and Ethical Issues (6)
MRKT 602 Consumer Behavior (3)
MRKT 603 Brand Management (3)
MRKT 604 Marketing Research and Analytics (3)
MRKT 605 International Marketing Management (3)
MRKT 606 Digital and Direct Marketing (3)

REQUIRED CAPSTONE COURSE
MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
- MRKT 600 Marketing Management (3) and MRKT 601 Legal and Ethical Issues in Marketing (3) may be taken instead of MRKT 620.
- MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- You must complete MRKT 620 (or MRKT 600 and MRKT 601) as your first specialization course(s).

- MGMT 650 must be completed before MRKT 604 and MRKT 606.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.

MS in Management: Public Relations Specialization

Required Core Courses 12
Required Specialization Courses 21
Required Capstone Course 3
Total Credits 36

Develop your expertise as a strategic communications professional and organizational leader in a master's degree program in management with a specialization in public relations.

The public relations specialization helps you build your expertise in public relations and develop advanced business management and organizational leadership skills, helping you prepare for PR certification. You'll gain a solid grounding in PR theory, campaign strategies, legal and ethical PR issues, and the analytic and creative skills necessary to excel in the profession. Combine this with your core management courses, and you'll develop all the right tools to take on leadership roles in today's strategic communications workplace.

What You’ll Learn
Through your coursework, you will learn how to
- Assess public relations performance at the individual, group, and organization levels
- Develop, launch, and lead public relations campaigns featuring a variety of messages custom designed for various channels
- Understand the ethical and legal issues in public relations management
- Write effectively and persuasively

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Career Preparation

This program is designed to help prepare you for a leadership role in communications campaigns, global communications, strategy, ethical practice and issues, and crisis communication management.

Your Coursework

The curriculum for the specialization in public relations has been developed in conjunction with industry executives to ensure you are training for the highest level of PR strategy. In your courses, you’ll learn about public relations strategy development, tactical planning and execution, social media monitoring, and crisis communications.

Coursework Examples

In past projects, students have had the opportunity to
- Prepare public relations content
- Develop a crisis communication plan in response to a real-world issue
- Develop a proposal for a public relations campaign for a client organization

Industry Certification

This program can help prepare you for the Accredited in Public Relations (APR) panel presentation and written exam.

Preparation Recommended for Success

Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements

MS in Management: Public Relations Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

MGMT 630 Organizational Theory and Behavior (6)
MGMT 640 Financial Decision Making for Managers (3)
MGMT 650 Statistics for Managerial Decision Making (3)

REQUIRED SPECIALIZATION COURSES
PRPA 600 Public Relations Writing (3)
MRKT 600 Marketing Management (3)
PRPA 601 Public Relations Theory and Practice (3)
PRPA 602 Public Relations Techniques (3)
PRPA 610 Crisis Communication Management (3)
PRPA 620 Global Public Relations (3)
PRPA 650 Public Relations Campaigns (3)

REQUIRED CAPSTONE COURSE
MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- PRPA 600 is prerequisite to all other specialization courses and must be taken first.
- PRPA 601 is prerequisite to PRPA 602.
- PRPA 602 is prerequisite to PRPA 610 and PRPA 620.
- You must complete all program coursework (except MGMT 670) before taking PRPA 650.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.
Gain a competitive advantage in the IT marketplace and develop specialized skills in high-tech management by pursuing a master's degree in information technology.

In UMGC's comprehensive graduate information technology program, you'll combine technical know-how with business savvy to gain a powerful IT skill set and maximum career flexibility. Whether you are new to the field, changing careers, or looking to move up, you'll find the information technology program can boost your professional value.

The information technology program was designed with input from today's top employers to help you prepare for career advancement. Choose from specializations to tailor your education, prepare for certification, and develop highly marketable skills.

**MS IN INFORMATION TECHNOLOGY: HOMELAND SECURITY MANAGEMENT SPECIALIZATION**

<table>

</tr>
</tbody>
</table>

Combine advanced IT skills with leading-edge tactics in a homeland security management specialization that prepares you to protect critical infrastructure.

The graduate specialization in homeland security management can help prepare you to take a leadership role in protecting against natural and human-made threats to national security. Gain practical managerial skills in performing security risk assessments; planning for and managing operational recovery; and developing strategies to protect people, facilities, and information-dependent critical infrastructure.

Perfect for midcareer professionals, the homeland security management specialization features courses in finance for technology managers, cybersecurity, emergency management, and bioterrorism, as well as courses that strengthen your core knowledge of IT systems and project management.

**What You’ll Learn**

Through your coursework, you will learn how to:

- Tackle the five mission areas in homeland security as defined by the U.S. Department of Homeland Security
- Perform risk assessments
- Spot ethical and legal issues and navigate the complex legal and regulatory environment related to computer systems, applications, and networks
- Protect telecommunications and information technology networks
- Analyze infrastructure protection, jurisdiction, and issues in technical areas such as interconnectivity and interoperability
- Plan and prepare for disaster response and recovery
- Apply knowledge about energy pipeline security, electrical grid security, cyber dependence, and SCADA systems, as well as risk methodologies applied to the energy industry
- Use high-tech management styles, including project planning, organizational structure, team building, and control mechanisms
- Manage each phase of the IT project life cycle, working within organizational and cost constraints, setting goals linked directly to stakeholder needs, and using proven management tools

**Career Preparation**

This program is designed to help prepare you to take a leadership role in protecting against natural and human-induced threats to homeland security.

**Your Coursework**

The curriculum in the homeland security management specialization can help you build practical skills to make you an indispensable member of any team. You’ll use real data from real
crises in your assignments and projects and practice making executive-level decisions, so your coursework is always preparing you for the real world of homeland security management.

Coursework Examples
In past projects, students have had the opportunity to

- Use one of the Department of Homeland Security’s daily summaries of current critical infrastructure issues to write a post highlighting the more significant items for a “What Keeps DHS Officials Awake at Night” discussion
- Write a job description for a chief risk officer that includes the resilience, response, and recovery skills required for the job
- Analyze one of the critical infrastructures designated by DHS and make recommendations on ways to protect and ensure the continued availability of services from this infrastructure

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620. If you lack a recent background in statistics, you should take UCSP 630. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Information Technology: Homeland Security Management Specialization

INITIAL REQUIREMENT (to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
ITEC 610 Information Technology Foundations (3)
ITEC 625 Computer Systems Architecture (3)

</tbody>
</table>

The criminal justice management specialization can teach you advanced skills in administration, leadership, and collaboration to boost your career.

In the criminal justice management specialization, you’ll obtain advanced knowledge of crime prevention, law enforcement, investigative forensics, and crisis management—as well as strong skills in business management. This specialization can help you learn to effectively manage large teams, departments, and bureaus across the criminal justice profession.

What You’ll Learn
Through your coursework, you will learn how to

- Design criminal justice programs
- Analyze threats and assess risks
- Conduct vulnerability studies
- Apply legal knowledge to criminal justice management
- Lead and manage organizations
- Communicate, report, and write professionally and effectively

Career Preparation
This program is designed to help prepare you to apply broad management principles to work in areas such as crime prevention, law enforcement, investigative forensics, and crisis management.
Your Coursework
The criminal justice management curriculum features case studies of real criminal justice management issues to help you build skills you can apply immediately in the workplace.

Coursework Examples
In past projects, students have had the opportunity to
- Design a police department and corrections facility
- Write a variety of reports at varying levels of detail
- Address ethical situations in the workplace

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Management: Criminal Justice Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
MGMT 630 Organizational Theory and Behavior (6)
MGMT 640 Financial Decision Making for Managers (3)
MGMT 650 Statistics for Managerial Decision Making (3)

REQUIRED SPECIALIZATION COURSES
CJMS 600 Critical Analysis of the Criminal Justice System (3)
CJMS 610 Perspectives in Law Enforcement Management (3)
CJMS 620 Issues in Correctional Administration (3)
CJMS 630 Seminar in Security Management (3)
CJMS 640 Criminal Justice Intelligence Systems and Approaches (3)
CJMS 650 Legal Aspects Within the Criminal Justice System (3)
CJMS 660 Issues in Criminal Justice Leadership (3)

REQUIRED CAPSTONE COURSE
MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- Specialization courses should be taken in the order listed.
- CJMS 600 must be taken as the first specialization course.
- CJMS 660 must be taken after all specialization and core courses (except MGMT 670).
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.

Educational Relationship
An articulation agreement between The Graduate School and UMGC's Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in criminal justice to reduce their total coursework for the related graduate degree by up to 6 credits (two courses) and complete both degrees with a total of 150 credits of coursework.

The Graduate School will accept the following toward the completion of the MS in Management with a specialization in criminal justice management for a maximum of 6 credits:
- CCJS 495 Issues in Criminal Justice instead of CJMS 600 Critical Analysis of the Criminal Justice System
- CCJS 497 Correctional Administration instead of CJMS 620 Issues in Correctional Administration

The substitutions listed above are the only ones possible. Note that a minimum grade of B must be earned in each undergraduate course for the credits to be accepted at the graduate level. Eligible credits must have been completed no earlier than two years before the beginning of graduate studies. Admission requirements and time limits for degree completion apply to all applicants.

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Combine advanced leadership skills with leading-edge operational tactics in the dynamic master’s degree program in management with a specialization in emergency management.

The emergency management specialization helps you master the five mission areas of the National Preparedness Goal (prevention, protection, mitigation, response, and recovery) and take a leadership role in protecting organizations against major crises and disasters. Gain practical managerial skills in performing security risk assessments; planning and managing prevention, deterrence, protection, response, and operational recovery; and developing strategies to secure people and critical assets from natural or human-made threats.

Perfect for midcareer professionals, the emergency management specialization features coursework in financial analysis for managers, organizational theory, vulnerability assessments, IT in emergency management, and crisis communication, as well as courses that strengthen your core knowledge of management skills. Previous field experience in emergency management is not required for the program.

What You’ll Learn

Through your coursework, you will learn how to

- Communicate clearly, both orally and in writing
- Apply logical processes to formulate clear, defensible ideas and draw conclusions based on ethical implications
- Use mathematical information, operations, and quantitative analyses to solve problems and inform decision making
- Lead, facilitate, and collaborate with a variety of individuals and diverse teams to achieve organizational objectives
- Describe current and emerging threats, including terrorism and technological and natural disasters; the social, cultural, psychological, political, and operational dynamics of threats; and the evolution and basic principles of critical infrastructure protection, processes, and techniques
- Trace the history of various incidents and threats and assess the risks and vulnerabilities associated with each
- Assess threats and risks for facilities, entities, and communities and perform impact analysis
- Define types of incidents and threats, the historical phases and dimensions of technical systems, and standards that frame the operating environment
- Demonstrate a range of project management skills, from program to human resource management to financial, data, and information management
- Write, communicate, and implement emergency operations plans
- Construct discussion-based and operations-based exercises according to national, state, or local requirements and the principles of the Homeland Security Exercise and Evaluation Program and the National Standard Exercise Curriculum, in response to an after-action review or as a test of core capabilities
- Discover and use specific applications of advanced technologies, systems, and services for protection, response, recovery, and resilience, as well as disaster preparedness exercises and developmental and operational scenarios
- Understand the laws, authorities, regulations, policies, and ethical concerns related to emergency management issues and operations and the importance of public stewardship and science-based approaches
- Interpret data and determine solutions based on data; resources; and the legal, organizational, and social operating environment
- Understand the principles of leading, motivating, and managing others within an organization to establish and achieve strategic and operational goals

Course descriptions are found on pp. 97–137. Before enrolling, check umgc.edu/catalogs for possible updates to program offerings.
Career Preparation
This program is designed to help prepare you for work in hazard risk assessment; prevention, response, recovery, and mitigation planning and management; and strategy development to secure people, communities, and the built environment from natural or human-induced threats.

Your Coursework
The curriculum in the emergency management specialization helps teach you practical skills that can make you an asset to organizations planning for emergencies. You’ll use data from real crises in assignments and projects and practice making executive-level decisions, so you can apply what you’re learning to the field of crisis management right away.

Coursework Examples
In past projects, students have had the opportunity to
- Complete a risk assessment of an urban area
- Identify property and people at risk during a disaster scenario in a large population area
- Determine pre-loss activity and resources to reduce loss to specific critical infrastructures
- Design a plan for a specific ethnic or economically disadvantaged group within the community requiring special assistance during a disaster scenario

Industry Certification
This program is designed to help prepare you for the Certified Emergency Manager (CEM) exam.

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

HSMN 630 Resilience Planning and Preparedness for Disaster Response and Recovery (3)
EMAN 630 Crisis Communication for Emergency Managers (3)
EMAN 670 Seminar in Emergency Management Leadership (3)

REQUIRED CAPSTONE COURSE
MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
MGMT 610 Organizational Theory (3) and MGMT 615 Intercultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- EMAN 600 must be taken as one of the first two specialization courses.
- EMAN 670 must be taken in your last semester.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.
**Educational Relationship**

An articulation agreement between the Graduate School and UMGC’s Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in emergency management to reduce their total coursework for the related graduate degree by up to 6 credits (two courses) and complete both degrees with a total of 150 credits of coursework.

The Graduate School will accept the following courses toward the completion of a specialization in emergency management within the MS in Management for a maximum of 6 credits:

- EMGT 304 Emergency Response Preparedness and Planning instead of HSMN 630 Resilience Planning and Preparedness for Disaster Response and Recovery (3)

The substitutions listed above are the only ones possible. Note that a minimum grade of B must be earned in each undergraduate course for the credits to be accepted at the graduate level. Eligible credits must have been completed no earlier than two years before the beginning of graduate studies. Admission requirements and time limits for degree completion apply to all applicants.

Prepare for a dynamic career protecting critical infrastructure by pursuing a master’s degree in management with a specialization in homeland security management.

The specialization in homeland security management helps prepare you to take a leadership role in protecting against natural and human-made threats to U.S. security. Gain practical managerial skills experience in performing security risk assessments; planning for and managing operational recovery; and developing strategies to protect people, facilities, and critical infrastructure.

**What You’ll Learn**

Through your coursework, you will learn how to

- Tackle the five mission areas in homeland security as defined by the Department of Homeland Security
- Perform risk assessments
- Conduct resilience planning and preparedness for disaster response and recovery
- Apply risk methodologies to critical infrastructure sectors, including the energy industry
- Make decisions using statistics and financial information
- Use organizational theory, effectiveness measurement, and systems thinking
- Manage intercultural environments

**Career Preparation**

This program is designed to help prepare you to take a leadership role in protecting against natural and human-induced threats to homeland security.
Your Coursework

Perfect for midcareer professionals, the specialization in homeland security management includes coursework in issues in emergency management, cybersecurity, bioterrorism, and energy security, as well as core courses in business management. You'll use real data from real crises in assignments and projects and practice making executive-level decisions.

Coursework Examples

In past projects, students have had the opportunity to
- Use one of the Department of Homeland Security’s daily summaries of current critical infrastructure issues to write a hypothetical article
- Write a job description for a chief risk officer, including the resilience, response, and recovery skills required for the job
- Analyze one of the critical infrastructures designated by DHS and make recommendations on ways to protect and ensure continued availability of services from this infrastructure, providing your judgments together with experts’ opinions

Preparation Recommended for Success

Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to improve writing skills.

Degree Requirements

MS in Management: Homeland Security Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615 Orientation to Graduate Studies at UMGC (0)

REQUIRED CORE COURSES
- MGMT 630 Organizational Theory and Behavior (6)
- MGMT 640 Financial Decision Making for Managers (3)
- MGMT 650 Statistics for Managerial Decision Making (3)

REQUIRED SPECIALIZATION COURSES
- HSMN 610 Concepts in Homeland Security (3)
- HSMN 625 Critical Infrastructures (3)
- HSMN 630 Resilience Planning and Preparedness for Disaster Response and Recovery (3)
- INFA 660 The Law, Regulation, and Ethics of Information Assurance (3)
- BSBD 641 Bioscience and Bioterrorism (3)
- EMAN 620 Information Technology in Emergency Management (3)
- HSMN 670 Seminar in Homeland Security (3)

REQUIRED CAPSTONE COURSE
- MGMT 670 Strategic Management Capstone (3)

ALTERNATE COURSES
- MGMT 610 Organizational Theory (3) and MGMT 615 Inter-cultural Communication and Leadership (3) may be taken instead of MGMT 630.

COURSE SEQUENCING
- MGMT 630 (or MGMT 610) must be taken within the first 6 credits.
- MGMT 640 should not be attempted simultaneously with MGMT 650.
- HSMN 610 must be taken as one of the first two specialization courses.
- HSMN 670 must be taken in your last semester.
- You must complete 24 credits of program coursework, including all core courses, before enrolling in MGMT 670.

Educational Relationship

An articulation agreement between the Graduate School and UMGC’s Undergraduate School allows students who completed their undergraduate degree at UMGC with coursework in homeland security to reduce their total coursework for a related graduate degree by up to 6 credits (two courses) and complete both degrees with a total of 150 credits of coursework.

The Graduate School will accept the following courses toward the completion of a specialization in homeland security within the MS in Management for a maximum of 6 credits:
- HMLS 408 Infrastructure Security Issues instead of HSMN 625 Critical Infrastructures

The substitutions listed above are the only ones possible. Note that a minimum grade of B must be earned in each under-
Related Certificate Program

Position yourself for career growth in the Intelligence Community by pursuing a master’s degree in management with a specialization in intelligence management.

The intelligence management specialization prepares you to take on management roles in intelligence collection, analysis, counterintelligence, counterterrorism, cyber intelligence and espionage, resource management, implementation of new machine learning techniques, and intelligence policy and oversight for national security and law enforcement. Designed for early- to midcareer intelligence professionals, the specialization will improve your professional qualifications and teach you to apply solid management theories and principles, engage in intelligence-related research, and assess intelligence-related data for decision making. It will also prepare you to gain an essential understanding of interagency collaboration and the organization, priorities, processes, and assigned roles and responsibilities of the Intelligence Community.

What You’ll Learn

Through your coursework, you will learn how to

- Employ holistic solutions and strategies to leverage human, open source, signals, geospatial, technical, and cyber intelligence collection against a wide spectrum of target sets
- Apply analytical theories, innovative methodologies, deep learning, and intelligent automation and artificial intelligence to gain a broad understanding of the challenges of analysis and its role in providing threat warning indicators and situational awareness in supporting policy makers, decision makers, and military personnel
- Assess counterintelligence, foreign espionage, cyber and insider threats, violent extremism, and emerging asymmetric threats to national security
- Apply leadership principles, risk assessments, and threat-mitigation strategies to the unique challenges facing Intelligence Community leaders
- Assess the impact of emerging technologies such as artificial intelligence and machine learning in intelligence, surveillance, and reconnaissance (ISR); threat indicators and analysis; collection; intelligence management; targeting; and counterintelligence

Career Preparation

This program is designed to help prepare you for positions of greater responsibility in areas such as intelligence collection, analysis, cyber espionage, counterintelligence, counterterrorism, intelligence-led law enforcement, oversight, policy, acquisition, budget, technology infusion, and human capital management in the public and private sectors.
Your Coursework
In your intelligence management courses, you’ll incorporate scenarios and data from actual events into class discussions, assignments, and exercises to practice making executive-level decisions that will better prepare you for the real world of intelligence management. You’ll gain an analytical understanding of legal and ethical principles that guide the Intelligence Community and learn how to manage intelligence processes, integrate emerging technological advances, and govern human resources. The curriculum is designed to increase your critical thinking and communication skills, as well as core knowledge and understanding of national security and intelligence policy issues.

Coursework Examples
In past projects, students have had the opportunity to
- Conduct a scholarly study of a problem or issue related to intelligence composed of purposeful research, a literature review, writing, analysis, solutions to complex problems, and the defense of conclusions and proposals
- Discuss real-world issues in national security, such as intelligence reform and reorganization, information sharing, strategic partnerships, adaptive planning processes, technology infusion, workforce management, collection and persistent surveillance, asymmetric threat mitigation, and the emergence of cyber threats and espionage
- Analyze studies of various laws and executive orders related to insider threats, the debate over national security and civil liberties, legal authorities, judicial authorization, and intelligence oversight

Preparation Recommended for Success
Recommendations
If you lack a recent background in finance or accounting, you should take UCSP 620 before MGMT 640. If you lack a recent background in statistics, you should take UCSP 630 before MGMT 650. Taking UCSP 605 is recommended to help improve writing skills.

Degree Requirements
MS in Management: Intelligence Management Specialization

INITIAL REQUIREMENT
(to be taken within the first 6 credits of study)
UCSP 615  Orientation to Graduate Studies at UMGC (0)

ACCT (Accounting)

ACCT 610 Financial Accounting (3)
Prerequisite: 15 credits of undergraduate accounting. An overview of accounting theory in a strategic framework. An overview of relevant theory provides a foundation for further study. Focus is on developing skills in critical thinking and applying accounting concepts and principles. Topics include the preparation and interpretation of corporate financial statements in accordance with generally accepted accounting principles (GAAP); accounting standards and the standard-setting process; the use of electronic technology in financial accounting; effective communication; professional ethics; and current issues, debates, and research in accounting.

ACCT 611 Management Accounting (3)
Prerequisite: ACCT 610. An examination of the control and decision-making methodologies used by management accountants in solving strategic problems for business. Methodologies covered include break-even analysis, regression analysis, the balanced scorecard, activity-based costing/management, value chain analysis, total quality management, and performance evaluation/assessment. Business problems examined range from ethical issues to product costing.

ACCT 613 Federal Income Taxation (3)
Prerequisite: ACCT 610. A case study-based, problem-oriented examination of fundamental federal tax concepts. Tax issues and controversies are explored in depth. Emphasis is on applying tax laws, as opposed to learning individual tax rules. Methods of case analysis and research that are typically involved in tax planning and litigation are covered. Important definitions, judicially created rules, and other tax conventions are explored in great detail through the study of each one’s genesis and purpose. Topics include tax issues that concern gross income, identification of the proper taxpayer, deductions, timing, income and deduction characterization, deferral, and capital gains and losses.

THE UNIT OF CREDIT

The unit of credit defines the amount of university-level credit to be awarded for course completion, transfer of coursework from another institution, or evaluation of college-level prior learning. One credit is awarded on the basis of one of the following, according to the Code of Maryland Regulations:

- At least 15 hours (50 minutes each) of actual class meeting or the equivalent in guided learning activity (exclusive of registration, study days, and holidays)
- At least 30 hours (50 minutes each) of supervised laboratory or studio work (exclusive of registration, study days, and holidays)
- At least 45 hours (50 minutes each) of instructional situations, such as practica, internships, and cooperative education placements, when supervision is ensured and learning is documented
- Instruction delivered by electronic media based on the equivalent outcomes in student learning, including telelessons, classroom instruction, student consultation with instructors, and readings, when supervision is ensured and learning is documented

PREREQUISITES

Prerequisites, normally stated in terms of numbered courses, represent the level of knowledge you should have acquired before enrolling in a given course. You will not be able to register for courses for which prerequisites have not been met.

ACCT 618 Accounting Information Systems (3)
(Formerly ACCT 614.) Prerequisite: ACCT 610. A study of the use of information systems in the accounting process, with an emphasis on computer systems and internal controls. Focus is on the analytical tools necessary to evaluate users’ accounting information needs and design, implement, and maintain an accounting information system to support business processes and cycles. Topics include the components of contemporary accounting information systems; security and internal controls, particularly within internet and e-commerce environments; traditional flow charts and data-flow diagrams; computer networks; theory and application of relational databases; and relational database management systems. Assignments include designing an accounting information system using a commercial database software package.
ACCT 620 Cyber Accounting: Management and Compliance (3)
Prerequisites: ACCT 610 and ACCT 618. An applied study of the principles of information systems management and their integration within private-sector organizations served by accounting professionals. Emphasis is on developing strategic cyber accounting initiatives to increase cybersecurity awareness inside organizations, with external organizations in their supply chains, and with other stakeholders. Topics include cybersecurity compliance requirements issued by federal and state regulatory agencies and voluntary cybersecurity standards, such as the G-7 Fundamentals of Cybersecurity for the Financial Sector and the AICPA’s Cybersecurity Risk Management Framework.

ACCT 625 Government and Not-for-Profit Accounting (3)
Prerequisite: ACCT 610. A study of the financial accounting standards applicable to public-sector and not-for-profit organizations in the United States and their unique reporting requirements. Emphasis is on similarities and differences among accounting rules for different types of entities and the rationale for the accounting standards governing each type. Students may receive credit for only one of the following courses: ACCT 625 or ACCT 665.

ACCT 628 Auditing (3)
(Formerly ACCT 612.) Prerequisite: ACCT 610. An in-depth examination of generally accepted auditing standards (GAAS), as well as standards for attestation and other services. Alternative audit models are evaluated for both their practical relevance and their theoretical justification as informed by current research and emerging information technology. The use of computer-assisted auditing techniques (CAAT) and other computer-related technology for obtaining evidence is evaluated in terms of its effectiveness and suitability in diverse audit environments. Methods of evaluating internal controls are considered in light of the risks encountered in new ways of conducting business, such as e-commerce. Professional ethical and legal responsibilities, as shaped by the contemporary professional, legal, and regulatory environments, are examined as they relate to audit risk, risk assessment, and audit program planning. Audit reports and other services are examined as tools to support management control and decision making.

ACCT 630 Fraud Examination (3)
Prerequisite: ACCT 610. A study of the nature and elements of fraud. Topics include fraud prevention (including the use of controls), detection, and investigation, as well as methods of fraud resolution. Emphasis is on the use of forensic accounting techniques to analyze what is behind the data being generated by the accounting system, detect internal control weaknesses, and map out a fraud investigation program. Students may receive credit for only one of the following courses: ACCT 630 or ACCT 608.

ACCT 635 Accounting Ethics (3)
Prerequisite: ACCT 610. A study of ethics as a critical foundation for the accounting profession. Topics include the theories and bases of ethical reasoning, development of ethical standards, codes of professional conduct, professional responsibilities and judgment calls in accounting, and the evolution of ethics in the accounting profession. Students may receive credit for only one of the following courses: ACCT 635 or ACCT 608.

ACCT 640 International Accounting (3)
Prerequisite: ACCT 610. An exploration of international accounting and financial reporting. Focus is on evolving reporting requirements under International Financial Reporting Standards (IFRS). Accounting practices, as influenced by business operations, culture, and the inherent risk in international accounting environments, are compared. Students may receive credit for only one of the following courses: ACCT 640 or ACCT 665.

ACCT 645 Cyber Forensics in Accounting (3)
Prerequisites: ACCT 610, ACCT 618, ACCT 628, and ACCT 630. An applied study of the tools, techniques, and technologies used in forensic accounting investigations, data analytics, and litigation. Focus is on disentangling obscure evidence discovered during fraud investigations by using data analytics. Activities include conducting a forensic accounting investigation, performing analytical tests on financial data, preparing written forensic accounting reports for legal proceedings, and serving as an expert witness providing testimony supported by evidence and analytical tests.

ACCT 660 Information Technology Auditing (3)
(Formerly MSAS 670.) Prerequisites: ACCT 618, ACCT 628, ACCT 630, and INFA 610. A study of accounting and information systems that integrates content from both disciplines. Advanced principles, techniques, and theories are applied through the analysis and presentation of case studies by student teams. Assignments include a research paper that comprehensively assesses an important current issue or emerging trend in the fields of accounting and information systems.

ACCT 670 Capstone: Cyber Accounting: Risk Management (3)
Prerequisites: All other program courses; may be taken with ACCT 635 or INFA 660. A capstone exploration of the principles of risk management as practiced by federal, state, and local entities. Discussion examines cyber accounting risk management as promulgated by professional accounting organizations such as the AICPA. Risk management techniques are applied to cybersecurity issues confronting professional accounting service providers. Focus is on developing skills in assessing client risks, designing and developing cybersecurity controls to mitigate cyber attacks on client data, and conducting penetration tests to identify potential cyber accounting vulnerabilities.
ASC (Academic Success)

ASC 601 Graduate Writing Skills (0)
(Recommended preparation for students who want to improve their writing skills.) Improve your academic writing skills and become a better communicator. Enhance your grammar and punctuation skills through individualized exercises. Prepare for academic writing by summarizing and synthesizing texts, developing well-organized essays, and incorporating sources into your work. Employ APA style for formatting and correct citation. Learn the steps of writing, from prewriting through proofreading, to produce clear, concise documents appropriate to your audience and purpose.

ASC 603 Introduction to Accounting and Financial Management (0)
(Recommended preparation for students who want a foundational background in accounting and finance.) Engage in a basic study of accounting and financial management concepts and their use in analyzing financial statements and estimating the value of long-term capital projects and investments. Analyze the financial statements of actual companies using financial ratios. Apply time value of money concepts to determine the current and future value of financial and real assets/investments. Develop an appreciation for how financial management and accounting information can be used to support financial assessment analysis, valuation, and decision making in various contexts.

ASC 605 Basic Information Technology (0)
(Recommended preparation for students who want a background in the basic configurations of computer hardware and operating systems software, especially those entering the cybersecurity, cybersecurity policy, and digital forensics programs who do not have a background in computing.) Explore concepts of computing. Discuss computer systems (including computer hardware and hardware components, computer software, and networks) and the internet. Develop your understanding of the privacy and security issues related to computing and the internet.

ASC 607 Introduction to Statistics (0)
(Recommended preparation for students who require knowledge of statistics to progress in their coursework.) Learn to derive meaning from quantitative analysis of data by employing fundamental concepts and methods of statistics. Explore approaches and develop skills (such as determining the reliability and validity of sources and types of data and portraying data in tables, graphs, and charts) that are necessary to evaluate research methods and their application to solving problems. Use inferential statistics to draw conclusions, calculate correlation and regression, and apply other statistical methods to inform decisions.

ASC 609 Essentials of Computer Programming (0)
(Recommended preparation for students with little or no programming experience, especially those entering cybersecurity technology, cybersecurity policy, or digital forensics programs.) Recommended: ASC 605. Gain hands-on experience in creating computer programs. Explore all aspects of basic programming, including variables, arrays, conditions, and input/output. Build a foundation for more advanced work in computer programming.

ASC 611 Structure of Computer Programming (0)
(Recommended preparation for students with some programming experience, typically with older languages such as PRG and COBOL, and those entering cybersecurity, cybersecurity policy, digital forensics, bioinformatics, data analytics, database technology, or software engineering programs.) Prerequisite: ASC 609. Gain hands-on experience in creating computer programs. Explore aspects of programming related to the structure of the program, including loops, procedures/functions, and leveraging other software libraries/packages.

ASCM (Acquisition and Supply Chain Management)

ASCM 626 Purchasing and Materials Management (3)
An overview of the procurement and contracting cycle, along with other organizational functions. Discussion covers methods of purchasing and source selection, with a focus on receipt, inspection, and quality assurance. Documentation and reporting specifics are examined, as are surplus, salvage, and disposal issues. Inventory, physical distribution, and logistics are considered.
ASCM 627 Legal Aspects of Contracting (3)
A study of the law of commercial purchasing, including the law of agency, contracts, sales, torts, and antitrust. The Federal Acquisition Regulation and American Bar Association model procurement codes for state and local governments are examined. Topics include the authority of purchasing, unauthorized purchases, rights and duties of sellers and buyers under a contract, buyer rights upon receipt of nonconforming goods, ability to terminate a sales contract, formation of government contracts, and formal dispute resolution. Students may receive credit for only one of the following courses: ASCM 627 or ASCM 650.

ASCM 628 Contract Pricing and Negotiations (3)
A study of techniques for planning, conducting, and managing negotiated procurement. Focus is on analytical techniques for conducting price and cost analysis in preparation for negotiations. Techniques for critically examining all categories of costs, including profit, are examined. The theory and practice of negotiations are studied, and opportunities to practice negotiation techniques to achieve a fair and reasonable contract price are given. Emphasis is on practice in preparing negotiation positions through analysis of cases containing detailed cost and pricing data. Ethical decision making throughout these processes is addressed.

ASCM 629 Strategic Purchasing and Logistics (3)
An investigation of issues and methodologies related to strategic purchasing and logistics. Topics include the ethics, social responsibility, and accountability considerations in procurement, logistics, and contract management. Discussion also covers the professional development of staff, just-in-time management, electronic data interchange, vendor assessment and development, pricing and negotiation, and international procurement issues.

ASCM 630 Commercial Transactions in a Technological Environment: Law, Management, and Technology (3)
Recommended: ASCM 627. A presentation of the legal issues and management methodologies related to commercial transactions in a technological environment. Topics include the law, ethics, accountability, and contract management considerations in the procurement of technology products and services. Discussion also covers commercial sales transactions, government commercial item acquisition, private and government contracts for services, assignment and protection of proprietary rights in technology products, technology transfers, and international contractual issues in the procurement of products and services. Students may receive credit for only one of the following courses: ASCM 630 or ASCM 650.

ASCM 631 Integrative Supply Chain Management (3)
Prerequisite: ASCM 629. A study of supply chain issues, techniques, methodologies, and strategies designed to enhance organizational procurement efficiency. Integrated supply chain management, as a core competitive strategy that affects the organization’s bottom line, is explored. Topics include the integration of information, supplies and materials flows across multiple supply chain channels, and how these flows can be streamlined and optimized for more efficient procurement. Discussion also covers the role of information systems and technology in supply chain management, e-commerce strategies, managing the flow of materials across the supply chain, developing and maintaining supply chain partnerships and other relationships, and future challenges in integrative supply chain management.

ASCM 632 Contemporary Logistics (3)
A study of logistical issues, techniques, methodologies, and strategies designed to enhance organizational efficiency. Topics include the total cost approach to logistics; logistical planning and implementation; logistical concepts; systems relationships and integration; demand forecasting; interplant movement; inventory management and control; order management and processing; packaging; plant and warehouse selection; production scheduling; traffic and transportation management; warehouse and distribution management; recycling; and other logistical strategies, techniques, and methodologies.

ASCM 650 Legal Aspects of Contracting and Commercial Transactions (6)
A study of the law relevant to commercial, governmental, and international purchasing, contracting, and other legal transactions. Focus is on agency law, contracts, sales, torts, antitrust, ethics, and accountability. Discussion covers contract management considerations in the procurement of products and services. Topics include commercial sales transactions, government commercial item acquisition, private and government contracts for services, assigning and protecting propriety rights in technology products, technology transfers, and international contractual issues in the procurement of products and services. The Federal Acquisition Regulation (FAR) and American Bar Association Model Procurement Code for state and local government are investigated. The authority of purchasing, unauthorized purchases, rights and duties of sellers and buyers under a contract, buyer rights upon receipt on nonconforming goods, ability to terminate a sales contract, formation of government contracts, and formal dispute resolution are also addressed. Students may receive credit for only one of the following courses: ASCM 627, ASCM 630, or ASCM 650.
BIFS (Bioinformatics)

BIFS 613 Statistical Processes for Biotechnology (3)
Prerequisite: STAT 200. A study of statistical tools such as Bayesian statistics, Markov processes, and information theoretic indices and how they can be used to analyze sequence homology, the presence of motifs in sequences, gene expression, and gene regulation. Topics include information content, mutual information, long-range correlation, repeats, Fourier analysis, and linguistic methods.

BIFS 614 Data Structures and Algorithms (3)
An introduction to the definitions, implementations, and applications of the most basic data structures used in bioinformatics. Basic formalism and concepts used in algorithm design and the analysis of algorithms are also introduced. The relative efficiency of the algorithms is estimated by application of these concepts to biological data analysis. Algorithms and data structures discussed include those for database searches, motif finding, sequence alignment, gene prediction, and microarray analysis.

BIFS 617 Advanced Bioinformatics (3)
Prerequisites: USCP 635 and UCSP 636 (or equivalents). An overview of basic programming concepts for performing analyses of biological data. Concepts covered include software development life cycle, data types and data representation, arithmetic and logical operations, conditional execution, iteration, functions, and arrays. An overview of basic data structures is also provided. Emphasis is on bioinformatics pipeline development, automation of data analysis, and building bioinformatics applications using a high-level programming language.

BIFS 618 Java for Biotechnology Applications (3)
Prerequisite: BIFS 617. A study of basic concepts in Java and object-oriented programming in bioinformatics application development. Emphasis is on web-based, graphical, and database-driven application design. Review covers the function and design of some Java-based bioinformatics tools. Some commonly used libraries in the BioJava project are introduced, and developments of reusable modular application objects are examined. Basic problem-solving skills in the field of biotechnology using Java programming are developed through practical projects.

BIFS 619 Systems Level Approaches in Bioinformatics (3)
Prerequisite: BIFS 617. A study of the bioinformatic techniques used in “omics” (genomics, proteomics, etc.) experiments. Focus is on analyzing experiment protocols, comparing the tools used for these experiments, and interpreting the data resulting from the experiments.

BIOT (Biotechnology Studies)

BIOT 601 Introduction to Molecular Biology (3)
A thorough grounding in the fundamentals of biology, including a broad review of the life sciences with emphasis on molecular biology. Topics include the basic concepts and processes of cell biology, molecular biology, and immunology. The components of a cell, the processes occurring in a single cell, and the functioning of a multicellular organism are explained. Discussion also covers the use of model organisms to understand basic and applied biology.

BIOT 630 Introduction to Bioinformatics (3)
An introduction to bioinformatics. Emphasis is on the interpretation of data. Topics include new, sophisticated DNA, RNA, and protein sequence analyses and pattern recognition and DNA computing, as well as more traditional mathematical modeling (using Bayesian probability and basic algorithms, machine learning and neural networks, and Markov models and dynamic programming). Discussion also covers the analysis of tridimensional structures, phylogenetic relationships, and genomic and proteomic data.

BIOT 640 Societal Issues in Biotechnology (3)
An examination of current societal issues in biotechnology from several perspectives. Topics include the commercialization of biotechnology; biohazards; managerial views of legal issues and bioethics; the need for public scrutiny; environmental and cultural issues; and the role of governmental regulatory agencies in researching, developing, and commercializing biotechnology. An overview of the early history and modern developments of biotechnology is provided.

BIOT 643 Techniques of Biotechnology (3)
A comprehensive review of current techniques in biotechnology research and applications. The development and use of some techniques are placed in historical context. Discussion covers techniques used in genomics, transcriptomics, and proteomics and the applications of these techniques. Current plant and animal transformation methods are explained. High-throughput technologies, including sequencing, real-time RT-PCR, SAGE, and microarrays, are explored. Topics also include therapeutic applications of biotechnology, such as gene therapy, stem cell technology, and RNA interference. Emerging technologies in this field are introduced.
BIOT 645 Bioprocessing and the Business of Biotechnology (3)
A detailed exploration of the business of biotechnology, its structure and operation, and the science upon which this relatively new global industry sector was founded. Discussion covers a wide range of biotechnology applications, from biopharmaceuticals to biofuels, and the technical advances behind them. Focus is on methods and economics of bioprocessing and unique aspects of the funding, alliances, and global models used in the business of biotechnology.

BIOT 670 Capstone in Biotechnology (3)
Prerequisite: 30 credits of program coursework, including all core courses. The application of knowledge gained through the program to projects focused on specific aspects of biotechnology management, biodefense, regulation, and bioinformatics. The projects, solicited from industry, academia, and government, address current problems faced by the organization. Focus is on demonstrating research, analytical, oral and written communication, teamwork, and leadership skills as well as on developing new skills through a semester-long project that culminates in the development of a strategic product.

BSBD (Biosecurity and Biodefense)

BSBD 640 Agents of Bioterrorism (3)
An examination of the probable weapons of biowarfare, including biological, chemical, and nuclear weapons, from several perspectives. Topics include their mechanism of action, biological impact, detection and recognition, epidemiology, and treatment. Their potential dangers and effectiveness are evaluated, and strategies for defense against attacks by such weapons are investigated. Discussion covers the bioethical challenges of antibioterror research.

BSBD 641 Biosecurity and Bioterrorism (3)
A review of bioterrorism, biosecurity, and government biodefense strategy, including the history and science of biological agents in agriculture and society. Discussion covers surveillance, public health preparedness, response, and recovery at the community, state, and federal government levels. Various aspects of the law, including the Posse Comitatus Act and federal and state quarantine powers, are introduced. The mental health consequences of bioterrorism are also discussed. A case study of a hypothetical biological attack is analyzed in detail.

BSBD 642 Advanced Biosecurity and Bioterrorism (3)
Prerequisite: BSBD 641. A thorough examination of special and advanced topics in bioterrorism and biosecurity issues. Topics include the hidden biological warfare programs of the 20th century; advances in biotechnology and molecular microbiology and the dilemma of dual-use research; domestic and foreign terrorist groups, including rogue states; state-of-the-art microbial forensics; ethics and civil rights; and current trends in policy development, consequence management, and public health responses to new threats to homeland security. Discussion also addresses special topics of the students’ choice. Future challenges in biosecurity are also discussed as part of a comprehensive bioterrorism exercise and the analysis of case studies of hypothetical threats.

BSBD 643 Strategies for Interagency Cooperation, Verification, and Global Countermeasures in Biodefense (6)
An in-depth study of the verification procedures used in global countermeasures and strategies. Global biosecurity and oversight is examined using real-world examples. Discussion covers the epidemiology of emerging infectious diseases as they relate to defense against threats from nonconventional sources. Topics also include the evolution and current status of the Biological Weapons Convention; the integration of responses from local, state, and multiple federal agencies; and other challenges facing public health departments, including the potential economic, political, and social impacts of bioterrorism.

BTMN (Biotechnology Management)

BTMN 632 Commercializing Biotechnology in Early-Stage Ventures (3)
(Formerly BIOT 641.) An overview of the methods for planning and organizing biotechnology ventures. The elements of a business plan are considered, as are methods for assessing various needs, such as capital, personnel, technology, and marketing. Emphasis is on approaches to marketing technology and developing joint ventures. The advantages and disadvantages of forming international ventures are weighed. Discussion also covers the importance of maintaining relations with external constituents and the need for managing public awareness. Students may receive credit for only one of the following courses: BIOT 632 or BTMN 641.
BTMN 634 Selection and Evaluation of Biotechnology Projects (3)
A study of the applications of methodologies of technology forecasting, technology assessment, project management, and data auditing to the selection and evaluation of biotechnology projects. The underlying rationale, principles, procedures, and cost effectiveness of data auditing are examined. A systems approach to performance evaluation is presented.

BTMN 636 Biotechnology and the Regulatory Environment (3)
A comprehensive review of the role of regulation in the development and commercialization of biotechnology products and services. Emphasis is on the roles of the federal government, state government agencies, international bodies, and professional groups, especially the regulatory roles of the U.S. Environmental Protection Agency, the U.S. Department of Agriculture, and the Food and Drug Administration. Discussion covers human subject protection, good laboratory practices, and good manufacturing practices.

BTRA (Biotechnology Regulatory Affairs)

BTRA 640 Preclinical and Clinical Research Design (3)
An examination of preclinical and clinical research designs. Emphasis is on identifying and addressing challenges associated with elements of good laboratory and clinical practice and qualifying and managing a laboratory for a clinical trial. Discussion covers best practices for planning research and collecting, analyzing, and reporting data from drug/device development studies.

BTRA 641 Product Life-Cycle Approval, Production, and Marketing for Devices and Drugs (3)
An in-depth study of the product life cycle for medical devices and implants and pharmaceuticals. Focus is on the various stages within the life cycle from conceptualization of a product pipeline in research and development through postmarket surveillance and production. Topics include regulatory submission, approval, production, and the postmarket environment for both drugs and devices. Challenges surrounding the approval and naming of follow-on biologics are addressed. Discussion also covers combination medicines, the stages of a drug pipeline and risk assessment at each stage, and the decreasing productivity of the drug pipeline. The role of a contract research organization in testing and approval is explained, and the nature of the support services provided to the biotechnology and devices industry is explored.

BTRA 642 Global Biotechnology Business Issues (3)
An exploration of different aspects of international pharmaceutical regulation, as outlined in the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use. Topics include international biotechnology issues, global harmonization efforts, and the cultural impact of biotechnologies. Discussion also covers domestic and international business considerations and international regulatory requirements.

BTRA 643 Practical Applications of Biotech Regulatory Affairs (6)
A capstone study of regulatory affairs related to the biotechnology industry that integrates knowledge and skills gained from previous study. Emphasis is on completion of a group project simulating the development of a drug or device throughout the product life cycle. The project is designed to demonstrate knowledge of international biotech business, ethics, and production issues and skills in making decisions regarding a wide range of regulatory issues and to provide a transition for applying these skills to applications in the biotechnology environment.

CBR (Cyber Communication and Leadership)

CBR 600 Communicating, Problem Solving, and Leading in Cybersecurity (6)
(Required for students in the cybersecurity technology, cybersecurity management and policy, and digital forensics and cyber investigation programs.) Make yourself more valuable to an employer by gaining and improving skills in communication and problem solving. Explore the field of cybersecurity by developing connections to your career aspirations, creating a professional social network presence, and using critical thinking to inform decisions. Improve and refine your skills in communication, critical thinking, quantitative reasoning, and team leadership. Hone your professional writing and oral communication skills to produce effective presentations, and become proficient with current technology.
CCA (Cloud Computing Architecture)

CCA 610 Cloud Services and Technologies (6)
Prerequisite: DCL 600. Master the concepts underlying cloud computing, cloud services, and cloud applications. Investigate and analyze the technologies and services of the cloud services industry, and distinguish between different cloud development environments. Evaluate the risk and the legal and regulatory compliance issues associated with cloud adoption while identifying the benefits of cloud infrastructure for the organization.

CCA 620 Cloud Management (6)
Prerequisite: CCA 610. Explore the shift that cloud computing has created in internal business processes. Analyze the business and management processes associated with implementing a cloud infrastructure. Address implementation issues such as accounting and budgeting, corporate buy-in, procurement and contracting, negotiating service-level agreements, and vendor management. Prepare a proposal for cloud migration in response to a request for proposal (RFP). Analyze vendor responses and prepare a cloud service contract.

CCA 630 Cloud Infrastructure Planning, Design, and Configurations (6)
Prerequisite: CCA 620. Apply the underlying concepts, standards, and technologies of cloud computing (including virtualization, cloud data management, cloud programming models, cloud analytics applications, interoperability, and portability) to the planning, design, and configuration of a cloud infrastructure. Prepare policies and documents to plan and design a cloud infrastructure successfully, including policy document, architecture plan, cloud deployment runbook, and user training plan. Perform baseline configurations on the cloud environment to satisfy business requirements.

CCA 640 Cloud Computing Implementations and Migrations (6)
Prerequisite: CCA 630. Implement and configure a cloud environment based on specifications. Analyze current workloads, migrate existing IT systems to the cloud, and configure new systems or services to enhance business operations. Manage cloud implementation to ensure successful deployment. Configure features for elasticity, availability, and scalability using industry-standard techniques, best practices, and tools.

CCA 670 Capstone: Cloud Computing Orchestration (6)
Prerequisite: CCA 640. Assume the role of a cloud computing architect. Implement advanced features of the cloud platform, including auditing and logging, cloud orchestration, service catalog, and cloud metering and billing. Investigate, plan, and implement these features on a specific cloud platform. Prepare a cloud portfolio report based on cloud migrations and implementations completed in the program.

CJMS (Criminal Justice Management)

CJMS 600 Critical Analysis of the Criminal Justice System (3)
An analysis of the U.S. criminal justice system. Topics include the role of criminal justice agencies and personnel in the prevention and response to crime, as well as the interrelationship of the major components of the U.S. criminal justice system from a manager’s perspective.

CJMS 610 Perspectives in Law Enforcement Management (3)
A study of the law-enforcement philosophies and techniques to reduce crime that are commonly applied at the organizational level. Topics include the politics of policing, police/community relations, police research, professionalization of personnel, and emerging problems in policing from a domestic and international perspective.

CJMS 620 Issues in Correctional Administration (3)
Prerequisites: CJMS 600 and CJMS 610. An in-depth study of current challenges for managers in correctional environments. Topics include the privatization of corrections, intelligence sharing, re-entry and community corrections, security threat groups, assessment techniques and empirical evaluations of treatment methods, special populations, growth rates, the political environment, and interagency and community cooperation.

CJMS 630 Seminar in Security Management (3)
Prerequisites: CJMS 600 and CJMS 610. A study of the management of security operations within a private setting. Discussion covers vulnerability assessment; emergency planning; interagency cooperation; threat assessment; technology use; and information gathering, sharing, and storing. Topics also include personnel management, budgeting, reporting requirements, and current trends.

CJMS 640 Criminal Justice Intelligence Systems and Approaches (3)
Prerequisites: CJMS 600 and CJMS 610. An in-depth examination of the principles that guide the gathering and sharing of intelligence in the United States. Emphasis is on the interoperability between crime-fighting agencies in the criminal justice system. Topics include analytic methodologies, interview and interrogation techniques, open-source and proprietary data sources, criminal organization analysis, criminal conspiracy, enterprise theory, trial testimony, and witness protection.
CJMS 650 Legal Aspects Within the Criminal Justice System (3)
Prerequisites: CJMS 600 and CJMS 610. An introduction to the impact of constitutional and criminal law on managerial responsibilities within the criminal justice system. Topics include pivotal historic and current legal cases and their application to methods of prevention, as well as reaction to crime in the United States.

CJMS 660 Issues in Criminal Justice Leadership (3)
Prerequisite: 30 credits of coursework, including all core and criminal justice management specialization courses except MGMT 670. A discussion of case studies involving successful leaders in the criminal justice system. Analysis covers the various characteristics and leadership styles that have proven most effective in the profession. Various theories, models, historical examples, and practical applications are reviewed. Senior criminal justice leaders discuss issues via videoconferencing. Topics include ethics and virtue in criminal justice; navigating the political environment (e.g., being politically savvy without being political); staff development; and labor relations, media relations, and working effectively with various advocacy groups.

COURSE DESCRIPTIONS

CMP (Cybersecurity Management and Policy)

CMP 610 Foundations in Cybersecurity Management (6)
Prerequisite: CBR 600. Apply the principles of cybersecurity management. Analyze and draft cybersecurity policies; create practical approaches to risk analysis; practice techniques to prevent intrusions and attacks that threaten organizational data; and participate in exercises in cryptography, ethical hacking, and crisis management.

CMP 620 Cybersecurity Governance (6)
Prerequisite: CMP 610. Examine important human aspects of cybersecurity, such as the motivations for cyber crimes, hacker psychology, and hacker culture. Explore the legal and regulatory environments related to local, state, national, and international cybersecurity concerns. Formulate policy and conduct analysis to prevent intrusions, attacks, and threats to organizational data.

CMP 630 Risk Management and Organizational Resilience (6)
Prerequisite: CMP 620. Apply critical thinking and analysis to determine potential risks to the enterprise. Investigate the application of systems, tools, and concepts to minimize risk in an organization’s cyberspace initiatives. Explore how to identify threats, conduct vulnerability assessments, and perform risk assessment and management. Examine system development and application assurance from a holistic viewpoint that spans the cyberspace landscape. Gain an understanding of the value provided by regulatory, policy, and compliance guidelines in addition to pure technology options.

CMP 640 Cybersecurity Program Development (6)
Prerequisite: CMP 630. Create a cybersecurity program using the enterprise as a framework. Examine the role of architectural methodology as part of the complete cybersecurity program. Consider the cyber threat landscape and the strategies related to incident response, awareness, and the mobile environment and its impact on government and industry. Explore identity theft, network security, cyber strategy development, and mobile device management.

CST (Cybersecurity Technology)

CST 610 Cyberspace and Cybersecurity Foundations (6)
Prerequisite: CBR 600. Gain knowledge of the foundations of cybersecurity, and apply cyber methodologies to cyber architectures, services, protocols, algorithms, hardware and software components, and programming languages. Become familiar with the important role that business continuity planning, security management practices, security architecture, operations security, and physical security play in cybersecurity. Explore the impact of cyberterrorism and national security on cybersecurity. Gain hands-on, real-world experience with state-of-the-art tools and technologies in a lab-intensive environment.

CST 620 Prevention of Cyber Attack Methodologies (6)
Prerequisite: CST 610 or CYB 610. Explore the theories and practices related to the prevention of cyber attacks. Design, apply, and analyze technological solutions that address countermeasures, encryption, network access control methods, firewalls, intrusion detection/prevention, and secure systems development. Practice techniques such as software assurance, verification, and validation; virtual network and cloud computing security techniques; and physical security techniques. Examine the nation’s complex critical infrastructure industries. Use state-of-the-art tools and technologies in a lab-intensive environment that provide hands-on, real-world experience.
CST 630 Advanced Cyber Exploitation and Mitigation Methodologies (6)
Prerequisite: CST 620. Practice intrusion detection and prevention, exploitation, and mitigation in cyberspace. Employ technological solutions that identify, resolve, prevent, and mitigate cyber attacks. Utilize network security techniques, monitoring, auditing, intrusion detection and prevention, and ethical penetration testing. Use state-of-the-art tools and technologies in a lab-intensive environment that provide hands-on, real-world experience.

CST 640 Digital Forensics Technology and Practices (6)
Prerequisite: CST 630. Gain proficiency with the tools and technologies commonly used in forensic examinations, and utilize best practices. Explore means of securing and validating evidence, including digital media and physical memory, as well as ways of recovering artifacts and analyzing, reporting, and presenting results in both criminal and civil situations. Gain experience with mobile forensic analysis. Students may receive credit for only one of the following courses: CST 640 or DFC 620.

CYB (Cybersecurity)

CYB 670 Capstone in Cybersecurity (6)
Prerequisite: CST 640, DFC 640, or CMP 640. Assume the role of a cybersecurity professional by examining current issues in cybersecurity management, including enterprise risk management, vulnerability assessment, threat analysis, crisis management, security architecture, security models, security policy development and implementation, security compliance, information privacy, identity management, incident response, disaster recovery, and business continuity planning, particularly in the health, banking, and finance sectors.

DATA (Data Analytics)

DATA 610 Decision Management Systems (6)
An examination of the decision-making process in large organizations and the technologies that can enhance data-driven decision making. Focus is on the underlying framework of good decision making. Operational decisions are studied as reusable assets that can be automated through the creation of business rules. Discussion covers how data can add analytic insight to improve decisions. Best practices for long-term success of an analytics project (in terms of project management and communications) are also covered with an emphasis on the Cross-Industry Standard Process for Data Mining (CRISP-DM) methodology.

DATA 620 Data Management and Visualization (6)
Prerequisite: DATA 610. A presentation of the fundamental concepts and techniques in managing and presenting data for effective data-driven decision making. Topics in data management and design include data design approaches for performance and availability, such as data storage and indexing strategies; data warehousing issues, such as requirement analysis, dimensional modeling, and ETL (extract, transform, load) processing; and metadata management. Topics in data visualization include understanding data types; data dimensionalities, such as time-series and geospatial data; forms of data visualization, including heat maps and infographs; and best practices for usable, consumable, and actionable data/results presentation.

DATA 630 Machine Learning (6)
Prerequisite: DATA 620. A practical survey of several modern machine-learning techniques that can be applied to make informed business decisions. Discussion covers supervised and unsupervised learning techniques (including naive Bayes, regression, decision trees, neural networks, nearest neighbor, and cluster analysis) and how each uses past data to find underlying patterns useful for prediction, classification, and exploratory data analysis. Significant tasks, including handling of missing data, evaluating classifiers, and measuring precision, are addressed in real-world applications. Major software tools are used to apply machine learning methods in a wide range of domains such as healthcare, financial, marketing, and government.

DATA 640 Predictive Modeling (6)
Prerequisite: DATA 630. An introduction to advanced concepts in predictive modeling and techniques to discover patterns in data, identify variables with the most predictive power, and develop predictive models. Advanced statistical and machine learning algorithms (such as support vector machines, regression, deep learning, and ensemble models) are used to develop, assess, compare, and explain complex predictive models. Topics include high-performance modeling, genetic algorithms, and best practices for selecting methods and tools to build predictive models. Major software tools are used to apply predictive modeling in a wide range of domains for improved decision making in real business situations.
DATA 650 Big Data Analytics (6)
Prerequisite: DATA 640. An introduction to concepts, approaches, and techniques in managing and analyzing large data sets for improved decision making in real business situations. Topics include text analytics, sentiment analysis, stream analytics, artificial intelligence, and cognitive computing. Discussion also covers how to identify the kinds of analyses to use with big data and how to interpret the results. Advanced tools and basic approaches are used to query and explore data using Hadoop Platform and in-memory analytical tools like Spark ML.

DATA 670 Data Analytics Capstone (6)
Prerequisite: DATA 650. Completion of a major analytics project designed to integrate knowledge and skills gained from previous coursework and provide a complete analytics experience, including problem scoping (framing), data set preparation, comprehensive data analysis and visualization, and predictive model development. Several peer-reviewed presentations are included to enhance the ability to “tell the story” and explain project approach and results. Projects are selected from student organizations, special government agency requests, or other faculty-approved sources. The project culminates in a complete analytics report and presentation.

DBA (Doctoral Studies in Business Administration)

DBA 600 Foundations of Doctoral Studies (3)

DBA 800 Interpreting and Translating Management Theory in Practice (6)
Evaluate management theories to explain organizational operations in relation to forces that act at the level of the individual, group, and society. Connect these explanations within practitioner systems, and analyze and associate management theories with practical management strategies.

DBA 810 Research as a Tool for Management Decision Making (6)
Develop the capability to review, evaluate, and perform management research for decision making, and critically interpret both qualitative and quantitative research methodologies. Apply tools of business research to advise an organization in decision making. Refine skills to effectively communicate management research findings to practitioners.

DBA 820 Evidence-Based Research Methods (6)
Acquire and appraise evidence using sophisticated bibliographic search strategies to inform management decision making. Defend qualitative data analysis research choices. Apply evidence-based solutions to an organization, and assess their effectiveness. Develop a plan to use assessments to iteratively improve solutions.

DBA 830 Data Analytics in Practice (6)
Review and refine quantitative skills essential for analytical leadership. Explore methods of data mining, forecasting, and predictive models to inform and enable evidence-based decision making, and investigate the data environment in an organization. Assess an enterprise’s current capabilities to develop recommendations for a stronger business intelligence climate.

DBA 840 Designing Evidence-Based Management Solutions (6)
Prepare advice for an organization seeking management solutions to a specific problem. Analyze and evaluate organizational context, select appropriate management tools, and develop solutions. Employ project management methods, and collaborate effectively with the team face-to-face and online. Produce written and oral presentations of results and recommendations to organizational stakeholders.

DBA 850 Producing Original Management Ideas That Influence: Publishing and Conferencing (6)
Identify a management problem, create an evidence-based research approach to solve the problem, and execute it. Present results at a scholarly or practice conference, and submit written results in the form of a professional quality article to a scholarly or practice journal.

DBA 860 Producing Actionable Knowledge: Dissertation Problem Statement and Literature Review (4)
Design an evidence-based research approach to investigate the dissertation management problem. Identify the scope of the problem, construct a suitable research question, and examine the scholarly literature that provides a credible and insightful explanation of the primary concepts and relationships surrounding the problem. Produce the dissertation problem statement and literature review chapter.

DBA 870 Producing Actionable Knowledge: Dissertation Methodology and Analysis (4)
Design an evidence-based research approach to investigate the dissertation management problem. Collect relevant data to answer the research question, and analyze and interpret the data to consider how they inform the research question. Produce the dissertation methods and results chapters.
DBA 880 Producing Actionable Knowledge: Management Implications from Dissertation Research (4)
Complete the dissertation process. Formulate and explain the implications and value of the research findings for management practice, and make specific recommendations to improve management practice. Present and defend the dissertation research successfully, and publish it.

DBA 899 Continuing Doctoral Matriculation (1)
Continue dissertation work.

DCL (Decisive Communication and Leadership)

DCL 600 Decisive Thinking, Communicating, and Leading (6)
(Required for new graduate students.) Prepare for academic and professional success by developing skills that employers want in their employees. Explore your area of study to learn how it connects with your career aspirations, create a professional social network presence, and use critical thinking to inform decisions. Improve and refine your skills in communication, critical thinking, quantitative reasoning, and team leadership. Hone your professional writing and oral communication skills to produce effective presentations. Become proficient with spreadsheets, collaboration tools, and other professional software.

DBST (Database Systems Technology)

DBST 651 Relational Database Systems (3)
An introduction to relational databases, one of the most pervasive technologies today. Presentation covers fundamental concepts necessary for the design, use, and implementation of relational database systems. Focus is on basic concepts of database modeling and design, the languages and facilities provided by database management systems, and techniques for implementing relational database systems. Topics include implementation concepts and techniques for database design, query optimization, concurrency control, recovery, and integrity. A foundation for managing databases in important environments is provided. Assignments require use of a remote-access laboratory.

DBST 652 Advanced Relational/Object-Relational Database Systems (3)
Prerequisite: DBST 651. A continuation of the study of relational database systems, exploring advanced concepts. Topics include logical design, physical design, performance, architecture, data distribution, and data sharing in relational databases. The concepts of object-relational design and implementation are introduced and developed. Assignments require the use of a remote-access laboratory.

DBST 653 Advanced Data Modeling (3)
Prerequisite: DBST 651. An introduction to fundamental concepts and techniques for successfully designing databases for structured and unstructured data. Topics include database quality techniques and relational, dimensional, and NoSQL modeling, as well as best practices on selecting methods and modeling tools to design the database models (relational, dimensional, wide column, document, and graph/RDF). Assignments require the use of a remote-access laboratory.

DBST 660 Advanced Data Mining (3)
Prerequisite: DBST 651. An overview of the data-mining component of the knowledge discovery process. Data-mining applications are introduced, and algorithms and techniques useful for solving different problems are identified. Topics include the application of well-known statistical, machine learning, and database algorithms, including decision trees, similarity measures, regression, Bayes theorem, nearest neighbor, neural networks, and genetic algorithms. Discussion also covers researching data-mining applications and integrating data mining with data warehouses.
DBST 668 Database Security (3)
Prerequisite: DBST 651. An overview of both the theory of and applications for providing effective security in database management systems. Topics include conceptual frameworks for discretionary and mandatory access control; data integrity, availability and performance; secure database design; data aggregation and inference; secure concurrency control; and secure transactions processing. Models for multilevel secure databases for both relational and object-relational databases are analyzed. Assignments focus on database security concepts and require use of a remote-access laboratory.

DBST 670 Database Systems Administration (3)
Prerequisites: DBST 652, DBST 663, DBST 665, DBST 667, and DBST 668. An introduction to the knowledge, skills, and tools needed to successfully administer operational database systems. The conceptual and operational tools for analysis and resolution of problems such as performance, recovery, design, and technical issues are provided. Tools used to assist in the administration process are also included.

DEPM (Distance Education Policy and Management)

DEPM 604 Management and Leadership in Distance Education and E-Learning (3)
Prerequisites: DETT 607 and DETC 620. An introduction to the organization, management, and administration of distance education and e-learning training programs and systems. Topics include management theory and practice, organizational behavior and change, leadership roles and styles, and planning and policy. Discussion covers education and training in academic and corporate settings and the knowledge and skills necessary for a distance education practitioner to function effectively in either type of environment. Assignments include individual and group case-study analyses, brief essays, and literature searches related to distance education and e-learning leadership.

DEPM 622 The Business of Distance Education and E-Learning (3)
Prerequisites: DEPM 604 and DETT 621. An examination of the highly competitive global business environment for distance education and training. Topics include the supply and demand of education services in emerging and existing markets, the competitive positioning of organizations, and the increasing reliance on collaborations. Emphasis is on the skills distance education managers need in planning and developing cost-effective programs, products, and services that are targeted to specific markets.

DETC (Distance Education Technology)

DETC 620 Training and Learning with Multimedia (3)
Prerequisites: OMDE 606 and DETT 611. An overview of the use of digital media in a variety of educational settings, designed to identify properties, strengths, and weaknesses of multimedia in different learning contexts. The basic psychological processes of perception, understanding, and learning with multimedia are introduced. Focus is on multimedia and instructional design for online learning systems, such as learning management systems or stand-alone learning objects. Hands-on experience with several multimedia applications is provided. Topics include collaborative learning technologies, open educational resources, the impact of multimedia on learning outcomes, methods of multimedia evaluation, quality assurance, and project management of e-learning initiatives.

DETT (Distance Education in Teaching and Training)

DETT 607 Instructional Design and Course Development in Distance Education and E-Learning (3)
Prerequisites: OMDE 606 and DETT 611. An examination of the instructional design process, its history and place in today's course development efforts, and the use of instructional design components in practice. Emphasis is on the nature of learning and the requirements for effective instructional design in online and blended environments. The theoretical underpinnings of learning are explored and applied to the design of a prototype classroom. Management issues surrounding course and curriculum development efforts are discussed, and a comprehensive project plan is developed for design implementation.

DETT 611 Library and Intellectual Property Issues in Distance Education and E-Learning (3)
Prerequisites: OMDE 603 and OMDE 608. An overview of the development and delivery of digital resources for distance education. Discussion covers the intellectual property issues that affect the use of copyrighted works in distance education, the development and delivery of library resources online to a faculty and student population, and the future of digital information delivery and the impact of digital rights management (DRM) technologies and social networking.
COURSE DESCRIPTIONS

DETT 621 Online Learning and Development in the Workplace (3)
Prerequisites: DETT 607 and DETC 620. An examination of distance learning and professional development in the business sector. Discussion covers various issues, problems, and solutions related to distance learning and professional development in the workplace. Topics include knowledge management, performance improvement, delivery of learning and development, and evaluating learning and development.

DFC (Digital Forensics and Cyber Investigations)

DFC 610 Cyberspace and Cybersecurity Foundations (6)
Prerequisite: CBR 600. Gain knowledge of the foundations of cybersecurity, and apply cyber methodologies to cyber architectures, services, protocols, algorithms, hardware and software components, and programming languages. Become familiar with the important roles that business continuity planning, security management practices, security architecture, operations security, and physical security play in cybersecurity. Explore the impact of cyberterrorism and national security on cybersecurity. Gain hands-on, real-world experience with state-of-the-art tools and technologies in a lab-intensive environment.

DFC 620 Digital Forensics Technology and Practices (6)
Prerequisite: DFC 610 or CYB 610. Gain proficiency with the tools and technologies commonly used in digital forensic examinations, and utilize best practices. Explore procedures for securing and validating evidence, including digital media and physical memory, as well as recovering artifacts and analyzing, reporting, and presenting results in both criminal and civil situations. Gain experience with mobile forensic analysis. Students may receive credit for only one of the following courses: CST 640 or DFC 620.

DFC 630 Digital Forensic Response and Analysis (6)
Prerequisite: DFC 620. Utilize tools and techniques in digital forensic investigations involving workstation and mobile platforms. Practice forensic artifact reconstruction and recovery from the file systems of different operating systems, including Windows, Linux, and Macintosh.

DFC 640 Advanced Forensics (6)
Prerequisite: DFC 630. Assume the role of a digital forensics professional. Collect and preserve network, server, and cloud-based evidence, and apply analysis techniques. Solve technical challenges such as evidentiary volume and encryption, as well as nontechnical challenges such as jurisdiction and distance in situation-based response scenarios and activities.

DMCC (Doctoral Studies in Community College Policy and Administration)

DMCC 800 Foundations of Management Theory (6)
A comprehensive foundation in the history of management and the structure and function of organizations. A new way of understanding and managing operational and strategic issues in public and private organizations in the face of accelerating social, economic, and technological changes is provided. Topics include organizational theory, strategic thinking and strategic management, theories of decision making, leadership, organizational culture, and management in a postindustrial society. Problem-solving, application, and evaluation skills are used to analyze the theories and practices of current and emerging organizational challenges and opportunities. The goal is to be able to critically assess the ideas of others and defend one’s own ideas through the application of scholarship. Students who complete DMCC 800 cannot receive credit for DMGT 800.

DMCC 810 Leadership and Change (6)
A study of leadership—not just for survival but for sustainability—in environments where external pressure for change is the dominant feature. Discussion examines change and leadership issues in varied industries and one’s own organization by identifying and analyzing theories and concepts, assessing the applicability of classic works and current perspectives, testing ideas using case studies, and developing various scenarios and strategies. Topics include the knowledge and abilities, such as improvisation and reinvention, needed for managing change; the roles and skills needed at all levels for leading in new organizational models involving virtual teams; and the impact of change (particularly frequent change) on individuals and organizations. The goal is to recognize the link between leadership, change, and organizational resilience and apply the lessons. Students who complete DMCC 810 cannot receive credit for DMGT 810.

DMCC 821 Higher Education Policy (6)
An examination of national, state, and local education policy formation and an analysis of the educational policy process, including antecedents, the framing of problems and solutions within policies, policy implementation, and policy consequences in the context of the community college environment. Topics include financial stewardship, enrollment management, external stakeholder relationships, educational outcomes, market-driven innovation and change, organizational development, student-centric culture, and technology leadership. Key leadership competencies, including strategic planning, decision making, resource management, communication, collaboration, and advocacy, are considered as they support effective policy development.
DMCC 830 Research Methods (6)
An applied study of how to design, interpret, and critique both quantitative and qualitative research. Methods are grounded in the philosophy of science to provide a solid foundation that supports the identification and analysis of researchable questions. At least one qualitative and one quantitative methodology is studied. Assignments include short analyses representative of the different methodological traditions. Students who complete DMCC 830 cannot receive credit for DMGT 830.

DMCC 841 Institutional Assessment in the Community College Environment (6)
An exploration of the criteria, indicators, and processes by which institutions define and evaluate their effectiveness and use data to improve the quality of programs and services. Emphasis is on the assessment of student learning outcomes, measurement of student success (e.g., progress through developmental courses, persistence, transfer, and graduation), program evaluations, and the role of regional accreditation. Ways in which community college leaders can engage in a broad array of organizational and administrative activities to build cultures of evidence are also examined.

DMCC 851 Community College Advocacy, Advancement, and Entrepreneurship (6)
An exploration of the process by which community college leaders advocate for their students and organization in the face of the challenges and opportunities in higher education today and the skills needed for successful advocacy. Topics include the use of argumentation, data, and presentation skills to develop and effectively present cases for support at local, state, and federal levels. Discussion also covers the world of community college fund-raising and the potential of entrepreneurial ventures to help close the funding gap. Focus is on developing the skills to advocate and find support for equity and student success.

DMCC 890 Dissertation Part I (4)
The identification and refinement of the dissertation topic. Focus is on identifying research questions relevant to the chosen topic, conducting a review of the literature on that topic, and developing a conceptual model and associated hypotheses.

DMCC 891 Dissertation Part II (4)
The selection of the dissertation’s research methodology to evaluate the conceptual model and hypotheses. Focus is on identifying appropriate sources of data, collecting and analyzing the data in the context of the chosen methodology, and drawing conclusions regarding the conceptual model and associated hypotheses.

DMCC 892 Dissertation Part III (4)
Revision and completion of the dissertation. Steps covered include developing all necessary supplemental materials, proofing and formatting the dissertation, and gaining faculty approval for final submission.

EDTC (Education: Instructional Technology)

EDTC 600 Foundations of Technology in Teaching and Learning (3)
An introduction to the integration of technology in schools, focusing on how instructional technology affects and advances K–12 learning. Topics include principles of integrating technology to strengthen standards-based curricula, instruction, and assessment; selection of software and other technological materials; uses of technology for collaboration with school-related audiences; issues of digital equity and ethics; and strategies for using digital technology with special needs populations.

EDTC 605 Teaching Information and Media Literacies in the Digital World (3)
Prerequisite or corequisite: EDTC 600. A study of the expanding types of literacies required for teaching and learning in K–12 schools, with a concentration on digital information and media literacies. Analysis of core information literacy skills serves as the foundation for a discussion of the effects of current and emerging media on the evaluation and creation of knowledge. Topics include the effective use of online databases and search engines to access information and media resources; application of the research process; information and media literacy skills needed for reading and navigating the web environment and creating new content; options for age-appropriate, subject-specific research assignments that involve K–12 students in project-based learning; and issues related to ethical uses of information and digital citizenship across literacies.

EDTC 610 Web-Based Teaching and Learning: Design and Pedagogy (3)
Prerequisite: EDTC 600; prerequisite or corequisite: EDTC 605. An examination of the theory that informs web-based education and the implementation of best pedagogical practices. Challenges related to the original design and adaptation of effective web-based instruction are explored. Focus is on developing the knowledge and skills to create multiple types of web-based assignments and units for K–12 students using web authoring software. Topics include constructing evaluation tools to assess K–12 student learning outcomes across different content areas and grade levels. Strategies for effective online group collaboration are discussed and implemented.
EDTC 615 Using Technology for Instructional Improvement: Research, Data, and Best Practices (3)
Prerequisite: EDTC 605; prerequisite or corequisite: EDTC 610.
Overview of systematic planning, development, and evaluation of media-rich classroom instruction. Research and assessment data are analyzed for their use in promoting student learning and technology integration. Discussion covers collecting, summarizing, analyzing, and applying assessment data to classroom improvement, as well as techniques for organization and participation in a grade-level or school-wide collaborative team.

EDTC 620 Technology in K–12 Education: Synchronous, Asynchronous, and Multimedia Technologies (3)
Prerequisite: EDTC 610; prerequisite or corequisite: EDTC 615.
An overview of the administration of technology in K–12 school systems. The impact of technology in schools is explored from a variety of perspectives, including access; planning; budgeting; maintenance; and life-cycle management at classroom, school, and district levels. Criteria for making financial and instructional decisions about technology are developed and evaluated. Emphasis is on knowledge and skills teachers can use to acquire classroom technology, including grant writing and public/private-sector partnerships.

EDTC 625 Hardware and Software in Instructional Development (3)
Prerequisite: EDTC 615; prerequisite or corequisite: EDTC 620.
A study of the application of hardware and software programs in K–12 classroom and school settings. Various operating systems and network issues commonly found in schools are examined. Topics include a wide range of instructional software packages related to specific subjects and grade levels, assistive technologies appropriate for different student needs, and free Web 2.0 tools for classroom instruction and professional growth. Discussion also covers hardware and software choices compatible with curricular goals and troubleshooting strategies—both technical and instructional—for teachers and students. Research on specific hardware and software is analyzed. Emerging technology-enabled curricular innovations are also examined.

EDTC 630 Administration of Technology Initiatives: Planning, Budgeting, and Evaluation (3)
Prerequisite: EDTC 620; prerequisite or corequisite: EDTC 625.
An overview of the administration of technology in K–12 school systems. The impact of technology in schools is explored from a variety of perspectives, including access; planning; budgeting; maintenance; and life-cycle management at classroom, school, and district levels. Criteria for making financial and instructional decisions about technology are developed and evaluated. Emphasis is on knowledge and skills teachers can use to acquire classroom technology, including grant writing and public/private-sector partnerships.

EDTC 640 Leading Technology Change in Schools (3)
Prerequisite: EDTC 625; prerequisite or corequisite: EDTC 630.
An overview of the theories, approaches, and strategies that help teachers assume leadership roles in implementing technology change in K–12 schools. Topics include the role of change agents in K–12 schools, strategies to meet the needs of technologically unskilled teachers, tools and techniques to respond to diverse competency levels, and various training models and approaches for adult learners. Structured observation is employed to critically assess the effectiveness of various technology training formats. In a guided project, a technology-training seminar is designed, developed, and implemented for delivery to colleagues.

EDTC 645 Integration of Technology: Global Perspectives (3)
Prerequisite: EDTC 630; prerequisite or corequisite: EDTC 640.
Exploration of global perspectives on advancing K–12 student learning through technology. Investigation covers how schools design innovative units and programs that take full advantage of technology’s ability to reach beyond national borders and promote global understanding and how various nations approach the challenge of technology integration in schools. Focus is on evaluating best practices in the United States and other nations and on analyzing the role of policy in shaping the way resources are deployed to advance effective technology integration. Projects include designing models for integrating global understanding into curriculum and instruction, developing case studies of technology integration in various countries, and evaluating relevant research.

EDTC 650 Teaching and Learning in K–12 Virtual Schools (3)
Prerequisite: EDTC 640 or DETC 620.
An introduction to K–12 distance education, including the policies and structures of K–12 virtual schools, teaching and course development strategies appropriate for K–12 online courses, and current issues involved in the K–12 virtual enterprise. Emphasis is on K–12 schools that offer courses over the internet. Discussion covers principles that apply to other forms of K–12 distance education, such as television and correspondence courses. Topics include different models of current K–12 virtual schools; district, state, and national regulations governing these schools; the role of parental involvement and student support systems; social and collaborative aspects of learning at a distance; and training and mentoring of online K–12 teachers. Trends in international K–12 virtual schools are compared with those in the United States. The effectiveness of virtual schools and courses at the elementary and secondary school level is explored.
EDTC 670 Integrative Capstone Project (3)
(Intended as the final course in the MEd program.) Prerequisites: First nine courses in the program; may be taken with EDTC 645 or EDTC 650. A self-directed project in which teachers collaborate with colleagues within or across grade levels or departments to incorporate innovations into their curricula. A portfolio is built to demonstrate the development, implementation, and outcomes of the project. Study is designed to provide teachers the opportunity to apply previous knowledge and skills gained from previous coursework.

EDTP (Education: Teacher Preparation)

EDTP 600 Foundations of Teaching for Learning (6)
Preparation for effective entry into the classroom as a teacher. Topics include teaching in the contemporary school; human development; approaches to learning, diversity, and collaboration beyond the classroom; learners with exceptional needs; curriculum, instruction, and assessment; teaching in the content area; and synthesis and application. Course materials and assignments focus on documents created or typically utilized by school systems and incorporate current school district initiatives. School district personnel may participate as guests.

EDTP 635 Adolescent Development and Learning Needs (6)
Prerequisite or corequisite: EDTP 600. Preparation to support the unique development of adolescents from various backgrounds, with varying beliefs and abilities. Learners are examined from the standpoint of developmental characteristics; social, cultural, racial, and gender affiliation; socioeconomic status; religious influences; learning styles; special needs; and exceptionality. Adolescents are also examined from biological, psychological, cognitive, and social perspectives; within the tapestry of their family and community; and through the influences of societal and cultural norms. Discussion covers theories and concepts associated with human growth and development across the lifespan, focusing on the typical and atypical development of the adolescent.

EDTP 639 Reading and Multiple Literacies (6)
(Formerly EDRS 610.) Prerequisites: EDTP 600 and EDTP 635. A study of the essentials of literacy for middle and high school classrooms, including design principles for guided inquiry, self-directed learning, collaboration, and effective use of media to meet the needs of diverse learners in the 21st century. Discussion covers purposes and types of reading, assessment, cognitive strategies in reading, reading strategy instruction for constructing meaning from text, and intrinsic and extrinsic motivational strategies. Topics include essential competencies for teaching and learning content area reading and the new literacies and for applying and adapting them to diverse learners and learners with exceptionalities. Competencies developed include use of evidence-based instructional strategies, formative and summative assessment, critical thinking, technology as a tool for learning, and literate environments. Focus is on the importance of research, collaboration, and self-assessment for the professional development of teachers.

EDTP 645 Subject Methods and Assessment (6)
Prerequisites: EDTP 600 and EDTP 635. Prerequisite or corequisite: EDTP 639. An introduction to instructional strategies and curriculum for teaching secondary content that emphasizes effective instruction based on understanding assessment and how assessment informs effective instruction. Topics include development of comprehensive assessment strategies and their interrelationships with creation of learning objectives, selection of instructional techniques, and preparation of instructional plans. Current trends in secondary school structures, issues of traditional and authentic assessments, and teacher effect on student achievement are explored. Focus is on meeting individual needs and using content knowledge to inform instructional practice by drawing on knowledge gained through previous study and knowledge bases that reflect current research and best practices in secondary content areas.

EDTP 650 Professional Internship and Seminar (6)
Prerequisites: EDTP 600, EDTP 635, EDTP 645, and EDTP 639 (or EDRS 610). An opportunity to apply the concepts, techniques, methods, and theories learned in previous coursework and field-based experiences through a professional internship. Internship activities require completing observations, activities, and clinical practice in an approved secondary classroom appropriate for the selected content area certification, under the supervision of a school-based mentor/teacher and university field supervisor. An ongoing seminar establishes a learning community that assures a continuing support system and provides a forum for feedback and discussion of common readings, experiences, questions, and issues. An electronic portfolio is completed.
EMAN (Emergency Management)

EMAN 600 Comprehensive Crisis and Emergency Management (3)
An analysis of all hazards, phases (mitigation, preparedness, response, and recovery), and actors involved in crisis and emergency management. Discussion covers the definition of crises, emergencies, and disasters, as well as concepts and issues in crisis and emergency management. Focus is on developing crisis, contingency, and incident management plans. Current frameworks, management systems, and command systems for organizing a response, deploying resources, managing the response organization, supporting crisis communication, and making decisions in a turbulent environment are examined. Topics are discussed from U.S. and international perspectives.

EMAN 610 Hazard Risk and Vulnerability Assessment (3)
An examination of risk, hazard, and vulnerability. Topics include systematic hazard risk assessment, risk mitigation (reduction), risk transfer, and risk analysis. Discussion covers contemporary approaches to risk assessment and management of naturally or technologically induced hazards. Environmental hazard assessment is also examined. Seminal works published in the area are reviewed.

EMAN 620 Information Technology in Emergency Management (3)
An overview of the role of information in crisis and response management. Discussion covers disaster and crisis information requirements; information technologies and decision support tools applied to crisis, disaster, and emergency management; and information problems encountered during emergencies. Tools used include the global positioning system (GPS), geographical information systems (GIS), UAS (drones), and hazard and emergency management-related software packages, as well as decision analysis methods. Assignments include practical case studies.

EMAN 630 Crisis Communication for Emergency Managers (3)
An exploration of current strategies and tactics for managing the range of communication responsibilities and issues that arise during a variety of crisis situations. Traditional and new media methods for analyzing crisis and communications management issues (including the use of current technologies) are applied using relevant public relations research, theory, and case examples. A strategic approach is used to better identify issues, goals, stakeholders, messaging, and other aspects involved in developing community-specific public responses to crisis situations.

EMAN 670 Seminar in Emergency Management Leadership (3)
An examination of the role, mission, and functional skills of the emergency manager that compares and contrasts current aspects with evolving trends. Factors that affect successful leadership in emergency management, such as managing crises, disasters, and emergencies through discussion of key issues and analysis of selected case studies, are explored. Discussion covers the evolving multidisciplinary nature of the emergency manager’s job and characteristics and leadership styles most effective in emergency management. Summary reviews of various theories, models, historical examples, and practical applications are used to reflect the central activities of emergency managers and gain a better perspective on the emergency manager’s job. Topics include planning, risk assessment, crisis communications, organizational and operational issues, problem solving, overcoming bureaucratic barriers to effective performance, promoting a culture of disaster prevention and preparedness, advising on business continuity strategies, acquiring resources, staff training, and emergency exercises. Ethics and legal issues in emergency management, the procurement of facilities, staff management, and controversies are also examined.

ENVM (Environmental and Waste Management)

ENVM 600 Fundamentals of Environmental Systems (3)
(For students lacking a strong science background or experience in the environmental field.) An introduction to the basic concepts of environmental chemistry, physics, geology, and risk. Topics include the gaseous, liquid, and solid effluents from various industrial activities, as well as management methods and the statutory and regulatory requirements of major federal environmental laws affecting this management. Discussion also covers fundamental principles relating to the transport and fate of contaminants and industrial wastes and the basic vocabulary of the field.

ENVM 610 Environmental/Energy Law and Policy Development (3)
An examination of U.S. environmental and energy law and policy, including its development, implementation, and enforcement; legislative, executive, and judicial perspectives; and the roles and impact these government institutions have made on environmental and energy law and policy. Leading laws and their ensuing policies, such as the National Environmental Policy Act, the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the 1992 National Energy Policy Act, the FDR-Era Federal Policy Act, the Public Utility Holding Company Act, and the Carter-Era Public Utility Regulatory Policy Act, are examined.
ENVM 641 Environmental Auditing (3)
An examination of methods for attaining statutory, regulatory, and permitting compliance. The protection of workers and other stakeholders is examined in the context of organizational, budgetary, and other constraints. Emphasis is on methods of defining auditing objectives to meet organizational goals and of designing auditing programs for effective compliance under each of the 12 major environmental statutes, including air, water, solid, and hazardous waste management laws and pollution prevention initiatives.

ENVM 643 Environmental Communications and Reporting (3)
An overview of U.S. environmental regulations and the reporting requirements of these regulations, an understanding of which is critical to success in the environmental field. Topics include toxic release inventories, risk management plans, environmental management systems, and radiation. Discussion also covers communicating with a wide range of stakeholders and the news media, public speaking, and corporate social responsibility. Focus is on the skills and knowledge needed for a career in environmental management.

ENVM 644 New Technologies in Environmental Management (3)
An overview of the role new technology plays in environmental management, as explored from the perspectives of science and policy. Discussion examines when an emerging technology becomes conventional and covers examples of new technology related to informatics and data management; ISO 14001; energy efficiency; the prevention, monitoring, and remediation of air, surface water, groundwater, and soil; and biotechnology. Topics also include technical, financial, and policy enablers and barriers to emerging technology.

ENVM 647 Environmental Risk Assessment (3)
An overview of the basic concepts of risk assessment. Topics include the four core parts of a risk assessment, as denoted by the National Academy of Sciences: hazard assessment, dose-response assessment, exposure assessment, and risk characterization. Methods of measurement and modeling are discussed, as are key questions concerning uncertainty. Differences in the risk characterizations of substances under different use conditions and legal requirements are studied. Significant case studies serve to illustrate the assessment process.

ENVM 649 Principles and Practices of Waste Management (3)
A study of waste management, an environmental field with a long history and legacy of mismanagement. Topics include current cleanup realities and the practicalities of compliance with current requirements. Discussion examines the current regulatory schema for dealing with hazardous, solid, and specialty wastes, especially subtitle C of the Resource Conservation and Recovery Act (RCRA); cleanup options, including those covered by the Comprehensive Environmental Response, Compensation, and Liability (CERCLA) and Brownfields Utilization, Investment, and Local Development (BUILD) Acts; and potential options for sustainable futures.

ENVM 650 Environmental and Natural Resources Economics (3)
An introduction to microeconomic principles as they relate to the efficient use of environmental resources and their impact on local, national, and global environmental policies. Topics include an overview of microeconomic principles and economic efficiencies, market failures, externalities, property rights, pollution damage and abatement costs, benefit and cost analysis, valuation methods, environmental policy analysis, federal control policies, and international issues.

ENVM 651 Water Resources Management (3)
An in-depth examination of the dynamics and challenges of integrated water resources planning, development, distribution, and management in the 21st century. Focus is on river basins and watersheds, such as the Chesapeake Bay Watershed or the Upper and Lower Colorado River Basins. Discussion covers the quality, quantity, optimum uses, and governance of water resources, as well as the role of paradigms in affecting water policy-making behaviors, institutions, and systems. Topics also include the impact of climate change and global warming on water resources management and planning; determinants of climate change resilience, especially the role of adaptive technologies; and the use of market-driven mechanisms to meet water quantity and quality management challenges under climate change.

ENVM 652 Principles of Air Quality Management (3)
An overview of management techniques for addressing air quality issues and managing air quality programs. Topics include air pollution law; air pollutants and their sources; effects of air pollution on health and welfare; sampling and analysis of air pollutants; standards, regulations, and enforcement systems; and quality assurance principles.
ENVM 653 Land Use Management (3)
An introduction to the powers, process, and practice of managing the patterns and land use implications of human settlement and the built environment. Topics include where to build, where not to build, how to build, and when to build. Discussion also covers the settlement history of the United States, as well as the constitutional and legislative mandates for government, private-sector participants, and institutions that shape land use policy. Emphasis is on the role of local government. Land use and environmental community planning, as well as best practices in land use management, are examined.

ENVM 670 Capstone Study in Environmental Management (3)
Prerequisite: 27 credits of program coursework. An intensive hands-on study of environmental management that integrates knowledge gained from previous coursework and applies that knowledge to projects with external sponsors on environmental problems. Review covers issues such as environmental management systems, sustainability, environmental policy, the role of senior management, activity-based costing, and lifecycle analysis. A specific environmental problem (e.g., sustainability, wastewater management, hazardous waste disposal, need for alternative energy), defined by an external sponsor, is addressed by small teams. Projects involve organizing and planning the work, conferring regularly with sponsors, developing an outline for the final work product, collecting data and information, preparing a final report, and presenting a briefing to the sponsor organization.

FIN 610 Financial Management in Organizations (3)
(For students in an accounting or financial management specialization or program.) Prerequisite: MGMT 640. An investigation of financial management theory and applications in organizations. Discounted cash flow and rate-of-return analysis are used to evaluate projects and financial instruments. Discussion covers the role of the cost of capital and the Capital Asset Pricing Model (CAPM) in capital investment analysis and selection. Topics include capital budgeting, stock and bond valuation, break-even analysis, capital market efficiency, real options, short-term financial management, and international finance.

FIN 615 Financial Analysis and Modeling (3)
Prerequisite: FIN 610. An exploration of how financial managers use financial modeling, analysis, and research to build forecasts and projections, evaluate financial alternatives, and support financial decision making in both operational and strategic contexts. Models are developed using Microsoft Excel; exercises and extended case studies are utilized to interpret and employ results. Topics include financial statements and ratio analysis, cash-flow forecasting, operations budgeting, break-even and leverage analysis, time value of money applications, and capital budgeting and risk assessment.

FIN 620 Long-Term Financial Management (3)
Prerequisite: FIN 610. An exploration of the long-term financial needs of an organization and the roles of the capital markets. Topics include the financial environment of organizations, options and futures instruments, long-term financing, the capital budgeting decision process, capital structure management, dividend and share repurchase policy, and investment banking and restructuring. Various types of long-term funding sources—including term loans, derivatives, debt and equity securities, and leasing—are analyzed. Alternate policies with regard to financial leverage, capital structure, dividends, and the issuance of preferred stock are evaluated. Mergers, leveraged buyouts, and divestitures are examined as special situations to create value.

FIN 630 Investment Valuation (3)
Prerequisite: FIN 610. An in-depth exploration and application of valuation models to support managerial decision making in a strategic framework. The theory, concepts, and principles underlying the valuation of firms, business/product lines, and mergers and acquisitions are addressed using extended exercises and applications. The discounted cash flow model is used as a tool. Discussion covers the financial drivers of value, including assessing and determining risk, competitive advantage period, and sales and earnings growth estimates. Other valuation techniques using earnings, revenues, and price/earnings multiples are also discussed and applied in selected examples.

FIN 640 Multinational Financial Management (3)
Prerequisite: FIN 610. A study of financial management issues in multinational organizations. Topics include the environment of international financial management, foreign exchange markets, risk management, multinational working capital management, and foreign investment analysis. The financing of foreign operations, international banking, and the role of financial management in maintaining global competitiveness are also considered.
FIN 645 Behavioral Finance (3)
Prerequisite: FIN 630. A study of the key psychological obstacles to value-maximizing behavior and steps that managers can take to mitigate their effects, using the traditional tools of corporate finance. Focus is on understanding the underlying factors and processes that result in nonoptimal decision making by financial managers. Topics include perceptions about risk and reward and financial decision making in the areas of investing, trading, valuation, capital budgeting, capital structure, dividend policy, agency conflicts, corporate governance, and mergers and acquisitions. The key role played by emotions and recent findings from neuroscience are explored.

FIN 660 Strategic Financial Management (3)
Prerequisites: FIN 620 and FIN 630. An integrative study of financial management through applied problems and case studies. Topics reflect the changing environment of financial management in organizations and include capital investment decision making, the role of intangibles in value creation, financial performance metrics, strategic financial planning and control, strategic valuation decisions, growth strategies for increasing value, the restructuring of financial processes, corporate governance and ethics, value-based management, strategic cost management, and the impact of information technology on the organization’s financial systems. A finance simulation is used as an integrating mechanism.

GHMT (Global Health Management)

GHMT 610 Perspectives on Global Health (3)
(Offered jointly with University of Maryland, Baltimore.) An overview of the field of global health. Focus is on analyzing and responding to major global health challenges and international policies. Analysis covers national and transnational health trends, including major communicable and noncommunicable disease burdens. The World Health Organization (WHO) and other international health interventions that address the determinants of health and disease burdens and current and emerging global health priorities, such as disaster relief and infectious diseases, are assessed. Topics include key legal issues, ethics, and models of reform to global health programming and their applications. Skills are developed in analysis, leadership, teamwork, and communication in a global context.

GHMT 620 National and International Approaches to Healthcare Delivery (3)
(Offered jointly with University of Maryland, Baltimore.) A project-based application of global health concepts, theories, and principles to the practical challenges facing global health professionals. Assignments focus on a specific global health priority for a given national or geopolitically defined population. Needs assessment methodologies are applied; these include gathering and analyzing epidemiological data; mapping local, national, and global policy processes; identifying strategies for building infrastructure and workforce capacity; analyzing financial opportunities and limitations; and assessing the impact of macro changes in the global economy, political environment, and human rights and legal systems. Findings regarding the scope, options, and outcomes of these needs assessments, as well as a recommended action plan for improving the health status of the population group of interest, are summarized in the final project.

GHMT 630 Strategic Management of Global Health Services (6)
(Open to students in the joint UMGC-UMB program only). The development of strategic management skills for growing and operating health organizations and health systems in low- and middle-resourced countries. Focus is on building strategies for organizing global health prevention, treatment, care, and capacity-building initiatives. Strategic management skills are applied to create global health missions and goals, core functions and organizational structures, clinical and administrative workforces, budgets and financing, and communication messages.

HCAD (Healthcare Administration)

HCAD 600 Introduction to Healthcare Administration (3)
An introduction to the principles of management and leadership as the foundations for the administration of healthcare products and service delivery. The evolution of management principles and practices is traced, and the bases for healthcare administration are analyzed. Emphasis is on the management of global healthcare systems in technological societies and the need for innovation and creativity in healthcare administration. Focus is on mastering graduate-level critical thinking, writing, and ethical decision-making skills.
HCAD 610 Information Technology for Healthcare Administration (3)
An overview of information technology (IT) from a managerial perspective and an examination of how healthcare administrators can use IT to maximize organizational performance. Fundamental principles of IT and data management and their implications for healthcare administrators are reviewed. Discussion explores the use of technology, databases, and other analytical tools to structure, analyze, and present information related to healthcare management and problem solving. Topics also include strategic information systems planning, systems analysis, system design, evaluation, and selection. Current applications, such as patient care, administrative and strategic decision support, managed health, health information networks, and the internet are examined to determine how they may be used to meet the challenges facing healthcare administrators today and in the future. Focus is on the legal and ethical issues related to IT and their practical implications for the healthcare administrator.

HCAD 620 The U.S. Healthcare System (3)
A comprehensive examination of the complex, dynamic, and rapidly changing healthcare system in the United States. The healthcare system’s major components and their characteristics are identified. Emphasis is on current problems in healthcare financing and delivery. Social, economic, and political forces that have shaped and continue to influence the system are traced. The healthcare system in the United States is compared with systems in industrialized and developing nations. Analysis covers current trends in healthcare and prospects for the future.

HCAD 625 The Business of Healthcare (3)
Prerequisite: HCAD 620. A detailed exploration of operational issues unique to the dynamic and highly regulated realm of healthcare. Discussion covers challenges presented by regulatory mandates, market forces, and multiple interconnected matrix organizations, as well as defining and meeting the needs of the community.

HCAD 630 Public Health Administration (3)
An in-depth study of the field of public health, emphasizing leadership and management. The current U.S. public health system is analyzed, focusing on federal, state, and local public health entities and their management issues. Connections and relationships between the system of public health and the private personal health services market are also analyzed. Topics include the history and current status of public health, core functions, legislation, ethics, accountability (including assessment and evaluation), and the politics and financing of public health, particularly in light of the increased utilization of evidence-based budgeting. Contact with a public health agency to analyze a public health program or policy may augment text and lecture presentation.

HCAD 635 Long-Term Care Administration (3)
A study of the different components of the long-term-care service delivery system. Topics include residential settings (such as skilled nursing facilities, assisted living facilities, and continuing care retirement communities), home care services, community-based service programs, and hospice care. The goal is to apply contemporary management theory, concepts, and models to the entities that make up the long-term-care service delivery system. Specialized case studies are used to supplement course materials and examine best practices for fostering performance excellence.

HCAD 640 Financial Management for Healthcare Organizations (3)
An in-depth study of healthcare economics and the financial management of healthcare organizations. The economic principles underlying the American healthcare market and the financial management of health services organizations within that market are examined. Analysis covers free market and mixed market economies; barriers to free market economies; healthcare industry regulation, licensure, and certification; and various coverage and healthcare payment mechanisms. Topics also include reimbursement mechanisms and their effect on healthcare provider organizations, managed care, capitation, and per case or per diagnosis payment, as well as ways these financial strategies are utilized by third-party payers. Focus is on financial challenges such as uncompensated care, cost increases, increased competition, and increased regulation and how healthcare providers should respond to them. Ratio analysis, cost analysis, working capital, capital budgeting and investment in relation to net present value and value added to the organization, and other financial management techniques are also explored.
HCAD 645 Strategic Financial Management in Healthcare (3)
Prerequisite: HCAD 640. An in-depth study of the concepts and competencies needed to plan the usage and management of enterprise financial resources to achieve long-term organizational objectives and return maximum value in a volatile healthcare finance environment. Emphasis is on identifying and quantifying available or potential resources, devising a plan for utilizing finances and other capital resources to achieve goals, and capital budgeting and management. Topics also include risk analysis, multiple financing methods, supply chain costs, valuation, and mergers and acquisitions. Current accounts and working capital management are explored, as are strategic planning and financial forecasting.

HCAD 650 Legal Aspects of Healthcare Administration (3)
A comprehensive analysis of the more significant legal issues encountered by healthcare administrators and the ramifications of those issues. Both theoretical and practical applications of law are addressed with an analytical focus on the prompt identification of legal and bioethical issues arising from and affecting various healthcare employment settings. The intersection of law, ethics, and bioethics is scrutinized in various contexts. The principles of healthcare law in a complex constitutional system are examined in relation to current proposals and policy developments in areas such as privacy, contracts, tort reform, and the regulation of the healthcare marketplace. Topics include legal and regulatory constraints imposed on the healthcare industry, the liability of healthcare providers, the rights of patients, employment law and labor relations, and administrative law for healthcare organizations.

HCAD 660 Healthcare Institutional Organization and Management (3)
A study of the nature of management and how it is applied in various healthcare settings. Contemporary theories, critical perspectives, models, and best practices designed to foster performance excellence in the rapidly competitive healthcare environment are examined. Discussion also addresses the complexities and challenges of health systems.

HCAD 665 Strategic Issues in Healthcare Leadership (3)
Prerequisite: HCAD 660. An examination of strategic issues driving the future of healthcare. Focus is on identifying and preparing to meet the needs of changing communities, integrating rapid technological and scientific advances, and ensuring institutional viability. Topics include development and dissemination of strategic goals and shaping organizational values.

HCAD 670 Healthcare Administration Capstone (3)
Prerequisite: 36 credits of program coursework. A capstone study of healthcare administration that integrates knowledge and skills gained from previous study in the development of a systems approach to healthcare administration. Focus is on public and private healthcare delivery systems, alliances with internal and external environments, and strategic decision making and implementation in the rapidly evolving global arena of healthcare administration.

HIMS (Health Informatics Administration)

HIMS 650 Research Methods for Healthcare Managers (3)
(Formerly HAIN 650.) The application of basic statistics and research methods from the perspectives of health informatics/information and healthcare administration. Emphasis is on the analysis of clinical and administrative data to assist in decision making: healthcare planning; research; reporting to local, state and national entities; and policy development. Topics include institutional review boards, ethics in research, the research process, epidemiology, case mix, vital statistics, registries, interpretation and presentation of data, data collection, and quality outcomes and measures.

HIMS 655 Health Data Management (3)
(Formerly HAIN 655.) A foundational overview of health informatics/information management as a profession and as a subset of the healthcare delivery system. Health informatics/information principles and practices are explored as they relate to the application, analysis, management, and architecture of health data. Topics include data mapping, data structures, clinical terminology, and classification systems. Discussion also covers ICD-10, health record content, documentation standards, data management policies and procedures, meaningful use, data sources, and information governance.

HIMS 661 The Application of Information Technology in Healthcare Administration (3)
(Formerly HAIN 661.) An overview of historical, current, and emerging health information systems and technologies. Focus is on applying a system life-cycle process to the adoption of an electronic health record system. Discussion covers various ways that information technology can aid in operations management and the strategic decision-making process. Topics include project management, clinical and decision support systems, report generation, data analytics, workflow processes, health information exchange, enterprise information management, training and development, data quality, user interfaces, data capturing technologies, personal health records, population health, data safeguards, business intelligence, and artificial intelligence.
COURSE DESCRIPTIONS

HIMS 670 Health Informatics Administration Capstone (3)
(Formerly HAIN 670.) Prerequisite: 30 credits of program coursework, including HIMS 650, HIMS 655, and HIMS 661. Review of the proficiencies and competencies of a registered health information administrator (RHIA) as preparation for taking the RHIA certification exam. Emphasis is on professional development and test-taking strategies. An evidence-based capstone project on a topic related to health informatics or health information requires the integration and application of knowledge and skills acquired through previous coursework and experience. Discussion covers informatics issues, challenges for U.S. and global healthcare systems, potential new healthcare delivery models, approaches to strategically shaping local and national informatics policy, and the role of information technology in supporting the full continuum of care in health organizations. Tools and methods for strategic planning, implementing, using, and evaluating the efficacy of information systems are explored.

HRMD (Human Resource Management and Development)

HRMD 610 Issues and Practices in Human Resource Management (3)
(Strongly recommended as the first course in the human resources management specialization.) An overview of the human resource management profession, including the theories, research, and issues related to human resource management within modern organizations. The roles, responsibilities, relationships, functions, and processes of human resource management are discussed from a systems perspective. Expectations of various stakeholders, such as government, employees, labor organizations, staff/line management, and executive management, are explored. The general legal principles and provisions that govern human resource activities are examined in depth. The specialty areas of employee relations, staffing, human resource development, compensation, and organizational development are described. Current topics, such as human resource information systems and globalization, are addressed.

HRMD 620 Employee and Labor Relations (3)
An investigation of the rights and responsibilities of employees and organizations in union and nonunion environments in the United States. The federal legal framework for collective bargaining is reviewed. Topics include common employment contract trends, topics, and issues, as well as all phases of unionization, from organizing through contract maintenance. Emphasis is on conflict management, negotiation, and alternate dispute resolution.

HRMD 630 Recruitment and Selection (3)
An examination of the initial phases of staffing, focusing on the hiring process. The contemporary roles, relationships, and processes of recruitment and selection in the human resource management system are investigated. Emphasis is on productivity factors (such as the use of technology) and quality factors (such as legal, ethical, and validity issues). Topics include international and domestic concerns, as well as multiple staffing levels (such as executive managers and temporary employees). Current issues in private, not-for-profit, and/or public sectors are discussed.

HRMD 640 Job Analysis, Assessment, and Compensation (3)
A study of the interrelated aspects of human resource management, including job design, job analysis, job evaluation, employee compensation, incentives to productivity, employee motivation, and performance appraisal. A variety of approaches for analyzing, weighing, and specifying the detailed elements of positions within modern organizations are presented. Discussion covers techniques for identifying and classifying the critical components of a job, defining the observable standards and measures, preparing and determining the job description and job worth, establishing equitable compensation for job performance, and developing an executive compensation program. The interaction of compensation, worker motivation, performance appraisal, and level of worker performance within the organization is examined.

HRMD 650 Organizational Development and Change (3)
A study of the issues, theories, and methodologies associated with organizational development and the management of change, with emphasis on organizational culture and organizational change processes. Topics include the diagnostic process, intervention strategies, and overcoming resistance to change. Techniques such as goal setting, team-development procedures, productivity and strategy interventions, and interpersonal-change models are examined.

HRMD 651 Current Perspectives in Training and Development (3)
An examination of the theories, research, skills, and issues related to one major aspect of human resource development, the management of organizational training services. The role of training in the workplace and adult learning models are investigated. Topics include curriculum management, program development, and operation management with an emphasis on design and delivery issues. The impact of technology, the global environment, and modern organizational structures are considered. Ethical issues are also discussed. Assignments include the development of training proposals or programs.
HRMD 665 Managing Virtual and Global Teams (3)
(Not open to students who have completed HRMD 621, HRMD 652, or HRMD 660.) An investigation of the foundations of team development and performance from the perspective of human resource management and organizational behavior. Focus is on maximizing the effectiveness and efficiency of global and virtual teams in organizations. Topics include the impact of global diversity and use of technology on intergroup development, communication, and outcomes. Scholarly research and field literature are examined, and the implications of the findings for applied management are discussed.

HSMN (Homeland Security Management)

HSMN 610 Concepts in Homeland Security (3)
An overview of the basic concepts of homeland security, including infrastructure protection, jurisdiction, and issues in technical areas such as interconnectivity and interoperability. The nation’s telecommunications and information technology networks are examined as both vulnerable assets and critical solutions.

HSMN 620 Physical Security (3)
A comprehensive study of the many interdependent elements involved in protecting human-made structures from direct or indirect physical and cyber attacks. Various factors that affect physical security (including construction materials, architectural design, location, function, occupancy, and life-cycle management) are examined. Accessibility, access control, traffic patterns, and internal and external communications are analyzed. Review covers methods for protecting critical infrastructure support systems, such as electric power, water supply, airflow, and information systems. Typical security policies and procedures for various categories of physical facilities (such as those involved in power generation, finance, and telecommunications) are also evaluated.

HSMN 625 Critical Infrastructures (3)
Prerequisite: HSMN 610. An introduction to critical infrastructure assurance as a policy field. Review covers the concept of critical infrastructures and their interdependencies. Topics include the development of modern critical infrastructures, the reasons why they have become central elements of 21st-century societies, efforts being made to safeguard them, and potential threats to their continued effective operation.

HSMN 630 Resilience Planning and Preparedness for Disaster Response and Recovery (3)
An in-depth examination of managerial strategies for developing and maintaining resilience in communities, the private sector, and the nation in the face of human-made, natural, and technological disruptions or catastrophes. Emphasis is on the importance of advanced planning. Techniques for performing risk assessments and potential impact analyses and for selecting appropriate risk treatments are explored. Discussion covers preparing to handle adverse events, responding to them, and recovering from them. Resilience management is explored within the context of a life cycle that includes programmatic review and continuous improvement planning. Actual and hypothetical cases are analyzed.

HSMN 670 Seminar in Homeland Security (3)
(To be taken during the last semester of the program.) Prerequisite: 24 credits of program coursework, including HSMN 610, HSMN 620, HSMN 630, EMAN 620, INFA 660, and BSBD 641. An up-to-date evaluation of the vulnerabilities of various aspects of the nation’s critical infrastructure, with particular emphasis on the food and water supply, and countermeasures to protect them. Topics include various threat profiles and actions by government, industry, independent institutions, and private citizens that might prevent attack from domestic or foreign sources and mitigate harmful consequences should such an attack occur. Discussion reviews the federal government’s organization and management of food and water security and explores what further efforts might be made, building upon the nation’s health system and engaging government at all levels. The singularly important roles of first responders are also analyzed.

IMAT (Informatics)

IMAT 637 IT Acquisitions Management (3)
A study of management practices related to the acquisition of IT systems, components, and services. Emphasis is on the importance of enterprise strategic planning and the concomitant IT strategic planning. Issues related to the development of the IT acquisition plan, financial planning and budgeting, integration of the proposed acquisition within the overall goals of the enterprise, and related IT program management are examined in the context of overarching management challenges. Federal IT systems, contract and procurement policies, and procedures provide examples for analysis of concepts with wider relevance.
IMAT 639 Internet Multimedia Applications (3)
A study of multimedia presentations as essential, strategic components of an organization's competitive web presence. Established principles of software development, aesthetics of typography and layout, benchmarking, and usability engineering are used to analyze websites and write successful site development plans. Emphasis is on basic web page design techniques. Topics include standards for representing common media formats, compression algorithms, file format translation tools, hardware requirements and standards, system constraints, Java, CGI scripts, and virtual reality. Assignments require building a portfolio of rich media content.

IMAT 670 Contemporary Topics in Informatics (3)
A capstone study of emerging and current technologies, as well as some eternal verities in IT management, that integrates and augments concepts previously studied. Topics vary and may include aligning IT with the strategic goals of the enterprise, leadership in IT, software psychology in the design of user interfaces, geographical information systems, building and managing internet communities, technology to ameliorate the digital divide, managing an enterprise's IT portfolio, and the social impact of information policy decisions.

INFA (Information Assurance)

INFA 610 Foundations of Information Security and Assurance (3)
(Must be taken as the first course in the program.) An overview of techniques for ensuring and managing information security. Topics include administrative and technical security controls to prevent, detect, respond to, and recover from cyber attacks; risk and vulnerability analysis to select security controls; security planning; security architecture; security evaluation and assessment; and legal, ethical, and privacy aspects of information assurance. Discussion also covers information security fundamentals, such as cryptography, authentication, and access control techniques, and their use in network, operating system, database, and application layers. Security issues of current importance are stressed.

INFA 620 Network and Internet Security (3)
An introduction to the security concepts needed for the design, use, and implementation of secure voice and data communications networks, including the internet. A brief review of networking technology and standards (including an introduction to internet communication protocols) is provided. Security subjects addressed include defense models, security policy development, authentication and authorization controls, firewalls, packet filtering, virtual private networks (VPNs), and wireless network security. A project on network security in a hypothetical scenario based on the inputs from government agencies and commercial organizations is assessed by a team of experts who are working in the field.

INFA 630 Intrusion Detection and Intrusion Prevention (3)
An exploration of the theory and implementation of intrusion detection and intrusion prevention. Topics include network-based, host-based, and hybrid intrusion detection; intrusion prevention; attack pattern identification; deployment; response; surveillance; damage assessment; data forensics; data mining; attack tracing; system recovery; and continuity of operation. A specific project on intrusion detection and intrusion prevention in a hypothetical scenario based on the inputs from government agencies and commercial organizations is assessed by a team of experts who are working in the field.

INFA 640 Cryptology and Data Protection (3)
An overview of the theory of encryption using symmetric and asymmetric keys, current protocols for exchanging secure data (including the Data Encryption Standard and the Advanced Encryption Standard), and secure communication techniques. A review of the historical development of cryptographic methods and cryptanalysis tools is provided. Public Key Infrastructure and the use of digital signatures and certificates for protecting and validating data are examined. Strategies for the physical protection of information assets are explored.

INFA 650 Computer Forensics (3)
An introduction to the fundamental concepts behind the collection and analysis of the digital evidence left behind in a digital crime scene. Topics include the identification, preservation, collection, examination, analysis, and presentation of evidence for prosecution purposes. Discussion also covers the laws and ethics related to computer forensics and challenges in computer forensics. Network forensics is briefly explored. A project on computer forensics or network forensics in a hypothetical scenario based on the inputs from government agencies and commercial organizations is assessed by a team of experts who are working in the field.
INFA 660 The Law, Regulation, and Ethics of Information Assurance (3)
An overview of the legal, regulatory, and ethical issues related to cyberspace. Emphasis is on developing skills in spotting ethical and legal issues and navigating through the complex and changing legal and regulatory environment as it applies to behavior in cyberspace. Various resources and materials about the ethical and legal operation of modern computer systems, applications, and networks are presented.

INFA 670 Information Assurance Capstone (3)
Prerequisites: INFA 610, INFA 620, INFA 630, INFA 640, INFA 650, and INFA 660 (3 credits may be taken concurrently). A study of information assurance that integrates and applies concepts previously studied. Best practices and appropriate technologies to design, implement, manage, evaluate, and further improve information security are explored. Emerging trends are analyzed to understand their potential effect on information security and assurance.

INMS (Intelligence Management)

INMS 600 Managing Intelligence Activities (3)
An introduction to management issues associated with the national Intelligence Community and activities in national and homeland security, law enforcement, and the private sector. Intelligence is evaluated from the perspectives of its consumers in government and business. Topics include the historical issues that led to extensive oversight of intelligence agencies and laws restricting their activities. Discussion also covers recent changes in national intelligence and current issues, such as the debate over security versus civil liberties and how to protect America from foreign espionage and exploitation.

INMS 610 Intelligence Collection: Sources and Challenges (3)
A study of the management challenges related to collecting all-source intelligence for national security, counterterrorism, and business purposes through case-study analysis and planning exercises. The fundamentals of multi-intelligence human source intelligence; open-source intelligence; signals intelligence; imagery; technical intelligence; cyber intelligence and persistent intelligence, surveillance, and reconnaissance (ISR) collection are assessed. Discussion covers innovative collection methods, access to denied environments, agile architectures, the impact of artificial intelligence and machine learning, sensor data fusion, and the integration of multisourced intelligence. Topics include how requirements drive collection efforts, the relationship between collection and analysis, and the costs associated with collection of intelligence.

INMS 620 Intelligence Analysis: Consumers, Uses, and Issues (3)
Prerequisites: INMS 600 and INMS 610. An examination of the intelligence requirements of various clients in government and the private sector. The various purposes of analysis such as warning, policy planning, research and development, systems or product planning, support for law enforcement and correctional agencies, support for operational activities, and investment are examined. Discussion covers managing analytical methodologies and techniques, as well as dissent in analyses; adapting cutting-edge machine-learning techniques; and understanding the reasons for failures. Case studies illustrate issues in analysis management and critical thinking. The conflict between intelligence analysts and decision makers at national and local levels is explored.

INMS 630 Counterintelligence (3)
An examination of the vulnerabilities of the United States, allied countries, and private businesses to espionage and how counterintelligence can reduce the threat. Discussion covers case studies of espionage against America, including insider threats and cyber and economic espionage against U.S. technology and business. Topics include the roles, missions, and espionage activities of foreign intelligence services. Major threat groups are assessed, and management issues related to countering these threats are evaluated. U.S. policy issues and the management challenges of interagency cooperation among local, state, and international sources and public/private partnerships are explored.

INMS 640 Intelligence-Led Enforcement (3)
An evaluation of management approaches and assessment of issues associated with intelligence support for crime prevention and law and regulation enforcement. Topics include public/private cooperation, domestic counterterrorism, drug law enforcement, and actions to counter financial crimes. Interagency cooperation and intelligence sharing with state, local, and tribal agencies and laws and executive orders related to intelligence promulgated since 9/11 are examined. Discussion also covers the roles of intelligence in fighting transnational crime and cyber crime. Assignments include case-study analysis and original research.
INMS 650 Intelligence Management and Oversight (3)
Prerequisites: INMS 600 and 610. An examination of the relationships among intelligence organizations at the federal, state, and local levels, as well as those with private corporations. Strategies for the management and control of intelligence activities establishing policies, setting budgets, and conducting reviews are examined. Discussion covers how intelligence oversight (including the roles and responsibilities of the executive, legislative, and judicial branches of government) works and how business intelligence activities are managed and overseen in the private sector.

INMS 660 Leadership Seminar (3)
Prerequisite: 30 credits of program coursework, including all core and specialization courses (except MGMT 670). An analysis and assessment of leadership challenges within intelligence environments. Key leadership and management principles in dealing with intelligence situations, scenarios, and issues are applied to real-world intelligence situations, such as handling insider threats; augmenting intelligence collection; planning intelligence, surveillance, and reconnaissance (ISR) operations; establishing and expanding foreign intelligence partnerships; prioritizing budgets; responding to intelligence oversight inquiries; infusing advanced technologies; coordinating intelligence and cyber operations; and assessing counterintelligence, counterterrorism, and nation-state security threats.

ISAS (Information Systems and Services)

ISAS 600 Information Systems for Managers (3)
(Designed for managers without a technical background in computers and information systems.) Prerequisite: Basic microcomputer skills. An investigation of different types of hardware and software and their application in organizations from a systems perspective. Case studies are used to reveal technical and organizational issues, along with operational considerations. Emphasis is on determining managers’ needs for information and procuring and using appropriate computer systems.

ISAS 610 Information Systems Management and Integration (3)
A study of the life cycle of the information system, from inception, through systems development and integration, to system operation and maintenance. Emphasis is on the integration of information systems with the management systems of an organization. Major phases, procedures, policies, and techniques in the information system life cycle are discussed in detail.

ISAS 620 Information Systems Sourcing Management (3)
A study of how best to make and implement appropriate decisions in providing information systems to an organization, as well as how to manage the outcomes of such decisions. Focus is on the frameworks, tools, and techniques for making sourcing decisions. Topics include “make or buy” decisions, the use of off-the-shelf package software (including enterprise resource planning software), various models of outsourcing, and the outsourcing of entire business processes. The implications of whether to source domestically or offshore are evaluated. Discussion also covers contemporary issues related to cloud computing and the options it offers.

ISAS 630 Systems Analysis and Design (3)
A study of current techniques and practices in requirements specification, software application selection, project management, and analysis and design of information system applications. Emphasis is on a management perspective on the specification of the information system’s logical and physical analysis and design.

ISAS 640 Decision Support Systems and Expert Systems (3)
An investigation of computer applications for management support. The technologies of decision support systems and expert systems and the organizational factors leading to the success or failure of such systems are introduced. Topics also include group decision support systems, integration and implementation issues, and related advanced technologies such as neural networks.

ISAS 650 Information Technology, the CIO, and Organizational Transformation (3)
An examination of how information technology can affect the strategic direction of an organization, how IT enables new ways of operating, and how the chief information officer can serve as a trusted member of the organization’s top management team to help it exploit information technology effectively.

ITEC (Information Technology)

ITEC 610 Information Technology Foundations (3)
A fundamental study of technology and its applications, as well as the economic and social issues they have raised. Topics include computers, peripherals, databases, and networks; operations (of business, government, and other enterprises), decision support systems, and acquisition of information technology resources; and information security, productivity, equitable access by users, intellectual property rights, and global reach. Discussion also covers current and future developments in the field and their implications.
ITEC 625 Computer Systems Architecture (3)
An introduction to the evolution of computer systems design and hardware and software architectures. Focus is on computer organization (classical and advanced architectures), operating systems, and applications development. Emerging developments in computer systems architecture are also examined.

ITEC 626 Information Systems Infrastructure (3)
An introduction to information systems infrastructure. Focus is on data communications and networks. Discussion covers layered network architectures and communication hardware. Emerging technologies such as social media, mobile computing, cloud computing, big data, and the internet of things are also examined.

ITEC 630 Information Systems Analysis, Modeling, and Design (3)
A study of systems analysis and design, using selected engineering and management science techniques and practices. Topics include requirements determination, modeling, decision making, and proposal development. The System Development Life Cycle Model, including system implementation and post-implementation activities, is examined. Emphasis is on the specification of the information system’s logical and physical analysis and design from a management perspective. Research and project assignments related to information systems analysis, design, implementation, or project planning and control require individual and group work.

ITEC 640 Information Technology Project Management (3)
An examination of the fundamental principles and practice of managing programs and projects in an information processing and high-tech environment. The dynamic nature of IT and the effect of life cycles are explored. The fundamental building blocks of high-tech management styles (including project planning, organizational structure, team building, and effective control mechanisms) are addressed. Discussion covers the effect of product and project life cycles in delivering a successful IT project, considering the obsolescence factors in procurement/stakeholder contracts. The goal is to gain a solid foundation to successfully manage each phase of the project life cycle, work within organizational and cost constraints, set goals linked directly to stakeholder needs, and utilize proven management tools to execute a dynamic project on time and within budget. Emphasis is on how to apply the essential concepts, processes, and techniques in the management of large-scale governmental or commercial programs. Topics also include the need for global vision, strong planning techniques, appropriate training before introducing any IT product into the market, and discipline in executing tasks.

LDT (Learning Design and Technology)

LDT 610 Learning Design and Digital Pedagogy (6)
Prerequisite: DCL 600. Gain the foundational knowledge, skills, and dispositions needed in the field of learning design. Explore the history of online learning and design; current learning design models; foundational theories and principles of distance learning, adult learning, collaborative and social learning, and computer-mediated learning; and technology tools and applications to support online interactions.

LDT 620 Learning Design, Media, and Emerging Technologies (6)
Prerequisite: LDT 610. Develop skills in the design, development, and integration of digital media to enhance the learning experience. Investigate how media, emerging and mobile tools, and online applications impact technology-mediated learning environments. Explore media and visual literacy, graphic design for online and mobile environments, the use and design of open educational resources, emerging technologies, and trends in technology (such as mobile learning environments, gaming, and augmented reality).

LDT 630 Learning Design and Data Analytics (6)
Prerequisite: LDT 620. Investigate advanced learning design concepts, and apply data analytics to assess the impact of design and technology on learning. Implement a systems thinking approach and digital tools to evaluate and support online learners and learning programs. Explore the assessment of online learning and interactions, data analytic tools and techniques, data visualization, and ways to support user experiences.

LDT 640 Advanced Practicum in Learning Design (6)
Prerequisite: LDT 630. Examine and evaluate leadership and change models to advance learning design projects. Identify and research legal issues associated with online teaching and learning. Examine leadership and project management techniques associated with learning design projects, evaluate learning management systems, identify a project, and develop a learning design seminar proposal.

LDT 670 Learning Design Seminar (6)
Prerequisite: LDT 640. Assume the role of an instructional designer and apply learning design knowledge, skills, and dispositions to create and assess an authentic online learning program. Complete the design, implementation, and analysis of a learning design project. Develop a professional portfolio and present the project and reflective analysis online.
MBA (Business Administration)

MBA 610 Leading Organizations and People (6)
Prerequisite: PRO 600. Assess and develop your leadership skills by creating a personal leadership and professional development plan that you will refine during the program. Develop a strategic understanding of your organization by analyzing its mission, vision, goals, and values. Evaluate your organization’s culture, climate, and approach to decision making and assess leadership effectiveness, governance structure, and processes. Explore how high-performing work teams can be a source of competitive advantage.

MBA 620 Financial Decision Making (6)
Prerequisite: MBA 610. Apply concepts behind financial statements, pricing, cost analysis, and capital budgeting in decisions. Propose solutions in real-world scenarios by using published financial reports and data from well-known national and international brands. Apply concepts from managerial economics to make pricing decisions for a business. Review business performance by analyzing the cash flow statement, income statement, and balance sheet. Make cost allocation, financing, and investment decisions by applying knowledge of corporate valuation. Determine the cost of capital and make capital budgeting decisions.

MBA 630 Leading in the Multicultural Global Environment (6)
Prerequisite: MBA 620. Enhance your cultural competence and evaluate opportunities and risks for operations in a global market. Expand your ability to apply ethical decision-making models. Assess issues of culture, business ethics, employment law, contracts, and criminal law in the context of a global business. Analyze political, legal, economic, and cultural forces that impact multinational businesses. Recommend the legal form and organizational structure of a business.

MBA 640 Innovation Through Marketing and Technology (6)
Prerequisite: MBA 630. Apply principles of market research and branding. Use web analytics to make decisions in digital marketing. Organize tasks in a marketing plan, assess market risk and opportunity, and collect data required to implement the marketing plan. Develop financial projections and suitable metrics for tracking the marketing plan.

MBA 670 Strategic Decision Making (6)
Prerequisite: MBA 640. Assume the role of a strategy officer who reports to the CEO. Develop an understanding of strategic leadership. Identify activities in the value chain of an organization, and propose a plan to relocate one or more activities to another geographical region. Prepare a project management plan for the opening of a facility in a new country. Develop a business plan that includes an entry strategy, marketing plan, competitive strategy, and financial statements.

MGMT (Management)

MGMT 610 Organizational Theory (3)
An overview of the fundamental concepts of organizational theory and design in the context of a postindustrial and increasingly global society. The study of organizations encompasses several key knowledge areas essential to today’s manager: the impact of technological and workforce changes on society, organizational ethics and social responsibility, global issues, history of management thought and its relevance for managers today, and systems thinking and the challenges of managing in today’s complex and rapidly changing environment. Discussion addresses essential concepts in organizational theory and design, including measuring effectiveness, organizational life cycles, options for organizational structure, and becoming the learning organization.

MGMT 615 Intercultural Communication and Leadership (3)
(Not open to students who have completed MGMT 620 or MGMT 625.) A study of organizational communication, leadership, and decision-making skills essential for all managers in intercultural environments. Theories of culture are examined and applied in relation to leadership style and practices as well as to organizational communication across cultural groups. Team development and leadership are explored in an intercultural environment.

MGMT 630 Organizational Theory and Behavior (6)
(Not open to students who have completed MGMT 610, MGMT 615, MGMT 620, MGMT 625, or MGMT 635.) An overview of the fundamental concepts of organizational theory and organizational behavior in the context of a postindustrial and increasingly global society. Topics include the impact of technological and workforce changes on society, organizational ethics and social responsibility, organizational communication, leadership and decision-making skills in intercultural environments, the history of management thought and its relevance for managers today, and systems thinking and the challenges of managing in today’s complex and rapidly changing environment.
MGMT 640 Financial Decision Making for Managers (3)
Prerequisite: Knowledge of the fundamental concepts of financial accounting and economics, including opportunity cost, the time value of money, and financial analysis. An investigation of financial decision making in business, government, and not-for-profit organizations. Emphasis is on the application of financial and nonfinancial information to a wide range of management decisions, from product pricing and budgeting to project analysis and performance measurement. A variety of decision-making tools (such as break-even analysis, activity-based costing procedures, and discounted cash flow techniques) are studied. Contemporary managerial practices are explored.

MGMT 650 Statistics for Managerial Decision Making (3)
Prerequisite: Knowledge of the fundamentals of statistical methods, techniques, and tools. An examination of how managers organize, analyze, and interpret data for decision making. Focus is on developing skills in using statistical tools to make effective business decisions in all areas of public- and private-sector decision making, including accounting, finance, marketing, production management, and human resource management. Topics include collecting data; describing, sampling, and presenting data; probability; statistical inference; regression analysis; forecasting; and risk analysis. Microsoft Excel is used extensively for organizing, analyzing, and presenting data.

MGMT 670 Strategic Management Capstone (3)
Prerequisite: 24 credits of program coursework, including all core courses. A capstone investigation of how strategy interacts with and guides an organization within its internal and external environments. Focus is on corporate- and business unit-level strategy, strategy development, strategy implementation, and the overall strategic management process. Topics include organizational mission, vision, goal setting, environmental assessment, and strategic decision making. Techniques such as industry analysis, competitive analysis, and portfolio analysis are presented. Discussion covers strategic implementation as it relates to organizational structure, policy, leadership, and evaluation issues. Emphasis is on cultivating the ability to “think strategically” and to weigh things from the perspective of the total enterprise operating in an increasingly global market environment. Case analyses and text material are used to integrate knowledge and skills gained through previous study.

MRKT (Marketing)

MRKT 600 Marketing Management (3)
An introduction to marketing management techniques. Emphasis is on achieving an organization’s marketing objectives by creating value for individual consumers and organizational customers. Discussion covers planning, decision making, marketing goals, and metrics. Topics also include consumer behavior, competitive strategies, and marketing communications (e.g., advertising and digital marketing, marketing research, pricing, and distribution).

MRKT 601 Legal and Ethical Issues in Marketing (3)
An overview of the legal and ethical environment of marketing. Topics include consumer privacy, ethical responsibilities, fair advertising, free speech, global marketing, intellectual property, and regulatory issues.

MRKT 602 Consumer Behavior (3)
A study of the cognitive and behavioral bases underlying consumers’ buying preferences and decision processes, intended for managers and administrators who have to evaluate the efficacy of the firm’s marketing plan. Emphasis is on the role of the communications strategy (e.g., advertising, promotion, and public relations) in achieving the overall marketing objectives.

MRKT 603 Brand Management (3)
A presentation of the concepts and techniques for creating and selecting marketing strategies for an organizational unit that survives on its ability to provide products and services to other organizations. Discussion covers trends toward a marketing culture in both public and private institutions and the implications that this change has for all managers and administrators. Emphasis is on the role of brand equity in achieving a sustainable competitive advantage.

MRKT 604 Marketing Research and Analytics (3)
Prerequisite: MGMT 650. A study of marketing research methods. Focus is on identifying marketing problems and opportunities and developing data-based approaches to generate, refine, and evaluate marketing actions. Topics include designing market research strategies, understanding customer data analysis techniques and their application to real-world marketing problems, and evaluating the managerial implications of analytical results.
MRKT 605 International Marketing Management (3)
An overview of the fundamentals of marketing and marketing management, presented in the context of competitive global environments and diverse national economies. Topics include demand analysis, product development, product pricing, marketing organization, foreign representation and distribution systems, promotion, advertising, and sales and service. Review also covers regulatory issues as they relate to international marketing.

MRKT 606 Digital and Direct Marketing (3)
Prerequisite: MGMT 650. A study of various methods and techniques used in digital and direct marketing. Focus is on assessing customer needs to better use social and digital techniques and other tools in the context of a comprehensive digital marketing strategy. Discussion covers digital analytics concepts and their role in developing optimized digital insight-driven marketing strategies, as well as traditional direct marketing methods to promote customer engagement and deploy multiple marketing channels to enhance customer relationships. Topics also include search engine marketing, digital content marketing, mobile marketing, database marketing, direct mail, telemarketing, and e-mail marketing.

MRKT 620 Marketing Management, Legal, and Ethical Issues (6)
An introduction to marketing management techniques and the legal and ethical environment of marketing. Discussion covers planning, decision making, marketing goals, and metrics. Emphasis is on achieving an organization’s marketing objectives by creating value for individual consumers and organizational customers. Topics include consumer behavior, competitive strategies, marketing communications (e.g., advertising and digital marketing), marketing research, pricing, and distribution. Legal and ethical topics include consumer privacy, ethical responsibilities, fair advertising, free speech, global marketing, intellectual property, and regulatory issues. Students who receive credit for MRKT 620 may not receive credit for ADMN 686, MRKT 600, MRKT 601, or PRPA 604.

MSAF (Accounting and Financial Management)

MSAF 670 Accounting and Financial Management Capstone (3)
Prerequisite: Completion of all program coursework except FIN 645. A capstone study of accounting and financial management that integrates subject matter from both disciplines. Advanced principles, techniques, and theories are applied through the analysis and presentation of case studies by student teams. Assignments include a research paper that comprehensively assesses an important current issue or emerging trend in the fields of financial management and accounting.

NPMN (Nonprofit Management)

NPMN 600 Nonprofit and Association Organizations and Issues (3)
A presentation of the roles and functions of the principal types of nonprofit organizations. Characteristics that distinguish nonprofit organizations from their counterparts in the private and public sectors are introduced. The challenges, opportunities, and common issues facing managers of nonprofit organizations are explored. These issues include administrative cost control, preserving the organization’s legal status and revenue base, staffing and organizing in response to client needs, and ethical considerations. Specific laws, regulations, policies, and court rulings that affect the nonprofit sector are examined.

NPMN 610 Nonprofit and Association Law and Governance (3)
A study of current ideas and approaches related to nonprofit law, governance, and mission. Discussion covers distinctions between nonprofit, educational, charitable, social action, membership, cultural, scientific, environmental, and trade associations as they relate to incorporation, legal standing, tax-exempt status, and governance. Topics include nonprofit governance and trustee issues, as well as lobbying and advocacy, nonprofit liability, personnel, and unrelated business income tax. The relationship of governance and ethics in nonprofit management is examined in depth.
NPMN 620 Nonprofit and Association Financial Management (3)
A detailed study of theories and practices of nonprofit financial management and decision making, including budgeting, reporting requirements, nonprofit accounting, and financial standards. Focus is on the role of financial management in maintaining the fiscal health and legal status of the nonprofit organization. Topics include budgeting, fund accounting, cash flow analysis, expenditure control, long-range financial planning, audits, and grant and contract management. Discussion also covers compliance with nonprofit accounting and financial management principles in reference to maintaining public access and ethical standards.

NPMN 640 Marketing, Development, and Public Relations in Nonprofit Organizations and Associations (3)
A study of the principles and practices required to develop and promote the products, services, positions, and image of nonprofit organizations. Focus is on fundraising and membership recruitment issues. Topics include the design of a marketing strategy and marketing mix, pricing issues, alternative revenue-generating mechanisms, and customer service. Discussion also explores use of the media; advertising and promotion methods; and relationships with business, government, and the community. The integration of sponsors, members, and chapters in the total marketing effort is examined.

NPMN 650 Fundamentals of Association Management (3)
A study of the unique and important niche of associations within the nonprofit sector. Analysis covers the history of associations, political groups, trade lobbying groups, and foundations in relation to their varying missions, internal capacity, shifting environments, and legal status. Associations also are assessed in terms of their wider environment, including the extent of their labor force and command of capital resources. Discussion also covers the wider influence of associations on U.S. economy and policy.

NPMN 655 Process and Outcome Evaluation for Nonprofit Organizations (3)
An examination of the growing importance of process and outcome evaluation to nonprofit organizations in supporting their missions. Various quantitative and qualitative evaluation strategies, as well as quality and process-improvement methodologies, are explored. Topics include important evaluation concepts such as validity and reliability of various data collection tools, various approaches to sampling, and precision of results.

NPMN 660 Strategic Management in Nonprofit Organizations and Associations (3)
A study of the integration and application of strategic management principles, concepts, and practices in nonprofit organizations. Topics include the development of mission statements, goal-setting concepts, and strategy formulation and implementation approaches. Assignments focus on designing organizational plans and strategies relevant to the specific needs of organizations.

OMDE (Distance Education)

OMDE 601 Foundations of Distance Education and E-Learning (3)
A study of the history and evolution of distance education. Social and political/economic factors, theories, learning and teaching models, technology and media innovations, institutions and systems, and major writers that have shaped the development of the field are critically examined. A variety of technologies are used to support the development of foundational skills that are integral to current practice.

OMDE 603 Technology in Distance Education and E-Learning (3)
Prerequisites: OMDE 601 and OMDE 610. A review of the history and the terminology of technology used in distance education. The basic technology building blocks of hardware, networks, and software are identified. Analysis covers the characteristics of asynchronous and synchronous technologies and tools used in teaching and learning, as well as in the administration of distance education. The relationship between technology and the goals of the educational/training organization are critically examined. The relationship between information technology (especially online technology) and distance education is explored. Topics include the criteria and guidelines for selecting technologies for distance education and the future directions of technology in distance education.

OMDE 606 Costs and Economics of Distance Education and E-Learning (3)
Prerequisites: OMDE 603 and OMDE 608. A study of the economics of distance education in the larger context of the economics of education. A variety of methodological approaches (including cost/benefit and cost/effectiveness analyses) are applied to the distance education context. A variety of costing techniques and economic models are explored and applied to different institutional forms and levels of distance education.
OMDE 608 Learner Support in Distance Education and Training (3)
An introduction to the theories and concepts of support for learners in distance education and training. Various types of learner support, including tutoring and teaching; advising and counseling; and library, registrar, and other administrative services, are examined. Discussion addresses management issues, such as planning, organizational models, staffing and staff development, designing services to meet learner needs, serving special groups, and evaluation and applied research.

OMDE 610 Teaching and Learning in Online Distance Education (3)
An exploration of the online teaching and learning dynamic, including its theoretical foundation and best practices. The themes that shape the online teaching/learning relationship are addressed through individual and collaborative projects. Topics include philosophical frameworks; instructional, social, and cognitive presence; interaction, collaboration, and participation; community and engagement; and administration and management.

OMDE 670 Portfolio and Research Project in Distance Education and E-Learning (3)
(Formerly OMDE 690.) Prerequisites: DEPM 604 and DETT 621. A capstone study of distance education and training designed to demonstrate cumulative knowledge and skills through two major projects: an electronic portfolio and a case study. The personal e-portfolio documents credentials and accomplishments to date and also serves as an ongoing resource and record of continuing professional development. The case study, which focuses on a distance education/training program or organization, involves in-depth analysis of the setting and application of concepts and strategies to enhance practice and performance in distance education and training.

PMAN (Project Management)

PMAN 634 Foundations of Project Management (3)
An overview of the theory and practice of managing projects in any industry. Emphasis is on leadership in project management: managing projects or tasks in a team environment; building teams; and utilizing communication, organization, and conflict management skills. Discussion covers project management process groups and how these process groups (initiating, planning, executing, monitoring and controlling, and closing the project or project phase) interact throughout the life cycle of the project. Project management knowledge areas are examined and linked to industry practices for successful management of projects. The goal is to gain a solid understanding of how to successfully manage multiphase projects, work within organizational constraints, set goals linked directly to stakeholder needs, and utilize proven project management tools to complete projects on time and within budget while meeting specifications. Essential concepts, processes, and techniques are applied through management of a team project, which requires regular progress reports and reviews.

PMAN 635 Quantitative Methods in Project Management (3)
Prerequisites: PMAN 634, MGMT 640, TAMAN 625, or ITEC 640 (or an approved course in finance) and MGMT 650 (or an approved course in statistics). An overview of quantitative aspects of managing projects, applying widely used statistical techniques and software tools for project management and risk analysis. Topics include analytical approaches and quantitative methods in project management, such as cash flow analysis, scheduling projects based on resource availability, resource leveling, expediting projects, quantitative risk analysis, and techniques for estimating actual vs. expected project duration and cost. Simulation tools and statistical techniques are used to analyze uncertainty in estimating project cost and duration. Discussion also covers project portfolio management and ways that multiple projects and programs fit into the strategic direction of an organization. The processes, tools, and techniques of project management are applied to a team project with emphasis on quantitative and analytical methods.
PMAN 637 Project Risk Management (3)
Prerequisite(s): PMAN 600 or both PMAN 634 and PMAN 635. An in-depth analysis of risk management methods and cases and project management risk monitoring from strategic, applied perspectives. State-of-the-art tools and techniques for identifying, ranking, and monitoring risks in the project management environment are examined and utilized. Both qualitative and quantitative risk analyses are conducted, and strategies for proactive risk mitigation are developed. Focus is on how a comprehensive risk management approach can enable a project team to proactively manage issues that adversely impact the successful scope, scheduling, control, and completion of a project.

PMAN 638 Project Communications Management (3)
Prerequisite: PMAN 600 or PMAN 634. An overview of conflict resolution processes and methods and the skills needed to manage the human elements within project management—a task as challenging as managing the technical aspects. Topics include critical communication and conflict resolution issues faced by project workers in today’s global corporate environment. Innovative approaches to successfully negotiating and resolving conflicts among team members, colleagues, managers, and stakeholders are introduced and practiced. Proven techniques to make conflict a constructive rather than a destructive experience are analyzed. Emphasis is on case study analysis, effective communication behaviors, negotiation skills, and virtual team processes to successfully lead both domestic and global projects.

PMAN 639 Project Quality Management (3)
Prerequisite(s): PMAN 600 or both PMAN 634 and PMAN 635. A study of the policy, processes, and procedures involved in ensuring that projects will satisfy the objectives for which they were undertaken. Emphasis is on quality planning, quality assurance, quality control, and process improvement. Discussion covers all the activities that determine quality objectives, policies, and responsibilities. The importance of customer satisfaction, prevention over inspection, management responsibility, and continuous improvement is recognized. Topics include control charts, cause and effect diagrams, Pareto charts, failure mode and effect analysis, design reviews, and cost of quality. Course content and approach are compatible with the International Organization for Standardization.

PMAN 641 Project Procurement Management (3)
Prerequisite: PMAN 600 or PMAN 634. An examination of the tools needed for project procurement management. Focus is on determining what needs to be purchased or acquired and determining when and how to acquire it. Topics include planning the contracting efforts (documenting products and services and identifying potential sellers); requesting sellers’ responses (obtaining information, quotation, bids, offers, or proposals); selecting the seller (receiving and reviewing offers, selecting among those potential offers, and negotiating a contract); administering contracts (managing the relationship between buyers and sellers, including documentation, corrective actions, and contract changes); and closing contracts (completing the contract and settling all open issues).

PMAN 650 Financial and Strategic Management of Projects (3)
Prerequisite(s): PMAN 600 or both PMAN 634 and PMAN 635. An investigation of financial and strategic decision making in the management of projects. Topics include estimating project costs from work breakdown structure; formulating, monitoring, and controlling project budgets; monitoring, evaluating, and forecasting project costs, schedule, results, and performance using earned value management; and deriving project cash flows. Discussion also covers the impact of project scope, schedule, and changes; management reserves to cover risks and contingencies; top-down and bottom-up budgeting; investment project analysis; discounted cash flow, internal rate of return, and net present value methodologies; cost of capital; and capital budgeting. Broader issues (such as links between project and corporate financial performance, business ethics, corporate social responsibility, project and organizational culture, information flow, and project sustainability) are also examined.

PRO (Professional Communication and Leadership)

PRO 600 Communicating, Problem Solving, and Leading in Professional Fields (6)
(Required for students in the MBA program.) Make yourself more valuable to an employer by gaining and improving skills in written and oral communication and problem solving. Explore your field by developing connections to your career path, creating a professional social network presence, and using critical thinking to inform decisions. Improve and refine your skills in quantitative reasoning and team leadership as you hone your proficiency with analytical software programs, collaboration tools, and other professional software.
PRPA (Public Relations)

PRPA 600 Public Relations Writing (3)
Writing-intensive practice of the fundamental skills expected of public relations professionals. Topics include the essentials of effective writing: persuasive, informative, and educational writing; and the adaptation of writing styles for specific media and targeted publics. Emphasis is on the use of Associated Press (AP) style.

PRPA 601 Public Relations Theory and Practice (3)
Prerequisite: PRPA 600. A study of the relationship between the management function of policy formulation and the communication process of disseminating ideas and information to the organization’s public. The process of planning and executing public information and public relations programs to address the concerns of the organization’s various publics are examined. Topics include message formation, media selection, and audience differentiation. The impact of the internet on public relations practices is explored in depth.

PRPA 602 Public Relations Techniques (3)
Prerequisite: PRPA 601. A presentation of advanced writing techniques designed to improve skills in the writing of specialized public relations materials. Emphasis is on audience, message, and channel identification. Topics include special communication techniques necessary for broadcast and electronic media.

PRPA 610 Crisis Communication Management (3)
Prerequisite: PRPA 602. An examination of current approaches to crisis definition, issue management, and crisis communications management. Traditional and web-based approaches to analyzing crisis and communications management issues are applied using appropriate public relations research, theory, and case examples to better identify issues and audience segmentation requirements and develop strategic public responses to crisis situations.

PRPA 620 Global Public Relations (3)
Prerequisite: PRPA 602. A study of the role, function, and influence of public relations in a global environment. Topics include global trends, multicultural communication knowledge and skills, multiple cultures and diversity within nations, national media structures and public policy, and international legal and ethical codes in public relations. Global case studies are used to develop and implement strategic and creative communications plans.

PRPA 650 Public Relations Campaigns (3)
Prerequisite: 30 credits of program coursework, including all core and specialization courses (except MGMT 670); approval of program director required for internship option. A study of public relations campaigns that integrates content from previous coursework. Focus is on creating a public relations strategy and a plan to execute that strategy for an existing organization. Critical principles of public relations are reviewed and applied in real-world settings.

SWEN (Software Engineering)

SWEN 603 Modern Software Methodologies (3)
An in-depth overview of widely used modern software development methodologies. Historical software development methods are introduced. Topics include rapid application development and agile development, Scrum, Extreme Programming (XP), Unified Process, EVO (Evolutionary Project Management), lean software development, test-driven development, feature-driven development, Crystal solutions, Rational Unified Process, and other Unified Process methods. Discussion also covers advantages and drawbacks of using each method.

SWEN 645 Software Requirements (3)
An examination of major models of software requirements and specifications, existing software standards and practices, and formal methods of software development. Topics include writing system and software requirements, formal specification analysis, formal description reasoning, models of “standard” paradigms, and translations of such models into formal notations.

SWEN 646 Software Design and Implementation (3)
An exploration of modern software development techniques, tools, and technologies for building large, complex systems. Topics include software development processes and the role of design in those processes. Discussion also covers major design methods, available computer-aided software engineering (CASE) tools, the proper application of design methods, and techniques for estimating the magnitude of the development effort. Object-oriented programming is presented. Focus is on building software products using these technologies.
SWEN 647 Software Verification and Validation (3)
A study of methods for evaluating software for correctness, efficiency, performance, and reliability. Skills covered include program proving, code inspection, unit-level testing, and system-level analysis. The difficulty and cost of some types of analysis and the need for automation of tedious tasks are examined. Emphasis is on problem-solving skills, especially in analyzing code.

SWEN 651 Usability Engineering (3)
A study of the theory and practice of designing user interfaces for interactive systems. Topics include the principles of usability engineering and basic rules for usable design. User interfaces are evaluated using techniques such as contextual inquiry, task analysis, and usability testing. Discussion also covers when these techniques are most appropriate.

SWEN 656 Advanced Software Design and Implementation (3)
Prerequisite: SWEN 646. An exploration of software design and implementation for reducing the complexity of systems. Topics include software design patterns, object-oriented programming, and aspect-oriented programming design. Focus is on building software products using these technologies.

SWEN 661 User Interface Implementation (3)
Prerequisite: SWEN 651. An examination of all types of user interfaces. Topics include developing user interfaces using mobile, desktop, and web technologies. Focus is on building user interfaces using these technologies.

SWEN 670 Software Engineering Project (3)
Prerequisite: 30 credits of program coursework, including all core courses. A comprehensive examination of the tools, skills, and techniques of software engineering and their application. Completion of a major team project is designed to integrate knowledge and skills gained through previous study and provide experience of the constraints commonly experienced in industry (scheduling, vagueness of clients). Project requires forming teams (organization) and scheduling work to meet the deadlines imposed by the contract (syllabus).

SYSE (Systems Engineering)

SYSE 610 Systems Engineering Overview (3)
An introduction to systems engineering using examples of manufacturing, information, and mechanical systems that involve the integration of different technologies. Emphasis is on the role of the systems engineer. Systems thinking principles and complex systems and system-of-systems theory are reviewed. Discussion covers various approaches to system dynamics modeling. An overview of the system life cycle through conception, design and development, integration and testing, and deployment and support is provided.

SYSE 620 Requirements Engineering (3)
An in-depth examination of the various techniques used in establishing and specifying system requirements, both physical and functional. Topics include system decomposition, requirements traceability, configuration management, and requirements validation. Several U.S. and international standards are examined as examples of requirements specification.

SYSE 625 Model-Based Systems Engineering (3)
Prerequisite: SYSE 610. An introduction to formal system modeling and simulation methods using software-based approaches, which are replacing more traditional document-based descriptive modeling methods. Discussion covers the trend in industry toward standardized modeling techniques using software, especially SysML (Systems Modeling Language) computer packages, allowing greater consistency in system model representations between technologies, across industries, and even across language barriers. Topics include ways that computers can represent system models in detail and provide complex system simulations with minimum effort using several different system modeling and simulation software platforms. The objective is to be able to determine when and how model-based systems engineering (MBSE) approaches are useful, which tools to use, which data to use as input to the MBSE tools, and how to use the results from the tools in decision making.

SYSE 630 System Design and Development (3)
Prerequisites: SYSE 610 and SYSE 620. A detailed exploration of the design and development phases of the system life cycle. Discussion covers several tools used for systems simulation and computer-aided design. Topics also include methods and policies for change control and the principles of quality assurance as an underlying concept in systems design.
SYSE 640 System Integration and Test (3)
Prerequisites: SYSE 610 and SYSE 620. A review of various strategies used to integrate system components and verify satisfaction of requirements at both subsystem and overall system levels. The concept of formal verification, validation, and accreditation (VVandA) is discussed. Examples of automated software testing tools are also examined.

SYSE 650 Design Considerations (3)
Prerequisites: SYSE 610 and SYSE 620. An introduction to system engineering subdisciplines that are critical in system design and deployment. Discussion covers reliability, availability, and maintainability (RAM) factors. Concepts in human factors engineering, system safety, and quality assurance are also reviewed.

SYSE 660 Systems Engineering Management (3)
Prerequisites: SYSE 630 and SYSE 640. An examination of the role played by the systems engineer as a liaison between technical specialists, business managers, and internal users or external customers. Discussion covers the traditional systems development life cycle, domestic and internal standards, and the evolving emphasis on agile methods and adaptive processes. Topics also include risk management and organizational considerations in outsourcing.

SYSE 670 Systems Engineering Capstone (3)
Prerequisites: SYSE 640 and SYSE 650. A project-based capstone study of systems engineering designed to integrate knowledge and skills gained in previous study. Projects focus on demonstrating the ability to construct a system design and develop a plan for a system’s development and support.

TLMN (Telecommunications Management)

TLMN 602 Telecommunications Industry: Structure and Environment (3)
A study of major technological, legal, and regulatory developments (national and international) that have molded the structure of the current telecommunications industry. Topics include early legislation, the regulated monopoly, antitrust, divestiture, and recent legislation that has led to the current industry environment of competition and incipient integration of different industry segments. The roles of various national and international institutions in shaping the telecommunications industry are discussed.

TLMN 623 Telecommunications Networks (3)
A study of computer networks and telecommunications functionality, characteristics, and configurations. Recent advances in standardization, internetworking, and deployment of LANs (local area networks), MANs (metropolitan area networks), and WANs (wide area networks) are examined. Topics include network topologies; protocols; architectures; and current and emerging protocols such as asynchronous transfer mode (ATM), 10 gigabit Ethernet, and the Open Systems Interconnect (OSI) Reference Model. Emphasis is on emerging trends in telecommunications, network technologies, and services. Discussion also covers strategies for network planning, implementation, management, and security.

TLMN 630 Satellite Communication Systems (3)
An analysis of issues surrounding the design and use of satellite communications systems. Topics include satellite system characteristics such as type, class (bandwidth, standards, and availability), applications, interfaces, traffic patterns, network installation, performance criteria, hardware, and cost. Current and planned satellite communications are examined and compared to future needs and technologies.

TLMN 641 Network Management and Design (3)
A study of techniques that network managers can utilize to maintain and improve the performance of a telecommunications network. Network management systems are defined and explained. A description of how software package programs can monitor real-time performance of a network to identify problems is provided. Emphasis is on the five tasks traditionally involved with network management (fault management, configuration management, performance management, security management, and accounting management). Examples of current specific network management products are reviewed. Discussion also covers how the performance data gathered from monitoring can be archived and used later as an input when decisions are made on changes in the network architecture. Network design is studied for the development of a new network architecture when only user requirements are known.
TLMN 645 Wireless Telecommunications Systems (3)
A review of wireless telecommunications systems from micro-cell to global infrastructures. Emphasis is on the technology, applications, and limitations of these systems, which have become an essential element of the world information infrastructure. Topics include cellular communication principles, coding, antenna and propagation effects, channel access schemes, traffic engineering, and wireless network design, as well as terrestrial systems such as cellular, personal communication services (PCS), dispatch, wireless local-area networks (LANs), and wireless data systems. Discussion also covers market trends, regulations, and standards. Wireless systems are compared with other telecommunications alternatives available to organizations and their role is assessed.

TLMN 670 Capstone Course in Telecommunications (3)
Prerequisite: 27 credits of program coursework. The application of knowledge and skills gained from previous study in telecommunications to real-world projects and to related business, technical, and ethical issues. Topics include entrepreneurship and venture creation, emerging telecommunications technologies and their applications, future trends, ethical development, and management. Focus is on demonstrating analytical, entrepreneurial, leadership, planning, managerial, and communication skills through a strategic research and development project for a telecommunications company.

TLP (Transformational Leadership)

TLP 610 Repositioning Your Leadership Skills (6)
Prerequisite: DCL 600. Discover how leadership takes place within organizations and the most effective leadership styles for directing individuals, projects, and groups to success. Demonstrate the differences between managing and leading with a focus on motivating and inspiring individuals in preparation for future challenges and opportunities. Explore the various roles that leaders take on in domestic and global markets, and the ways leaders influence events that can drive success through individual and collaborative efforts. Create your own personal brand as you begin a journey to becoming a transformational leader.

TLP 620 Leading in the Organization (6)
Prerequisite: TLP 610. Analyze the dynamics involved in leading a workforce of multigenerational and diverse talent. Develop strategies for facilitating an inclusive work culture and maximizing the varied skill sets and experiences of employees. Weigh the impact of workforce change on organizations and consider the potential challenges that run counter to respectful, civil, and ethical work environments. Create retention and succession planning strategies and techniques for coaching and mentoring emerging leaders.

TLP 630 Leading with Strategy and Performance Measures (6)
Prerequisite: TLP 620. Gain the tools to assess the organization’s bottom line and action steps for growth and sustainability. Apply strategic management theories and practices to measure and motivate organizational performance, identify trends, and recognize the different stages of the organization’s life cycle. Become proficient using tools to review and interpret analytics, market research, and financial data that can drive short- and long-range strategic decisions, and identify potential deficiencies that run counter to the organization’s mission and goals.

TLP 640 Leading Through Change and Uncertainty (6)
Prerequisite: TLP 630. Apply change management techniques for leading and maintaining stability during unplanned, turbulent events within the organization. Analyze and implement strategic planning and decision-making approaches to diagnose the symptoms and predictors of organizational challenges and obstacles to change. Use change management models to assess organizational performance and process reengineering and forecast outcomes and resistance to change at the individual, group, and organization levels.

TLP 670 Leadership Capstone (6)
Prerequisite: TLP 640. Lead a real-world consulting project. Apply the techniques of project management as you collaborate with a partnering organization to develop a strategic and financial plan to address an organizational issue. Use client-relationship management, organizational diagnosis models, and coaching and presentation skills to complete your consulting project and showcase your solutions and plans to your partner organization.
UCSP (Special Topics)

UCSP 605 Effective Graduate Writing (0)
(Recommended preparation for students who want to improve their writing skills.) An introduction to the writing skills needed for effective academic writing. Skills addressed include using accurate grammar and punctuation; summarizing and synthesizing texts; developing well-organized, well-supported informative essays; integrating sources into writing and formatting academic papers using APA guidelines; and revising writing to produce clear, concise documents.

UCSP 615 Orientation to Graduate Studies at UMGC (0)
(Required within the first 6 credits of graduate study for all new graduate students, except those in programs requiring CBR, DCL, or PRO 600.) An overview of the skills needed for academic and professional success. Focus is on enhancing communication and critical thinking skills. Assignments provide familiarity with tools such as social media and library and information resources. APA style and resources are also addressed.

UCSP 620 Introduction to Accounting and Financial Management (0)
(Recommended as preparation for MGMT 640 or ACCT 610 for students with little or no background in accounting and finance.) A basic study of accounting and financial management concepts and their application in analyzing financial statements and estimating the value of long-lived capital projects and investments. The financial statements of actual companies are analyzed using financial ratios. Future and present value of financial and real assets/investments are calculated based on the time value of money. Emphasis is on gaining an appreciation for how financial management and accounting information can be used to support financial analysis, valuation, and decision making in various contexts.

UCSP 630 Introduction to Research Methods (0)
(Recommended as preparation for MGMT 650 or HIMS 650 for students who lack a background in statistics.) A presentation of basic research techniques and methodologies used in organizational research and evaluation studies to make business decisions. Focus is on applying basic research techniques to assess the performance of individuals, work groups, and organizations. Topics include principles of good data collection, presentation of data in tables and charts, summary and description of numerical data, basic probability and discrete estimation, the fundamentals of hypothesis testing, and the use of existing research-based materials to solve business problems. Discussion emphasizes basic approaches and beginning skills necessary to evaluate research materials and their use in decision making.

UCSP 635 Essentials of Computer Programming (0)
(Recommended preparation for bioinformatics, data analytics, database technology, and software engineering students with little or no programming experience.) An applied approach to creating computer programs. Discussion covers all aspects of basic programming, including variables, arrays, conditions, and input/output.

UCSP 636 Structure of Computer Programming (0)
(Recommended preparation for bioinformatics, data analytics, database technology, and software engineering students with some programming experience, typically with older languages such as PRG and COBOL.) Prerequisite: UCSP 635. An applied approach to creating computer programs. Discussion covers aspects of programming related to the structure of the program, including loops, procedures/functions, and leveraging other software libraries/packages.
University System of Maryland

Board of Regents (2018–2019)
Linda R. Gooden, Chair

Michael Brown, Program Director, Computer Science in Cybersecurity
Barry Douglass, Program Director, Information Systems Management
David Johnson, Program Director, Digital Media and Web Technology
Leslie Pang, Program Director, Information Technology Core, Systems and Services, and Systems Engineering

Faculty
The university has a large and distinguished faculty. UMGC faculty members consistently win awards, publish scholarly works, and contribute to the intellectual understanding of their fields. They are well respected by both practitioner and academic peers. In keeping with UMGC’s mission, UMGC faculty members are as nontraditional as their students, bringing practical as well as academic experience in their fields of expertise. Because of this, they are uniquely qualified to teach and guide students toward a richer and more robust understanding of how their academic learning translates into practice.

The full list of faculty members, including their academic rank and credentials as well as any administrative title, is available online at umgc.edu/facultylist.

Grading Methods

The Graduate School has four grading methods: standard, satisfactory/unsatisfactory, satisfactory/fail, and audit. The most commonly used is the standard method. The satisfactory/unsatisfactory method is available only for noncredit courses. The satisfactory/fail method is restricted to certain specified courses. Any course may be audited. Regulations for each grading method are provided in the following paragraphs.

<table>
<thead>
<tr>
<th>GRADE OR MARK</th>
<th>INTERPRETATION</th>
<th>QUALITY POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>

<tr>
<td>W</td>
<td>Withdrawal</td>
<td>0</td>
</tr>
</tbody>
</table>

Standard

Unless you choose the audit option at the time of registration, you will be graded according to the standard grading method. Under the standard grading method, you earn a grade of A, B, C (for courses in which the grade of C is available), F, or FN on the basis of your performance in meeting the requirements of each course. All grades received under the standard grading method are included in calculating the grade point average (GPA).

Satisfactory/Unsatisfactory

Noncredit courses, currently designated UCSP or ASC, are graded on a satisfactory/unsatisfactory basis. You may not choose to take other graduate courses on a satisfactory/unsatisfactory basis. This grading method does not include an option for requesting a mark of Incomplete.

Satisfactory/Fail

This grading method is available only on a limited basis. Although a grade of satisfactory (S) earns credit toward graduation, it is not included in calculating your GPA. While a failing grade (F) earns no credit, it is included in computing your GPA.

Audit

If you do not wish to receive credit, you may register for courses as an auditor once you are admitted. You must indicate this choice when you register and must still fulfill all prerequisites. You may request a change from credit to audit status anytime before the end of the second week of classes.

Audited courses are listed on the permanent record, with the notation AU. No letter grade is given for audited courses, nor are credits earned. If you receive financial aid, you should check with a financial aid advisor before selecting audit as a grading option as this may affect financial aid.

Grades and Marks

The Grade of A: Excellent

Only students who demonstrate exceptional comprehension and application of the course subject matter merit an A.

The Grade of B: Good

The grade of B represents the benchmark for The Graduate School. It indicates that you have demonstrated competency in the subject matter of the course: you have fulfilled all course requirements on time, have a clear grasp of the full range of course materials and concepts, and are able to present and apply these materials and concepts in clear, reasoned, well-organized, and grammatically correct responses, whether written or oral.

The Grade of C: Below Standards

The grade of C indicates that your work was not considered sufficient to meet overall standards for work at the graduate level. Note that the grade of C is not available for all courses. Please refer to Academic Standards (p. 147) for further information on the implications of a grade of C.

The Grade of F: Failure

The grade of F means you failed to satisfy the minimum requirements of a course. Although it carries no credit, it is included in calculating the GPA. If you earn a grade of F, you must register again for the course, pay the applicable fees, repeat the course, and earn a passing grade to receive credit for that course.

The Grade of FN: Failure for Nonattendance

The grade of FN is assigned if you never attend or participate in a course or if you cease to attend or participate within the first 60 percent of the course and do not officially drop or withdraw.
from the course. An FN grade results in zero quality points and no credit earned. It is included in calculating your GPA and may affect your academic standing. If you receive a grade of FN, you must register again for the course, pay the applicable fees, repeat the course, and earn a passing grade to receive credit for that course.

The Mark of G: Grade Pending
The mark of G is an exceptional and temporary administrative mark given only when the final grade in the course is under review. It is not the same as a mark of Incomplete.

The Mark of I: Incomplete
The mark of I (Incomplete) is an exceptional mark, given only if your completed coursework has been qualitatively satisfactory, but you have been unable to complete all course requirements because of extenuating academic or personal circumstances beyond your control. To be eligible for an I, you must have completed 60 percent or more of the course requirements with an overall grade of B or better. You must request an I from your faculty member before the class ends. Faculty, however, are not required to approve the request. If your request for a mark of I is approved, you must arrange fulfillment of course responsibilities with your teachers by the assigned deadline to receive credit.

The mark of I is not available for noncredit courses. The doctoral program and master’s degree programs requiring DCL 600, PRO 600, and CBR 600 have additional parameters for the mark of I. Consult your course syllabus for detailed information. Refer to UMGC Policy 170.71 Policy on Grade of Incomplete at umgc.edu/incomplete and your course syllabus for more information, particularly on deadlines.

The Grade of S: Satisfactory
The grade of S is awarded only for select courses. Although the grade of S confers credit and appears on the permanent record, it is not included in calculating the GPA.

The Grade of U: Unsatisfactory
The grade of U indicates that work for the course was not completed at a satisfactory level. Although it appears on the permanent record, it carries no credit and is not included in calculating the GPA.

The Mark of W: Withdrawal
The mark of W is assigned when you withdraw from a course. This mark will appear on your transcript but will not be included in calculating your GPA. For purposes of financial aid, the mark of W is counted as attempted hours.

The mark of W can be posted only when you withdraw from the course through MyUMGC before the deadline for withdrawal.

The withdrawal process is described on p. 154.

Computing the Grade Point Average
Your cumulative GPA is computed at the end of every term (fall, spring, or summer), based on all your graded coursework at UMGC, using the quality points assigned to each grade or mark (detailed in the chart on p. 144). First, the quality-point value of each grade or mark is multiplied by the number of credits; then the sum of these quality points is divided by the total number of credits attempted for which a grade of A, B, C, F, or FN was earned.

Changes in Grade
In accordance with relevant policies, faculty members may revise a grade previously assigned only if your grade was mis-calculated or a mark of I was submitted and must be changed. Any revision must be made no later than four months after the original grade was awarded.

Repeated Courses
If you failed or withdrew from a course, you must repeat the course to establish credit in it. In such a case, you must register, pay the full tuition and fees, and repeat the entire course successfully.

When you repeat a course, only the grade earned in the last attempt is included in the calculation of your GPA. For purposes of financial aid, both attempts are counted toward your completion rate. Both grades are entered on the permanent record, with a notation indicating that the course was repeated. You cannot increase the total hours earned toward a degree by repeating a course for which you already earned a passing grade.

If you are enrolled in a second graduate program, you may not repeat coursework from your first program, even if your second program requires one or more of the courses required in your first program. In these cases, a course substitution may be granted.

Special rules on repeating courses apply to doctoral students. See p. 148 for more information.
Scholastic Recognition

Academic Honor Societies

IMA ACCOUNTING HONOR SOCIETY
The IMA (Institute of Management Accountants) Accounting Honor Society recognizes and honors academic achievement in the study of accounting and provides an opportunity for students to differentiate themselves as they begin their career journey. To be eligible, you must be enrolled in an accounting or finance program at UMGC, have taken a minimum of three accounting courses (which may include courses in accounting principles), and have a GPA of 3.0 overall and in accounting coursework.

If you are interested in joining the honor society, apply directly on the IMA Accounting Honor Society website at imanet.org/iahs. You will need to include a transcript with your application.

PHI KAPPA PHI
As the nation’s oldest, largest, and most selective collegiate honor society for all academic disciplines, Phi Kappa Phi promotes the pursuit of excellence in all fields of higher education. It recognizes the outstanding achievements of students, faculty, and others through election to membership and through awards for distinguished scholarly achievement. To qualify, you must be in the final term of your graduate degree coursework and in the upper 10 percent of your graduating class. For more information on the Phi Kappa Phi chapter, visit polaris.umgc.edu/phikappaphi.

PI LAMBDA THETA
Pi Lambda Theta, one of the nation’s most prestigious education honor societies, was designed to advance education as a profession. The society honors the accomplishments of exemplary educators and supports the continuing development of knowledge and skills of education students. Membership is open to students in the Master of Arts in Teaching program. To be eligible, you must have completed at least 12 credits in the program with a minimum GPA of 3.5.

SALUTE
SALUTE (which stands for Service, Academics, Leadership, Unity, Tribute, Excellence) is the first national honor society established for student veterans and military servicemembers in two- and four-year institutions of higher education. Members include retirees, disabled veterans, active-duty military, National Guard members, and reservists who are returning to higher education, starting second careers, or helping fund their college careers with military service.

You are invited to apply if you have completed at least 12 credits as a graduate student at UMGC, have a cumulative GPA of 3.5 or higher, and qualify as a military/veteran student under locally derived and maintained definitions. In other words, you must have served or currently be serving in the military, National Guard, or reserves; if no longer serving, you must have been honorably discharged from service. In addition, you must also have served as a mentor in the One2One mentoring program for at least one term or be an active Mil-Vet Checkpoint communicator (posting feedback on articles or to the social wall at least twice a month) and maintain the highest ethical standards.

UPSILON PHI DELTA
Upsilon Phi Delta is a national academic honor society founded by the Association of University Programs in Health Administration for students in healthcare management and policy. It recognizes, rewards, and encourages academic excellence in the study of health administration. To be eligible for graduate student membership, you must have a cumulative GPA of 3.5 or higher and at least 18 credits of graduate coursework, and you must provide evidence of outstanding scholarship. You may obtain more information about the UMGC chapter, including membership criteria, by sending an e-mail to HonorsHCAD@umuc.edu.

UPSILON PI EPSILON
The Kappa Chapter of Upsilon Pi Epsilon, the international honor society for the computing and information disciplines, is open to graduate and undergraduate IT students. You may be considered for membership if you are pursuing one of the following degrees: MS in Cloud Computing Architecture, Cybersecurity Management and Policy, Cybersecurity Technology, Data Analytics, Digital Forensics and Cyber Investigation, or Information Technology (with a specialization in database systems technology, informatics, information assurance, software engineering, or telecommunications management). To qualify for membership, you must have completed at least 18 credits at UMGC toward your degree, with a cumulative GPA of 3.5 or higher.

Presidential Management Fellows Program
If you are seeking a graduate degree at UMGC, you may apply to the Presidential Management Fellows Program, a prestigious leadership development program that is a pathway to a senior-level career with an agency of the federal government. This highly selective program operates under the auspices of the federal Office of Personnel Management. To learn about the application process, contact Graduate Student Affairs at 800-888-8682, ext. 2-2400, or graduateschool@umuc.edu. More information is available at pmf.gov.
Academic Standards

Grade Point Average
As a graduate student, you must maintain a cumulative and term GPA of 3.0 or higher at all times to remain in good academic standing.

Academic Standing for Master’s Degree and Certificate Programs
The Graduate School assesses your academic standing at the end of every term. Your GPA is computed for all UMGC graduate-level graded coursework to make a determination of academic standing as described below. For details, see UMGC Policy 158.01 Academic Standing Status for Graduate Students (umgc.edu/policies/academicpolicies/aa15801.cfm).

GOOD ACADEMIC STANDING
If you have a term and cumulative GPA of 3.0 or higher, you are in good academic standing.

ACADEMIC PROBATION
If you have a term or cumulative GPA below 3.0, you will be placed on academic probation in your next term of enrollment. Academic probation is a temporary status. If you are placed on academic probation, you have up to two terms of enrollment in which to restore your GPA to 3.0. During that time, you must enroll only in the course(s) for which you received a grade that caused your cumulative or term GPA to drop below 3.0; you may not attempt any other coursework until you earn a grade of B or better in the repeated course(s).

Failing to restore your GPA to 3.0 or higher or earning any grade below B while on probation will result in academic dismissal. If you restore your GPA to 3.0 or higher, you will be returned to good academic standing. You should seek guidance and advice from an academic advisor if you are placed on academic probation.

DISMISSAL
If you are on academic probation and you fail to raise your GPA to 3.0 or higher or if you earn a grade below B during the probationary period, you will be dismissed. Once dismissed, you are ineligible to enroll in UMGC graduate courses and may be readmitted to The Graduate School only under the conditions for Reinstatement or Restart described in the following paragraphs.

Reinstatement After Dismissal
If you were academically dismissed from UMGC, you can submit one request for reinstatement. Contact The Graduate School at graduateschool@umuc.edu and request a Reinstatement Request Form, then submit the completed form and documentation to The Graduate School Reinstatement Review Committee for consideration. You will be required to show that you have improved your academic skills and made changes in your academic strategies that increase your likelihood for success in graduate studies, should you be approved for reinstatement.

If you are approved for reinstatement, you will be admitted for one term and placed on academic probation. You may also be required to meet additional conditions, such as working with a coach or tutor or enrolling in specific courses. By the conclusion of this term, you must be in good academic standing to remain enrolled.

If you are reinstated to the same program in which you were last enrolled, you must immediately repeat the course(s) for which you received the grade(s) that caused your cumulative GPA to drop below 3.0. If you are reinstated to a different program, your previous coursework and credits will not apply.

If you fail to attain a cumulative GPA of 3.0 or higher or if you earn a term GPA below 3.0, you will be academically dismissed, and you will not be eligible to apply for reinstatement or a restart again.

Restart After Dismissal or Academic Probation
If you were academically dismissed from The Graduate School, have not been approved for reinstatement (as described in the preceding section), and have not attended Graduate School classes for a period of at least five consecutive years, you may request a one-time restart. You may also request a one-time restart if you were on academic probation when you last attended The Graduate School and have not attended Graduate School classes for a period of at least five consecutive years. Grades and credits previously earned will not apply toward any program you pursue upon your return, and you must fulfill the program requirements in effect at the time you restart.

Program Completion Requirements
The award of degrees and certificates is conditional upon satisfactory completion of all program requirements, compliance with all UMGC policies, and good academic standing (described at left). Graduation clearance will not be granted if you are not in good academic standing, have outstanding debt to UMGC, or have any outstanding misconduct charges or unsatisfied sanction restrictions. Individual programs may have additional requirements that must be met before graduation clearance can be granted.
ACADEMIC AND ADMINISTRATIVE REQUIREMENTS

Time Limit for Degrees and Certificates
All requirements established for the completion of a master’s degree or certificate program listed in this publication must be fulfilled within five consecutive years. The time limit is calculated from the term in which you successfully complete the first credit course that applies to the program. It does not include the introductory courses DCL 600, CBR 600, and PRO 600 but does include courses transferred from other institutions and courses transferred from the UMGC Undergraduate School as part of an articulation agreement.

All requirements established for the completion of a doctoral degree program listed in this publication must be fulfilled within seven consecutive years. The time limit is calculated from the term in which you successfully complete the first credit course that applies to the program, except for the prerequisite course for the Doctor of Business Administration, DBA 600.

Doctoral Program Standards
The doctoral programs require more than maintaining a GPA of 3.0 to remain in good standing. If you receive a grade below B in a course, including a dissertation course, you must repeat that course in the next term of enrollment and earn a grade of B or better. The option to repeat a course may be exercised only once. If you receive a second grade below B, you will be dismissed from the doctoral program, regardless of your GPA.

Further information is available in section III. D. of UMGC Policy 158.01 Academic Standing Status for Graduate Students (umgc.edu/policies/academicpolicies/aa15801.cfm).

Degree Requirements and Continuous Enrollment
The UMGC degree and certificate requirements that apply to you are those that were in effect when you completed the first credit course that applied to your program, that is, when you began continuous enrollment.

To be considered continuously enrolled, you must be or have been enrolled at UMGC, and you must have had no more than two years of nonattendance. After two years of nonattendance, you must reapply for admission to resume enrollment.

If you have not been continuously enrolled, the requirements that apply are those in effect at UMGC when you completed the first credit course that applied to your program after you resumed continuous enrollment. If you choose to change your program or add a new one, you are subject to the requirements in effect at the time of the change or addition. In both cases, previously completed coursework may not apply to new requirements.

Responsibilities of the Student

Attendance
You are expected to attend all on-site and online classes and any related activities regularly and punctually.*

If you are absent from class, you are responsible for completing any missed coursework, as indicated in the course syllabus. You also are responsible for obtaining information about each class session, including any announcements and assignments you missed. Failure to complete any required coursework as scheduled may adversely affect your grade. Faculty members are not expected to repeat material that you missed because of absence.

You may not give permission to another person to accompany you to an on-site class meeting, to attend an on-site class meeting in your place, or to access or attend your online class.

Academic Integrity
Integrity in teaching and learning is a fundamental principle of a university. As a member of the International Center for Academic Integrity (academicintegrity.org), UMGC subscribes to the center’s definition of academic integrity as “a commitment, even in the face of adversity, to six fundamental values: honesty, trust, fairness, respect, responsibility, and courage.” UMGC believes that all members of the university community share the responsibility for academic integrity.

As a UMGC student, you are expected to conduct yourself in a manner that will contribute to the maintenance of academic integrity in accordance with the university’s philosophy of academic integrity (umgc.edu/integrityphil). You are responsible for understanding and avoiding academic misconduct. Attempts to engage in academic misconduct or to assist others in doing so are prohibited. Resources to help you uphold the highest standards of academic integrity are available at umgc.edu/academicintegrity. UMGC’s complete policy on Academic Dishonesty and Plagiarism is available at umgc.edu/academic-integrity.

Intellectual Property
The primary mission of universities is to create, preserve, and disseminate knowledge. When that knowledge takes the form of intellectual property, a university must establish a clear and

* The UMGC policy on religious holidays is available online at umgc.edu/policies/academicpolicies/ao05100.cfm.
explicit policy that will protect the interests of the creators and
the university while ensuring that society benefits from the fair
and full dissemination of that knowledge. UMGC's policy on
intellectual property is available online at umgc.edu/policies
/researchpolicies/research19000.cfm.

Academic Load

FOR MASTER’S DEGREE PROGRAMS
If you are enrolled in a program that operates on a three-term
calendar for the academic year, you are considered a full-time
graduate student if you are registered for at least 9 credits
of graduate coursework per term and half-time if you are
enrolled for 6 credits per term.

If you are enrolled in a program that operates on a four-term
calendar for the academic year, you are considered a full-time
graduate student if you are registered for 6 credits per term.

Given the time commitment required for graduate study, the
normal academic load is 6 credits per term. The Graduate
School strongly recommends that you limit your academic
load to conform with the demands of your employment and
the time you have to prepare for class.

Taking more than 6 credits per term is not allowed in any
programs that operate on a four-term calendar or in the
MS in Data Analytics program but may be allowed in most
programs that operate on a three-term calendar, if certain
conditions are met.

If you have a compelling need to take more than 6 credits per
term (and are enrolled in a program that allows course over-
loads), you may submit to your advisor a written request to take
3 additional credits of coursework (i.e., one additional course).
You must have fulfilled the prerequisites for the additional
course you wish to take. In the request, you must indicate your
acceptance of the academic risk entailed in adopting the course
overload.

All requests for exceptions to the maximum recom-
mended course load must be made at least one month before
the beginning of a term and are subject to approval by the
Office of the Dean for The Graduate School.

To be considered for a course overload, you must

■ Be a degree- or certificate-seeking student.
■ Have no previous grades of C, F, or FN.
■ Have no current marks of I.
■ Have never been on academic probation.

See UMGC’s Policy 215.00 on Student Academic Load and
Enrollment Status at umgc.edu/policies/academicpolicies
/aa215.00.cfm for more information.

FOR DOCTORAL PROGRAMS
If you are enrolled in a doctoral program, you are considered
full-time if you are registered for 6 credits.

Given the time commitment required for graduate study, the
maximum course load for the doctoral program is 6 credits
per term.

Because courses in the doctoral programs follow a defined
sequence and build on competencies developed in previous
coursework, course overloads are not allowed in these programs.

Grievance/Appeal Procedure
If you have legitimate complaints about Graduate School
faculty, staff members, academic departments, or administra-
tive units, contact your program chair. The most up-to-date
contact information is provided online at umgc.edu/complaint-
resolution. For information on the procedure to file a formal
appeal or grievance about the actions of a faculty member
or administrative staff member, contact Graduate Student
Affairs, The Graduate School, at 800-888-8682, ext. 2-2400,
or graduateschool@umuc.edu. More information is available
online at umgc.edu/policies/academicpolicies/aa13070.cfm and
umgc.edu/policies/academicpolicies/aa13080.cfm.

If you are not satisfied with the outcome of your student
grievance, you may submit your complaint to an external
entity. Contact information for external entities is available
at umgc.edu/complaint-resolution.

Connectivity and Technical Fluency
As a student in The Graduate School, you must own or have
access to a personal computer and the internet. In some classes,
you may participate in synchronous computer-based class dis-
cussions and study group activities.

As a graduate student, you must also be able to reach fellow
students, faculty, and the university via e-mail. You will be
assigned a UMGC account, which includes e-mail, as soon
as you register. While you are not required to use the UMGC
e-mail address, you must provide and maintain a current e-mail
address through MyUMGC (my.umgc.edu).

In addition, you are expected to have a working knowledge
of, and access to, a basic word processing program, such as
Microsoft Word; a spreadsheet program, such as Microsoft
Excel; internet e-mail services; Microsoft Windows; and the
World Wide Web.

If you require further training in the use of internet services
and basic software packages, you may wish to consult the UMGC
undergraduate schedule of classes or speak with an under-
graduate advisor regarding appropriate classes. You can access the online schedule at umgc.edu/schedule, and you may reach advisors at 800-888-8682, ext. 2-2100.

Transfer of Credits from UMGC
To have credits earned through UMGC transferred, you must obtain authoritative guidance from the institution to which you intend to transfer—even if it is another institution in the University System of Maryland. The transferability of credits earned is always at the discretion of the receiving institution. Only that institution can answer specific questions about whether it will accept transfer credit, as well as whether any credits may satisfy its admission, residency, and degree requirements or apply to its curricula.

Code of Civility
To encourage the development and growth of a supportive and respectful academic environment for all students, faculty, and staff, UMGC has created the Code of Civility, which is available at umgc.edu/civility.

Code of Student Conduct
UMGC Policy 151.00 Code of Student Conduct outlines prohibited conduct and the procedures by which such conduct is addressed. The university reserves the right to take appropriate action to protect the safety and well-being of the UMGC community.

You may be accountable to both civil authorities and to UMGC for acts that constitute violations of law and of this code. Disciplinary action at UMGC normally will go forward pending criminal proceedings and will not be subject to challenge on the grounds that criminal charges involving the same incident have been dismissed or reduced.

In every case of alleged Code of Conduct violation, the burden of proof rests with the complainant, who must establish the responsibility of the person accused by a preponderance of evidence. In cases where the complainant wishes to remain anonymous, the burden of proof rests with the administrator.

See umgc.edu/policies/studentpolicies/stud15100.cfm for additional information about the UMGC Code of Student Conduct.
General Information
Before the beginning of each academic term, UMGC holds various events online, as well as open houses in the Maryland area, for new and prospective students. These events offer an opportunity to learn about UMGC and its programs, student services, academic and career options, faculty members, and fellow students. You can apply for admission and enroll in courses during the on-site open houses.

For general information or to be directed to specific offices, call 800-888-8682. Phone representatives are available for general information from 6 a.m. to 10 p.m., Monday through Saturday. Most UMGC offices are open weekdays from 8:30 a.m. to 5 p.m. eastern time.

Admission
Admission Requirements
UMGC's graduate admissions policy is available online at umgc.edu/policies/academicpolicies/aa17010.cfm.

Most applicants who have graduated from a regionally accredited degree-granting university or college are eligible for admission. Graduates from other accredited institutions may be considered on a case-by-case basis. Graduate Record Examination (GRE) or Graduate Management Admission Test (GMAT) scores are not required. Applicants who are not seeking a degree or certificate must meet the same criteria and are limited to taking a maximum of 12 credits.

Admission Procedures
GRADUATE CERTIFICATE AND MASTER'S DEGREE PROGRAMS
If you are applying for admission to a graduate certificate or master's degree program, you must submit a completed application for admission and a nonrefundable application fee.

To be admitted to most graduate programs or to take graduate courses without pursuing a degree, you must submit official transcripts demonstrating completion of a bachelor's degree from a regionally accredited college or university by the last day of your first term of enrollment at UMGC. Until the university receives your official transcript and verifies your completion of a bachelor's degree, you are limited to enrolling in no more than 6 credits of graduate coursework. Failure to submit official transcripts by the last day of your first term of enrollment at UMGC will result in your being prevented from enrolling in additional graduate courses at UMGC until such transcripts are submitted and verified by UMGC.

Some master's degree programs require the submission of official transcripts before you can be admitted and enroll in classes. These programs have specific admission requirements and/or prerequisite coursework, which are set forth on the individual program pages of the catalog and the UMGC website. A list of the programs that require submission of a transcript before admission is available at umgc.edu/admission-transcript.

Internationally educated applicants are subject to the admissions requirements set forth below.

You may apply to all UMGC graduate programs online at umgc.edu/apply.

DOCTORAL PROGRAMS
To be eligible for admission to a doctoral program at UMGC, you must submit an application, a nonrefundable application fee, and official transcripts demonstrating completion of a master's degree from a regionally accredited college or university or another accredited institution (approved by UMGC on a case-by-case basis) on or before the application deadline (or secure permission of the department).

Applicants to the Doctor of Business Administration program are required to complete DBA 600 with a grade of B or better for full admission to the program. The complete admissions file must be reviewed and accepted by UMGC before you can enroll in DBA 600.

Information about documentation required for admission to the doctoral programs is provided on pp. 10–13. Visit umgc.edu/doctorate for further details and application deadlines.

Internationally educated applicants to the doctoral programs are subject to the admissions requirements set forth below.

INTERNATIONAL APPLICANTS TO ALL GRADUATE PROGRAMS
If you were educated abroad, you must submit the following to be considered for admission:

1. Official documents indicating successful completion of the equivalent of a regionally accredited U.S. bachelor's degree.

If you were educated outside the United States, you must have your official transcripts evaluated by an independent evaluation service. The evaluating organization will send a copy of the evaluation both to you and to The Graduate School. UMGC accepts credit evaluations from any National Association of Credential Evaluation Services (NACES)–approved organization, including World Education Services (WES) and the International Education Research Foundation (IERF). A list of NACES-approved agencies is available at naces.org/members.
Evidence of English language proficiency.

If you did not earn a bachelor’s or master’s degree from an accredited university in the United States or another English-speaking country (listed online at umgc.edu/internationalstudent), you must demonstrate English-language proficiency to be eligible for admission.

The following are accepted as proof of English proficiency.

- A minimum TOEFL (Test of English as a Foreign Language) score of 79 on the internet version or both a minimum TOEFL score of 550 on the paper-based version and a minimum Test of Written English (TWE) score of 4 (Note: The TOEFL score recovery code for UMGC is 5804.)
- A minimum overall score of 6.5 on the IELTS (International English Language Testing System), including the academic writing and academic reading modules
- A minimum grade of Pre-1 on the Eiken Test in Practical English Proficiency
- A transcript indicating completion of at least 12 credits of graduate coursework at a regionally accredited U.S. degree-granting institution. Graduate coursework from other accredited institutions may be considered on a case-by-case basis. You must have earned the credits in the past two years with a grade of B or higher. All credit is subject to review before being accepted as evidence of English proficiency.

If you are providing test scores, you must arrange to have the official score reports sent directly from the testing agency to The Graduate School. Test scores must be less than two years old.

Alternative evidence may be accepted as demonstrating English proficiency. Contact Graduate Admissions at admissions@umuc.edu for more information.

Note: UMGC does not issue Form I-20 A-B Certificate of Eligibility for F-1 student status.

Readmission

READEMISSION AFTER BEING DISMISSED
If you were academically dismissed from The Graduate School, you may be considered for a one-time reinstatement (if you reapply within five years) or a restart (if you reapply after five years). Readmission does not apply to the doctoral program. See p. 147 for more information on these two options.

READEMISSION AFTER BEING ON ACADEMIC PROBATION
If you ceased study while you were on academic probation and wait five years before reapplying for admission, you are eligible for readmission to restart your program from the beginning. The grades and credits you earned five or more years before will not count toward your new program or toward your academic progress status.

Special Admission Situations

STUDENTS FROM OTHER USM INSTITUTIONS
If you are a degree-seeking student in good academic standing in an approved graduate program at another University System of Maryland institution and wish to take courses at UMGC, you need not apply for admission to UMGC. Instead you must obtain an interinstitutional enrollment form from your home institution, complete it, and submit it to UMGC Graduate Admissions.

Your previous coursework will be reviewed by the appropriate Graduate School department to see if course prerequisites have been met.

MILITARY-AFFILIATED STUDENTS
If you intend to use military tuition assistance (TA) benefits, you must contact your educational services officer or counselor within your branch of service for details on eligibility and your military branch’s process for submitting TA forms before you submit an application for admission to UMGC.

Most military servicemembers may apply to all UMGC graduate programs online via MyUMGC at umgc.edu/apply. However, if you are serving on active duty in the U.S. Army or are a member of the Army National Guard or Army Selected Reserves and intend to use military TA benefits, you must use the Common Admissions Application through the GoArmyEd portal (GoArmyEd.com) to apply for admission to UMGC.

STUDENTS RELOCATING BETWEEN UMGC DIVISIONS
It is important that you notify UMGC when you are relocating to a new duty station, so that residency classification and tuition rate may be accurately determined.
If you plan to relocate from one UMGC division (stateside, Europe, or Asia) to another and you have attended classes with UMGC within the last two years, you must complete and submit a relocation form before the start date of the term in which you intend to begin study at the new division. This form is accessible under Helpful Links in the MyUMGC portal. There is no fee for relocations. If you have not attended UMGC within the last two years, you will need to complete the regular UMGC admission application instead and indicate the division that you wish to attend.

If you are using Army tuition assistance and enrolling through the GoArmyEd portal, you do not need to submit a relocation form. Instead, you must contact your education center to speak with a counselor and change your home institution in the GoArmyEd portal to the UMGC division where you intend to study.

READMISSION FOR MILITARY SERVICEMEMBERS
If you discontinued your studies with UMGC because of your military service obligations and would like to return as a UMGC student, contact military@umuc.edu. Refer to UMGC Policy 210.12 Readmission for Military Servicemembers at umgc.edu/policies for more information.

REENROLLMENT
If you have not enrolled in graduate classes at UMGC for a period of two years (six or eight terms, depending on the program) or more, you must complete a new application for admission, but you are not required to pay the application fee. Since you have not been continuously enrolled, you must now fulfill the program requirements in place at the time you reenroll. Coursework you completed previously may no longer apply to new requirements. Consult an advisor to find out how your program is affected.

STUDENTS CHANGING DEGREE PROGRAMS
If you are considering a change from one degree program or specialization to another, you must first consult an advisor. The advisor can determine whether another application is required and whether any previous credit is likely to apply, as well as when you may begin to take classes in the second program.

Restrictions on Admission
You may be admitted either as a graduate student or as an undergraduate student, but you may not hold both classifications simultaneously. As a graduate student, you may be enrolled in only one master’s degree program at a time, and you may not enroll in courses outside your degree program.

Admission to UMGC may also be limited to comply with U.S. federal law.

See p. 36 for restrictions on admission to the Master of Science in Transformational Leadership program.

Registration
Ways to Register
Registration begins each session as soon as the course schedule becomes available on the web and continues until the deadline listed. Check the current graduate schedule of classes (umgc.edu/schedule) and the online academic calendar (umgc.edu/calendar) for registration information.

UMGC offers a number of ways to register for most courses, including online (via MyUMGC) and on-site registration. Detailed information and instructions are available each session online at umgc.edu/register.

Adjustments to Registrations
The university reserves the right to make changes to class sections to ensure that such sections are adequately sized to create an appropriate learning environment. Such class section changes include changing faculty members and moving students between course sections to balance enrollments.

Waiting List
If a hybrid class is already full at the time of registration, you can place your name on a waiting list for that class. The option of putting your name on a waiting list is not available for online classes. To check on class availability, visit MyUMGC at my.umgc.edu.

The following conditions apply to the waiting list:

- If a space becomes available, the first student on the waiting list automatically will be registered for it, and the charge will appear on his or her account. An e-mail notification of the enrollment from the waiting list will be sent. If a space becomes available but the first student is ineligible to enroll in the class (for reasons such as failing to meet the prerequisites, being enrolled in another section of the same class, or being enrolled in a class that conflicts in time), the space will go to the next person on the waiting list.

- If you no longer want to enroll in a class, you should remove your name from the waiting list to prevent the possibility of being automatically enrolled.
ADMISSION AND ENROLLMENT

- If you are already enrolled in the maximum number of allowable credits (6 credits) and you are on a waiting list for a third course, you will not be registered in the third course even if space becomes available in the class.

- If you are already enrolled in a different section of the same class for which you are waitlisted, you will not be enrolled in the waitlisted section even if space becomes available.

- Faculty members and academic advisors are not authorized to add students to a full class.

Priority Enrollment for Veterans

If you have a past due balance, you may be disenrolled from one or all of your UMGC courses. Some exceptions may apply if you are receiving veterans education benefits. Once you have completed the steps to request certification of your enrollments for veterans benefits, and if your benefit type pays directly to the school, you will be excluded from disenrollment.

Dropping or Withdrawing from Classes

PROCEDURES

To cancel your enrollment in a class without any mark on your transcript (dropping a class), you must access the MyUMGC portal and follow the steps for dropping a class before the end of the drop period. The dates for the drop period are available on the UMGC website at umgc.edu/gradcalendar.

When you drop a class, all tuition charges for that course are removed from your student account and no mark or record of the course will appear on your transcript.

If you wish to cancel enrollment in a class after the drop period ends (withdrawing from a class), you must access the MyUMGC portal and follow the steps for withdrawing from a class before the end of the withdrawal period. (Army students must withdraw through the GoArmyEd portal.) The dates for the withdrawal period are also available at umgc.edu/gradcalendar.

Withdrawing from a class will result in a mark of W (described on p. 145) on your academic transcript. You may be refunded a portion of your tuition based on the withdraw date and the refund schedule posted at umgc.edu/refunds. You will be responsible for any remaining tuition due.

You should be careful to note deadlines according to your class format (online or hybrid).

Failure to drop or withdraw from a class in the appropriate manner or by the posted deadlines may result in your receiving a failing grade and forfeiting any refund. The following actions do not constitute dropping or withdrawing from a course:

- Stopping payment on checks
- Nonpayment of tuition charges
- Never attending or participating in a class
- Ceasing to attend or participate in a class

EFFECT ON STUDENT AID

If you are using financial aid and/or veterans benefits, you are strongly encouraged to contact the Financial Aid Office or Veterans Advising before you drop or withdraw from a class to fully understand the impact of such an action on your current and future financial aid awards and/or veterans benefits.

If you are using military assistance benefits, you should contact your military education counselor or education services officer before you drop or withdraw from a class for guidance on withdrawals related to emergencies or official duty requirements and to fully understand the impact of such an action on your current and future military tuition assistance benefits.

Enrollment Across Programs

In general, you are not allowed to enroll in coursework that does not fulfill prerequisites or requirements for your specified program. If you wish to change your degree program or specialization, you should first contact a graduate advisor, and you must wait until the next standard term before enrolling in classes. In no case may you take coursework for different programs in the same session or term or in overlapping sessions or terms (e.g., when the winter term overlaps the standard spring term).

If you are interested in taking courses outside your academic program, you should first consult Graduate Advising. Information on advising is provided on p. 159. The complete text of UMGC Policy 211.00 Cross-Enrollment is available at umgc.edu/policies.

Financial Information

Tuition and Fees

University of Maryland Global Campus requires that you pay your tuition and fees on time. Due dates are provided at the time of registration and depend on how early you register for courses.
PAYMENT DEADLINES
If you register seven or more days before the class start date, your payment will be due seven days before the class start date. If you register within seven days of the class start date, your payment will be due on the day before class starts. If you register on or after the class start date, your payment is due at the time of registration.

Please note: All other charges, including application and diploma fees, are due the same day the charges are incurred.

All tuition and applicable fees must be paid by the deadline, unless you

- Applied for financial aid to cover tuition and fees for the session.
- Confirmed your status as active-duty military or submitted your military tuition assistance documents.
- Requested certification for your veterans education benefits.
- Are enrolled in UMGC’s interest-free monthly payment plan (details are provided at umgc.edu/payoptions).
- Provided confirmation that you will receive employer-provided tuition assistance.

UMGC offers a variety of payment options. Payments can be made via

- Credit card (American Express, Discover, MasterCard, or Visa)
- Money order
- Check (made payable to University of Maryland Global Campus)
- Electronic debit from a checking or savings account
- Cash (in person at Largo only)

Consult the appropriate sections of this catalog for further information about tuition assistance, financial aid, or veterans benefits. More information about different payment options, including the monthly payment plan, is available at umgc.edu/payoptions.

CURRENT TUITION AND FEES
Tuition rates and fees are published each term in the graduate schedule of classes and are available at umgc.edu/tuition. You should review the fee schedule carefully to see which ones apply. Fees are commonly charged for admission and graduation applications, makeup testing, technology, and transcripts.

Site-specific fees may apply for courses taken at certain locations. There also is a service charge for dishonored checks.

DETERMINATION OF RESIDENCY FOR TUITION PURPOSES
An initial determination of in-state or out-of-state status for tuition purposes is made when you apply for admission. The determination made at that time remains in effect unless it is successfully challenged. You are responsible for providing the information necessary to establish eligibility for in-state status. Official criteria for determining residency are detailed in USM Policy VIII-2.70 Policy on Student Classification for Admission and Tuition Purposes at usmd.edu/regents/bylaws/SectionVIII/ and UMGC Policy 210.20 Student Residency Classification for Admission, Tuition, and Charge-Differential Purposes at umgc.edu/policies. Information about tuition and fees may be found on p. 154.

DETERMINATION OF ELIGIBILITY FOR MILITARY TUITION RATE
UMGC’s graduate military tuition rate is available to

- Full-time active-duty members of the U.S. Armed Forces and members of the Selected Reserves, National Guard, Commissioned Corps of the U.S. Public Health Service (USPHS), and Commissioned Corps of the National Oceanic and Atmospheric Administration (NOAA)
- Spouses of full-time active-duty members of the U.S. Armed Forces, the Commissioned Corps of USPHS, and the Commissioned Corps of NOAA
- Dependent children of full-time active-duty members of the U.S. Armed Forces, Commissioned Corps of USPHS, and Commissioned Corps of NOAA who reside in Maryland and are using their sponsor’s transferred Post-9/11 GI Bill® benefits.
- Dependent children of full-time active-duty members of the U.S. Armed Forces, Commissioned Corps of USPHS, and Commissioned Corps of NOAA who reside in Maryland and are using their sponsor’s transferred Post-9/11 GI Bill® benefits.

As of the fall 2019 term, this rate is available for all programs, including specialty graduate programs.

To secure the military tuition rate, you must provide documentation of your service (or that of your qualifying spouse or parent) within 30 days of submitting the application for admission. For more information, contact Admissions or check the To Do list in your student portal.

Gi Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at benefits.va.gov/gibill.
If you do not submit sufficient documentation by the deadline, your tuition will be charged at the out-of-state rate—unless you have submitted the Residency Questionnaire in your student portal and qualify for in-state tuition, in which case your tuition will be charged at the in-state rate.

More information about securing the military tuition rate is available at umgc.edu/milrate-procedures.

**Refunds**

If you drop a course during the drop period, you will qualify for a full refund of tuition and fees, except for the admission application fee.

If you withdraw during the withdrawal period, you may be refunded a portion of the tuition, as determined by the date of withdrawal and the refund schedule posted online at umgc.edu/refunds. All refunds are computed from the date the withdrawal is formally initiated, not from the date of the last class you attended or the last participation date. Refunds are applicable for tuition only. Fees are not refundable.

If your tuition was paid by employer contract, the refund is returned to the employer. If the tuition assistance was a partial payment, it is returned to the employer, and excess payment is refunded to you.

More information about refunds can be found on the UMGC website for your division.

See paragraphs at right for information on return of military tuition assistance and p. 163 for information on the federal return of funds policy for financial aid students.

**Dishonored Checks**

For each paper or electronic check returned to UMGC by the payer’s bank (whether because of insufficient funds, stopped payment, postdating, or drawing against uncollected items), UMGC assesses a service charge of $30 (over and above any service charges levied by the financial institution).

If you stop payment on a check for tuition, you will be neither disenrolled nor relieved of responsibility for paying tuition and fees. Anyone whose checks for tuition or fees remain dishonored may be barred from classes.

**Indebtedness to the University**

If you incur debts to UMGC, you must clear them to be permitted to register. Requests for transcripts and diplomas will be denied until all debts have been paid. Outstanding debts are collected against refunds due to you. After a reasonable period, uncollected debts are forwarded to the Central Collection Unit of the State Attorney General’s Office.

The Board of Regents has authorized UMGC to charge students’ delinquent accounts for all collection costs incurred by UMGC. The normal collection fee is 17 percent plus attorney and/or court costs. Delinquent accounts are reported to a credit bureau.

**Military Tuition Assistance**

If you are serving in the Navy, Marine Corps, or Coast Guard, you must contact your education center to request a tuition assistance form. Once the tuition assistance form is signed by the education coordinator, it must be submitted at the time of registration using one of the methods listed at umgc.edu/milta.

If you are serving on active duty in the U.S. Army or are a member of the Army National Guard or Army Selected Reserves and intend to use military tuition assistance benefits, the funds will be transferred directly to the university upon your registering for classes through the GoArmyEd portal (GoArmyEd.com).

If you are serving in the Air Force you may submit your tuition assistance forms via the Air Force Virtual Education Center (AFVEC) portal.

If you are the spouse of a servicemember eligible to utilize MyCAA (My Career Advancement Account) benefits, you may also submit your tuition assistance via the AFVEC portal.

**DROPS/WITHDRAWALS AND MILITARY TUITION ASSISTANCE**

Military tuition assistance funds are awarded under the presumption that you will attend and participate in classes over the entire period for which the funds have been awarded. If you receive military tuition assistance funds and do not attend or participate for the entire period for which funds were provided, the university is required by the Department of Defense to perform a Return of Unearned Military TA funds calculation. The requirement to perform such a calculation is triggered by any of the following actions occurring on or before the 60 percent point of your enrollment period:

- Course cancellation
- Disenrollment
- Never participating in a class
- Ceasing to participate in a class
- Dropping a course
- Withdrawing from a course
A return of funds calculation is based on the last documented date of attendance or participation in the class or the date the drop, withdraw, cancellation, or disenrollment is initiated. When a return of funds calculation occurs, unearned funds are returned to the Department of Defense. This can result in you owing a balance, which is your responsibility to repay to UMGC.

To learn more about UMGC Policy 170.72 Course Withdrawal and return of military tuition assistance, see umgc.edu/policies.

Any requests for exceptions to UMGC Policy 170.72, including requests related to dropping or withdrawing from a class because of military service obligations, must be submitted within 90 days of the last day of the term during which you dropped or withdrew from the class. For more information, contact Student Resolution and Judicial Affairs at exception.request@umuc.edu.

If you are using military tuition assistance, you should contact your military education counselor or education services officer for guidance on withdrawals related to emergencies or official duty requirements before dropping or withdrawing from a class to fully understand the impact of such an action on your current and future military tuition assistance benefits.

Veterans Benefits
If you are using U.S. Department of Veterans Affairs (VA) Post 9/11 GI Bill (Chapter 33) or Vocational Rehabilitation & Employment (Chapter 31) benefits, UMGC will not undertake the following actions while payment to the institution is pending from the VA:

• Prevent your enrollment.
• Assess a late penalty fee.
• Require you to secure alternative or additional funding.
• Deny you access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify you may be required to

• Produce the VA Certificate of Eligibility by the first day of class.
• Provide a written request to be certified.
• Provide additional information to properly certify the enrollment as described in other institutional policies.

This policy is implemented in accordance with Title 38 U.S. Code 3679 subsection (e). Details are available online at umgc.edu/military-and-veterans/benefits-and-financial-aid/.

Employer-Provided Tuition Assistance
If an employer is going to pay for part or all of your tuition, at the time of registration you must submit two copies of a document (purchase order, tuition assistance form, or contract on company letterhead) containing the following information:

• A specific description of types of fees and charges (such as tuition, application fee, or books) and the amount to be assumed by the employer
• Your full name and student identification number
• The session covered by the document
• The billing address
• The signature and phone number of the authorizing official

If you do not have an authorizing document at the time of registration, you must pay the bill in full and arrange for direct reimbursement from your employer. UMGC cannot issue refunds for authorizing documents submitted after registration.

Documents that restrict payment or are in any way conditional will not be accepted. If the employer does not pay UMGC, you are responsible for payment.

Monthly Tuition Payment Plan
UMGC offers a cost-effective alternative for students who are budgeting for college tuition: an interest-free, monthly tuition-payment plan. This plan allows you to spread all or part of your tuition bills into monthly installments on an academic session basis. All UMGC students are eligible to participate in the payment plan, regardless of financial need. If you are interested in the monthly payment plan, visit umgc.edu/payoptions or call 800-888-8682.

Golden ID Program for Senior Citizens
Senior citizens may qualify for participation in the Golden Identification program, which allows participants to register for up to 6 credits per semester without paying tuition. All other fees continue to apply. To qualify for this program, you must be classified as in-state for tuition purposes; a U.S. citizen or documented permanent resident; 60 years old by the beginning date of the term for which you are applying; and not employed more than 20 hours per week.

As a Golden ID student, you may register two weeks before classes begin on a space-available basis. Benefits do not apply to MBA, MS in Cybersecurity Management and Policy, MS in Cybersecurity Technology, MS in Data Analytics, and MS in Digital Forensics and Cyber Investigation program courses; 800-level courses; or noncredit courses. To request an application, contact Graduate Advising at 800-888-8682. More information on this program is available online at umgc.edu/goldenid.
Availability of Services
UMGC provides services and resources to help you complete your educational program—through online resources; by e-mail and telephone communication; and in person at various sites, primarily in Maryland and the national capital area. A number of offices are responsible for the delivery of these services, including Career Services, the UMGC Library, and the offices of Admissions, Advising, Financial Aid, and Information Technology.

Among these, the Office of the Registrar and the Office of Advising respond to most of your academic needs throughout your college career, providing general information; admission assistance; academic advising; registration, graduation, and transcript services; and veterans benefits assistance.

UMGC offers a variety of these services on-site at the following locations in Maryland and the national capital area. A complete list of stateside class locations is available in the appendices. A complete list of stateside class and service locations is available online at umgc.edu/locations.

General Information
UMGC representatives are available 24 hours a day, seven days a week, at 800-888-8682 to answer general questions and help you navigate UMGC’s website. Representatives also can make sure you are signed up to receive important announcements.

Admission Assistance
Admissions counselors serve individuals who are inquiring about becoming UMGC students or those who are admitted but have not yet registered. Counselors can help you select the right program, apply for admission, identify the right payment option, plan your curriculum, and register for your first term of classes.

You may contact an admissions counselor by phone at 800-888-8682 or by e-mail at studentsfirst@umuc.edu. More detailed information on admission is available on p. 151.

Advising
Once you have enrolled in your first course, advisors will help guide you through all the steps that lead to a graduate-level degree. They also will recommend ways for you to complete academic requirements quickly and efficiently.

Advisors will check in with you throughout the term, but you are also encouraged to keep track of your program requirements and seek advising. You should retain and refer to the catalog of the year you entered your program, as it contains all the degree requirements for which you will be held accountable as long as you maintain continuous enrollment. Archived catalogs are also available online at umgc.edu/catalogs.

If you have not attended UMGC for a year or more, contact an advisor for assistance in getting back on track. If it has been more than two years since your last enrollment, you must first reapply for admission. Once readmitted, you are required to fulfill the degree requirements detailed in the catalog of the year in which you resume study. More information on continuous enrollment is provided on p. 148.

Whenever possible, you should get advising information in writing to help with future degree planning. You must meet all degree requirements to be cleared for graduation.

You may contact advisors by phone at 800-888-8682 or by e-mail at grad.advisor@umuc.edu. In the Washington, D.C., metropolitan area, you also have the option of scheduling an appointment with an advisor in person at the sites listed on the previous page.

Evaluation of Transfer Credit
FOR MOST GRADUATE DEGREE PROGRAMS
Up to 6 credits of graduate coursework may be considered for transfer to graduate degree programs at UMGC that do not require CBR, DCL, or PRO 600, if the credits were earned at an approved institution and if they are applicable to your program of study. The Graduate School may accept up to 3 graduate credits in transfer for a certificate program. The DBA, DM, and MS in Data Analytics programs do not accept transfer credit.

UMGC may accept more than the usual maximum of 6 credits toward a degree program (or 3 credits for a certificate program) based on agreements with third parties. Decisions regarding your eligibility to enter a graduate program and receive transfer credit based on agreements with third parties are made at the time of admission and may not be made retroactive after enrollment.

All graduate credits offered for transfer credit must meet the following criteria:

- The credits must have been earned as graduate credit.
- The credits must have been awarded within the time limit for the degree or certificate.
- You must have earned a grade of B or better in the courses considered for transfer. (However, these grades are not included in the calculation of your grade point average.)
- The department advisor and the program chair must have determined that the transfer courses are relevant to your program of study.
- The credits must have been earned at an approved institution (defined on the next page) and be equivalent to graduate-level coursework or recommended for graduate-level credit by the American Council on Education (ACE) or other nationally recognized bodies or as part of an approved articulation agreement.
FOR PROGRAMS THAT REQUIRE CBR, DCL, OR PRO 600

Up to 6 credits of graduate coursework may be considered for transfer as replacement for CBR, DCL, or PRO 600, if earned at an approved institution.

If you have previously earned a master’s degree from an approved institution, you are eligible to receive transfer credit for CBR, DCL, or PRO 600 in recognition of the fundamental competencies essential for successful completion of a graduate degree program.

If you have earned graduate credit but have not earned a master’s degree, you may request a review of transfer credit for CBR, DCL, or PRO 600.

All graduate credits offered for transfer credit must meet the following criteria and will be reviewed for approval:

- Credits must have been earned as graduate credit.
- A grade of B or better must have been earned in the courses considered for transfer. These grades, however, will not be included in the calculation of the grade point average at UMGC.
- Credits must have been earned at an approved institution and be equivalent to graduate-level coursework or recommended for graduate-level credit by the American Council on Education.

APPROVED INSTITUTIONS

Approved institutions include those accredited by the following regional associations:

- Middle States Association of Colleges and Schools Commission on Higher Education
- Northwest Commission of Colleges and Universities
- North Central Association of Colleges and Schools, The Higher Learning Commission
- New England Association of Schools and Colleges Commission on Institutions of Higher Education
- Southern Association of Colleges and Schools Commission on Colleges
- Western Association of Schools and Colleges Accrediting Commission for Senior Colleges and Universities

Credits from other accredited institutions may be approved on a case-by-case basis.

Accessibility Services

Reasonable accommodations are available to help you if you have a disability and are enrolled in any program offered at UMGC.

You can request disability-related accommodations by submitting a request to Accessibility Services.

You should make your request for accommodations as early as possible to allow sufficient time for requests and any accompanying documentation to be reviewed and for the accommodation plan to be implemented.

Once the request is received, Accessibility Services will notify you of the status of your request and schedule an intake appointment, which may be held by phone, via e-mail, or in person. During the appointment your accommodation request, academic needs, and Accessibility Services’ procedures are discussed. Decisions regarding accommodations are made on an individualized assessment of program requirements and the need for accommodations. Once an accommodation plan is finalized, Accessibility Services will provide the plan to your teachers upon your written request.

Visit umgc.edu/accessibility or contact Accessibility Services by phone at 800-888-8682, ext. 2-2287, or 240-684-2277 (TTY) or by e-mail at accessibilityservices@umuc.edu for more information.

Graduation Clearance and Services

Application Deadlines

You are responsible for filing a graduation application (available online at my.umgc.edu) and paying the appropriate fee (currently $50) if you expect to complete the requirements for a degree or certificate program. A separate application—with fee—is required for each program you are completing. Applications for diploma may be submitted up to a year in advance of the term in which you expect to complete your program or by the following deadlines:

- December graduation: October 15
- May graduation: February 15
- August graduation: June 15

If you are a doctoral student or are enrolled in a program that requires CBR, DCL, or PRO 600, you may submit your application for graduation at the time you register for your final term or up to the following deadlines:

- December graduation: October 15
- March graduation: February 15
- June graduation: April 1
- September graduation: July 15

The application form must be completed through MyUMGC at my.umgc.edu.
Clearance Process for Graduation

Once you have applied for graduation, Graduation Services reviews your academic requirements and determines whether you are cleared for graduation. If you do not complete degree requirements in the term in which you first applied for graduation, your application will automatically roll over into the next term. You will not have to pay another application fee.

Transcripts are not updated to show program completion, nor are diplomas mailed out, until the degree has been awarded.

Graduation Services then certifies degree completion, awards the degrees, and orders diplomas. Graduation Services also processes requests for letters of completion and embassy letters.

Advisors are available to answer any questions about requirements for graduation and the application for diploma at 800-888-8682, ext. 2-2100, or grad.advisor@umuc.edu.

For more information on graduation services and support, go to umgc.edu/graduationservices.

Commencement

Commencement is held annually in May and December in Adelphi, Maryland. You will be invited to participate in commencement if you apply to graduate in the same term as the ceremony (or have graduated since the last spring commencement). Visit umgc.edu/commencement for more information about eligibility and details about the stateside commencements.

If you invite guests from outside the United States, you may request up to 10 embassy letters for the term you plan to graduate. You must have a graduation application submitted for that term in order for your request to be processed.

MyUMGC

Through MyUMGC (available online at my.umgc.edu), you may access many of your personal UMGC records. MyUMGC enables you to change personal information (such as home address, e-mail address, or phone numbers); register and pay for courses; pay bills; check grades, financial aid, and student account status; apply for graduation; request certification for VA educational benefits and check the status of the request; and view and print reports (such as your class schedule, grade report, statement of account, and unofficial transcript). To access services, you must enter your UMGC login credentials.

A glossary of terms frequently used in MyUMGC may be found in the appendices.

Financial Aid

UMGC’s Financial Aid Office administers a variety of financial assistance programs—including grants, scholarships, and loans—to help you meet the costs of your educational goals. Aid is available for students who can demonstrate financial need, academic merit, or both. You are encouraged to apply for assistance regardless of your income level; many financing alternatives are available.

General Eligibility Requirements

To be eligible for UMGC need-based assistance, you must

- Be admitted to UMGC as a degree-seeking or eligible certificate-seeking student.
- Be a U.S. citizen or an eligible noncitizen.
- Be enrolled half-time for federal loan programs. *(Note: Audited courses do not count.)*
- Demonstrate satisfactory academic progress toward a degree or certificate according to UMGC policy.
- Have a high school or GED diploma.
- Possess a valid Social Security number.
- Register with Selective Service, if required to do so.
- Not be in default on any federal student loans, nor have borrowed in excess of loan limits, nor owe a refund on any grant under Title IV federal student aid programs.
- Not be ineligible based on a drug conviction.

Financial Aid Programs

Most aid programs are available to both full- and part-time students. UMGC may offer the following types of financial aid: grants, scholarships, and loans. In most cases, at least half-time enrollment is required. (Full- and part-time status is explained on p. 149.)

Amounts and eligibility for financial aid vary from year to year. Following is a description of programs available for the upcoming award year.

GRANTS AND SCHOLARSHIPS

Gift assistance, for which no repayment is required, is offered by the state of Maryland and UMGC. The UMGC Financial Aid Office administers several types of gift assistance: UMGC scholarships and grants and Maryland state scholarships and grants.

UMGC scholarship programs, which include the UMGC President’s Scholarship and the Dr. Milton Grodsky MS in Management Memorial Scholarship, offer a number of institutional scholarships as well as scholarships from corporate donors and foundations. Typical awards range from $200
to $2,000 per semester. Requirements vary according to the individual scholarship programs. Most scholarships require a minimum GPA and completion of a minimum number of credits at UMGC for consideration.

If you meet eligibility requirements, you are automatically prompted to complete the scholarship application through MyUMGC. Scholarships are awarded for the academic year on a first-come, first-served basis, so it is essential that you submit scholarship applications as early as possible. More information is available online at umgc.edu/scholarships.

The Dr. Milton Grodsky MS in Management Memorial Scholarship, named in honor of the founding dean of The Graduate School, is available to students in the MS in Management program who are pursuing a first graduate degree, have completed 18 to 30 credits with a 3.5 GPA or higher, demonstrate perseverance and excellence in an essay, and are enrolled for at least 3 credits. The one-time award is $2,000.

The UMGC President’s Grant program offers grants to students who demonstrate financial need and are enrolled for at least 3 credits. If funds are available, typical awards range from $100 to $350 per semester, based on need.

Maryland state grant and scholarship programs provide financial assistance to Maryland residents based primarily on financial need. Awards to graduate students typically require enrollment of at least 6 credits per semester. Award amounts range from $400 to $10,000 annually. Senatorial and Delegate Scholarship awards are based on criteria established by the elected official. For more information, contact the Maryland Higher Education Office of Student Financial Assistance at 410-767-3300 or 800-974-0203 or visit mhec.state.md.us.

Many UMGC students receive private scholarships offered by corporations, associations, foundations, and other organizations. These private scholarships offer awards on a competitive basis to students who meet specific criteria. Scholarship links and search tools are available online at umgc.edu/financialaid.

LOANS
Loan programs are available to students enrolled at least half-time per semester. If you take loans to pay for college expenses, you must repay the principal and interest in accordance with the terms of the promissory note.

The William D. Ford Federal Direct Loan program offers low-interest federal loans to students. Repayment begins six months after you leave school or your attendance drops below half-time. For information about annual award amounts and general repayment terms, visit umgc.edu/financialaid.

Graduate PLUS and alternative student loan programs are also options to consider. If your financial aid awards do not meet your financial need, you may be able to borrow up to the cost of attendance through the graduate PLUS program offered by the U.S. Department of Education. You also may borrow additional funds through alternative loan programs offered by many banks and other lenders. Both programs require applicants to be creditworthy. More information on graduate PLUS loans and alternative loan programs is available online at umgc.edu/financialaid.

UMGC Financial Aid Standards for Satisfactory Academic Progress
If you receive financial aid, federal regulations require you to maintain satisfactory academic progress toward your degree or certificate. If you fail to meet the minimum academic standard, you are not eligible to receive financial aid. Details of the appeal process are provided in the complete Satisfactory Academic Progress policy for financial aid students, located at umgc.edu/gradsap.

The Financial Aid Application Process
You must complete the Free Application for Federal Student Aid (FAFSA) to be considered for any type of federal, state, or institutional financial aid at UMGC. The FAFSA (which may be completed online at fafsa.gov) must also be completed if you wish to be considered for need-based Maryland state scholarships. UMGC’s school code is 011644.

UMGC FINANCIAL AID PRIORITY DEADLINES
One of the most important aspects of the financial aid process is applying for assistance as early as possible. Priority deadlines are listed on the following page. Students who apply by the priority deadlines may be considered for additional grant and scholarship programs with limited funds.

If you apply late, you may still receive aid, depending on your eligibility and the availability of funds. Late applications are still processed and considered. You are always encouraged to apply for financial aid.

Federal Return of Funds Policy

Federal (Title IV) financial aid is awarded under the assumption that you will attend and participate in classes for the entire period for which the aid has been awarded. If you receive Title IV funds and do not attend or participate for the entire period for which you have been awarded aid, the university is required by federal regulation (34 CFR 668.22) to perform a Return of Title IV Funds calculation. The requirement to perform such a calculation is triggered by any of the following actions occurring on or before the 60 percent point of your enrollment period:

- Course cancellation
- Disenrollment
- Never participating in a class
- Ceasing to participate in a class
- Dropping a course
- Withdrawing from a course

If you certify your intent to return later within the same term in which you dropped or withdrew from class, then the Financial Aid Office will not perform a return of funds calculation—unless you do not return as scheduled.

When the Financial Aid Office performs a return of funds calculation, unearned funds are returned to the Department of Education. This can result in a balance owed to UMGC. You are then responsible for repaying the outstanding debt, or it will be transferred to the State Central Collections Unit.

If you are using federal financial aid, you are strongly encouraged to contact the Financial Aid Office before dropping or withdrawing to fully understand the impact on your current and future financial aid awards.

Visit umgc.edu/enrollmentchanges for further information.

For Further Information

If you need additional information, visit the Financial Aid Online Support Center at umgc.edu/help to e-mail, chat, request a call, or view the extensive list of frequently asked questions in the Knowledge Base.

Note: If you are a resident of Washington state and are interested in information and resources about student loan repayment or wish to submit a complaint to the Washington Student Achievement Council regarding your student loans or student loan servicer, visit www.wsac.wa.gov/loan-advocacy or contact the student loan advocate at loanadvocate@wsac.wa.gov.

Military-Affiliated Student Benefits and Resources

UMGC takes great pride in its 70-plus year history of serving military and veteran students and their family members and provides significant support to all military-affiliated students. Learn more about the comprehensive support UMGC provides to military-affiliated students at umgc.edu/military.

Veterans Benefits Programs

The following educational assistance programs administered by the U.S. Department of Veterans Affairs are available for active-duty military personnel, reservists, veterans, and their dependents who are attending UMGC:

- The Montgomery GI Bill–Active Duty Educational Assistance Program (MGIB, Chapter 30)
- Vocational Rehabilitation (Chapter 31)
- The Post–Vietnam Era Educational Assistance Program (Chapter 32)
- The Post-9/11 GI Bill (Chapter 33)
  - Yellow Ribbon Program
  - Transfer of Post-9/11 GI Bill Benefits to Dependents
  - Marine Gunnery Sergeant John David Fry Scholarship
- The Survivors’ and Dependents’ Educational Assistance Program (Chapter 35)
- Montgomery GI Bill–Selected Reserve Educational Assistance Program (Chapter 1606)
- Montgomery GI Bill–Reserve Educational Assistance Program (Chapter 1607)

Detailed information on these programs is available online at umgc.edu/vabenefits and gibill.va.gov.

APPLICATION PROCEDURES

Every educational assistance program requires different paperwork and documentation to process a claim. You may submit initial applications for benefits online directly to the U.S. Department of Veterans Affairs. You also must complete a UMGC Request for Certification form (available online via MyUMGC) for each session you wish to receive benefits. The U.S. Department of Veterans Affairs processes claims and issues payment six to eight weeks after receiving completed paperwork, which may be submitted no earlier than two weeks before class starts.

AMOUNTS AND METHODS OF PAYMENT

The amount of money you may receive from the U.S. Department of Veterans Affairs depends on the educational assistance program for which you are eligible, the number of credits for
which you are registered, the length of the session, and (for certain programs) the number of dependents you have. The current monthly payment for each educational assistance program is available online at gibill.va.gov.

**EVALUATION OF PRIOR TRAINING**

When you file a claim for educational benefits, the U.S. Department of Veterans Affairs requires prior training to be evaluated for transfer credit. If you have earned graduate credit from a regionally accredited institution, you must have an evaluation completed during the first session of attendance. (Equivalent credit from other accredited institutions may be considered on a case-by-case basis. If you were educated abroad, see umgc.edu/internationalstudent for additional requirements.) Not complying with this evaluation may delay future benefits. For information on evaluation procedures for study abroad, visit umgc.edu/internationalcredit.

**STUDENTS’ RESPONSIBILITIES**

If you receive benefits, you are expected to follow all regulations and procedures of the U.S. Department of Veterans Affairs while attending UMGC.

At UMGC, all regulations of the U.S. Department of Veterans Affairs are enforced. You should be aware of the following requirements and consequences:

- You are expected to make satisfactory progress toward a degree or certificate; everyone must comply with the academic standards of UMGC.
- You must report all changes in enrollment—including drops, adds, withdrawals, changes to audit, and changes in degree objective.
- Registering for a course and then not attending, or ceasing to attend without officially withdrawing, is a misuse of federal funds that is punishable by law.
- Payment of benefits will be disallowed for any course in which a grade of FN is assigned.
- Payment of benefits will be disallowed for repeating a course for which transfer credit has been granted or for which a passing grade was assigned.
- Payment of benefits will be disallowed for any course that is not a requirement of your degree or certificate program.
- Payment of tuition and fees is required at time of registration, unless you are applying for Chapter 31 Vocational Rehabilitation or Chapter 33 Post-9/11 benefits.

- You are responsible for paying the balance of any tuition fees remaining after payment of Post-9/11 benefits.
- If you are in a program that involves any internship, practicum, or work study, you are required to provide documentation to the Veterans Certification Office verifying the physical location and zip code where the work takes place.

**NONCREDIT GRADUATE COURSES**

The U.S. Department of Veterans Affairs does not pay benefits for noncredit graduate courses.

**TUTORIAL ASSISTANCE**

Veterans, active-duty military personnel, and reservists receiving funding assistance from the U.S. Department of Veterans Affairs may qualify for tutorial assistance. If you are enrolled at least half-time, you may qualify. Payments are allowed when you demonstrate deficiency in courses that are required for your degree programs.

**FOR FURTHER INFORMATION**

Information and applications are available from your advisor or at umgc.edu/vabenefits on the UMGC website. For information on qualifying for the in-state tuition rate as a veteran or eligible dependent, see Determination of Residency for Tuition Purposes on p. 155.

**Veterans Resources**

UMGC offers dedicated military and veterans advisors and a range of resources targeted specifically for veterans. These include VetSuccess on Campus and the Vessey Veterans Resource Center, a one-stop shop designed to give you the support you need to succeed in school and in your career. Learn more at umgc.edu/vetresources.

**Transcript Services**

Official transcripts are maintained by the Office of the Registrar. These transcripts show all coursework taken at UMGC; if graduate credit from another university has been accepted in transfer, that also is noted.

Your records are considered confidential. Therefore, UMGC releases transcripts only upon receiving an online transcript request from you and payment of the appropriate fee. Online requests are authenticated through your login credentials. An electronic release form is provided during the ordering process and serves as an official signature.

Various procedures for requesting transcripts are provided online at umgc.edu/transcripts. A fee is charged for each UMGC transcript issued; additional fees are charged for overnight pro-
cessing. You should allow at least three business days for transcript requests to be processed. All financial obligations to the university must be satisfied before a transcript may be released.

**Verification Services**

**Enrollment Verification**

UMGC participates in the National Student Clearinghouse, which, in turn, supplies verification of enrollment to lending agencies. UMGC reports student enrollment data to the clearinghouse two times each month. Enrollment data are provided for all students who are enrolled in classes, whether they are attending full-time, half-time, or less than half-time, as well as for students who are considered to have withdrawn from the university. UMGC also reports degree information, including graduation date, for students who have completed an academic program.

If you are a current student, you may request enrollment verification through MyUMGC free of charge. If you are no longer enrolled at UMGC, you may request a transcript of your academic record to verify past enrollment.

All enrollment verifications requested via MyUMGC are processed in real time and available to print on the same day. An enrollment verification will not be processed until all financial obligations to the university have been satisfied.

**Loan Deferment Form Certification**

UMGC does not grant or deny deferment requests; any deferments are at the sole discretion of the lender. UMGC processes deferment forms, certifying your official dates of enrollment. If you are not enrolled in the current term, you are reported as having withdrawn, regardless of whether you plan to enroll or have already enrolled in a future term.

If you have a William D. Ford Federal Direct Loan and wish to apply for a deferment, you must complete the In-School Deferment Request (available at umgc.edu/finaidforms) and submit it to the Office of the Registrar by mail for certification. Forms should be mailed to UMGC, Student Records—Outgoing Transcripts, 3501 University Boulevard East, Adelphi, MD 20783.

You should be aware both of your lender’s deadlines for receiving deferment requests and UMGC’s reporting schedule to avoid having deferment forms processed and forwarded to the lenders before enrollment data have been reported.

**Degree Verification**

UMGC has authorized the National Student Clearinghouse to provide degree verification. A degree verification will not be released until all financial obligations to the university have been satisfied.

Employers and background screening firms must contact the clearinghouse directly for this information, for which a fee is charged. For more information about this service, visit studentclearinghouse.org.

**Student Advisory Council**

The Student Advisory Council provides advice to the university administration, and thus serves as an avenue for UMGC students to provide feedback about UMGC’s mission and overall direction. The council consists of 12 members, elected by their fellow students, who act in an advisory capacity to the university president, provost, deans, and other officials on behalf of all students.

If you would like to see certain issues addressed or have questions, contact your council representative by e-mail at stac@umuc.edu.

More information on shared governance is available online at umgc.edu/administration/leadership-and-governance/shared-governance.

**Other Resources**

**Course Materials**

You can complete most graduate degrees without purchasing textbooks, thanks to electronic resources that are free, up-to-date, and available through your online classroom. Depending on the course, these open educational resources may include electronic textbooks, lectures, websites, and selected documents and media.

Some courses do require the use of specific software or content that cannot be accessed for free. When you register for a course, check the required course materials listed in the interactive graduate schedule of classes to determine whether you will need to purchase any course materials. These materials are not included on your student account or added with your tuition and fees and must be paid for out of pocket.

For those few courses that still require additional resources, you may order textbooks and software from MBS Direct online through the UMGC online bookstore (umgc.edu/bookstore) or by mail. MBS guarantees the quality of new and used inventory and has an easy return and buyback program. Orders are shipped via UPS within 24 hours of receipt, Monday through Friday. Overnight and two-day delivery are available for an additional fee. Payment by personal check, MasterCard, Visa,
American Express, and Discover is accepted. Some employer contracts may be accepted.

**Career Services**

Career Services provides resources and services for UMGC students and alumni worldwide to inform them about, prepare them for, and connect them with their career and job search needs. To access Career Services, you should activate your account on CareerQuest, UMGC’s online career portal, at careerquest.umgc.edu using your UMGC login credentials.

**TOOLS AND RESOURCES**

Career Services offers a variety of online tools and resources, available 24 hours a day, that can be useful in career planning and the job-search process. Resources include résumé builders and templates, automated résumé reviews, online mock interviews, video job-search tips, mentor matching, occupational information, employer and graduate school directories, job hunting guides, and career resource literature.

**JOB-SEARCH SERVICES**

UMGC offers several services designed to fulfill the employment needs of UMGC students and alumni, including employer recruitment sessions and job fairs (held online and on-site); job-search skills workshops, such as résumé writing and interview preparation; and tutorials. CareerQuest enables you to search job listings and post résumés for prospective employers.

**CAREER DEVELOPMENT AND PLANNING**

Career Services staff are available to provide personalized attention to help you clarify your skills, interests, and work-related values; make career/life-related decisions; research career options; plan for further study; and search for employment, whether you are new to your career field, making a career transition, or looking for guidance on how to climb the corporate ladder as an experienced professional.

Career advising services are available by appointment (on-site and by phone, video chat, and e-mail) and can be scheduled via CareerQuest. Limited appointments are available on a walk-in basis at Largo during specified times. Call 800-888-8682, ext. 2-2720, or visit umgc.edu/careerservices for more information.

**Computer Labs and Services**

Computer labs are available at many UMGC sites (including Dorsey Station, Largo, UMGC at Quantico, Shady Grove, and Waldorf). You can check umgc.edu/locations to see if a site near you has computing services. At some sites, use may be restricted to students taking a class at that site. These labs are available primarily for the use of students completing coursework but also are open to faculty members, staff, and alumni on a first-come, first-served basis on presentation of a valid library bar code. You must bring a flash drive to save data or documents.

Lab assistants are available during scheduled hours to help you with resident software programs but cannot provide tutoring.

You also may access host computers at UMGC via the internet using Telnet. Two host systems are accessible: Nova and Polaris. You must have an account for the particular system you wish to use. For most students taking courses in computing, accounts are set up automatically as part of the coursework and are valid for the duration of the class.

Technical support for MyUMGC, the learning management system, and other learning applications is available 24 hours a day, seven days a week, through Help@umgc online at umgc.edu/help or by phone at 888-360-8682.

**The UMGC Library**

The UMGC Library (umgc.edu/library) serves to educate students, faculty, and staff in the use of library and information services, emphasizing the critical importance of information literacy knowledge and skills for success in today’s information-rich world. The office also develops and manages extensive online research resources and user-centered services for UMGC students, faculty, and staff worldwide.

**LIBRARY RESOURCES**

The UMGC Library provides access to a rich collection of research materials on a wide variety of topics (business, social science, science, arts and humanities, computer and information systems). You can access an extensive array of subscription research databases containing tens of thousands of full-text articles, as well as thousands of electronic books, through the UMGC Library home page at umgc.edu/library or through the learning management system. UMGC Library OneSearch allows you to search for scholarly articles, books, and other research resources via a single search engine that includes most of the databases to which the UMGC Library subscribes. The UMGC Library has also created subject-specific resource guides to serve as a starting point for research. Each guide includes subject-relevant research databases, books, websites, and other resources.

**LIBRARY SERVICES**

Currently enrolled students in the continental United States have borrowing privileges at the 17 University System of Maryland and Affiliated Institutions member libraries. The library collections can be searched and books can be requested
through the online library catalog, available via the library home page. All UMGC students may use the DocumentExpress service to request that journal articles or book chapters not available online in full text be sent to them electronically.

**LIBRARY INSTRUCTION AND RESEARCH ASSISTANCE**

To help you gain the in-depth research skills needed to locate, evaluate, and use the rich research resources available to you, the UMGC Library provides many self-help tutorials and resources on its web pages and offers library instruction in selected online and on-site classes.

Reference and research assistance is available daily (except holidays), during regularly scheduled hours, through the office's web page under “Ask a Librarian.” For a complete list of library services, visit umgc.edu/library or call the UMGC Library at 240-684-2020 or 800-888-8682, ext. 2-2020, during regularly scheduled office hours.
The information contained in this catalog reflects the policies of both UMGC and the University System of Maryland (USM). The complete list and text of UMGC’s policies can be found at umgc.edu/policies. USM policies can be found at usmd.edu/regents/bylaws/.

Student Classification for Admission and Tuition Purposes
For information on student classification and residency, review USM Policy VIII-2.70 at usmd.edu/regents/bylaws/SectionVIII. Also see UMGC Policy 210.20 Student Residency Classification for Admission, Tuition, and Charge-Differential Purposes at umgc.edu/policies.

Disclosure of Student Records
UMGC complies with the Family Educational Rights and Privacy Act (FERPA), a federal law that protects the privacy of students’ education records. In accordance with FERPA, you have the right to inspect and review your education records; seek an amendment of your education records, where appropriate; limit disclosure to third parties of directory information (student information which may be released without your prior written consent); and file formal complaints alleging a violation of FERPA with the Department of Education. In addition, FERPA provides that most of your student information may not be released to third parties without your prior consent. UMGC’s Policy 210.14 Disclosure of Student Records contains an explanation of information that may be disclosed with and without prior consent, as well as procedures for requesting amendments to records, requests for nondisclosure, and filing of complaints. Requests for inspection of your student records may be sent to exception.request@umuc.edu. For another person to act on your behalf, a power of attorney is required. More information on FERPA, including disclosures to third parties, can be found at umgc.edu/current-students/finances/financial-aid/financial-aid-policies/ferpa.cfm.

Student Drug and Alcohol Awareness
UMGC complies with all federal, state, and local laws that regulate or prohibit the possession, use, or distribution of alcohol or illicit drugs. Violations of such laws that come to the attention of UMGC officials will be addressed through UMGC procedures, through prosecution in the courts, or both.

All UMGC students are prohibited by UMGC from unlawfully possessing, using, manufacturing, distributing, or dispensing alcohol or any controlled substance on UMGC premises or at UMGC-sponsored activities. UMGC expects all students to comply with applicable federal, state, and local laws and regulations pertaining to possession, use, manufacture, distribution, or dispensing of alcohol and/or controlled substances.

Any student who violates any of the applicable standards of conduct is subject to corrective disciplinary actions and penalties up to and including expulsion from UMGC academic programs and referral to the appropriate federal, state, and/or local authorities for prosecution in the courts. Students should see the drug prevention program section of the most current annual safety and security report (umgc.edu/inform) for additional information.

Smoking
In accordance with USM policy, UMGC seeks to promote a healthy, smoke-free environment for the UMGC community. More information on Policy 640.00 UMGC Policy on Smoking may be found at umgc.edu/policies/adminpolicies/admin64000.cfm.

Intellectual Property
The primary mission of universities is to create, preserve, and disseminate knowledge. When that knowledge takes the form of intellectual property, a university must establish a clear and explicit policy that will protect the interests of the creators and the university while ensuring that society benefits from the fair and full dissemination of that knowledge. More information about UMGC’s policy on intellectual property is available online at umgc.edu/policies/researchpolicies/research19000.cfm.

Peer-to-Peer File Sharing
Unauthorized use of copyrighted materials may bring civil and criminal penalties to the user. UMGC is committed to combating the unauthorized use of copyrighted materials on UMGC’s network (including within online classrooms), and, therefore, has established a written plan to achieve this goal. The intent of this plan is to inform UMGC students, faculty, and staff members of the appropriate use of copyrighted material on the network and to deter, detect, and discipline prohibited use while reasonably maintaining the educational use of UMGC’s network.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws
Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substan-
tional parts of a copyrighted work without authority constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than $750 and not more than $30,000 per work infringed. For "willful" infringement, a court may award up to $150,000 per work infringed. A court can, at its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

More information is available on the U.S. Copyright Office website at copyright.gov.

UMGC Procedures for Handling Unauthorized Distribution

UMGC implements an active protocol to respond to copyright infringement allegations. In accordance with the Digital Millennium Copyright Act (DMCA), UMGC has designated the following individual to receive and respond to reports of alleged copyright infringement on UMGC's website:

Erin Parker
Deputy General Counsel
Office of Legal Affairs
University of Maryland Global Campus
3501 University Boulevard East
Adelphi, MD 20783
301-985-7080
legal-affairs@umuc.edu

To be effective under the DMCA, a notification of claimed infringement must be in writing and include the following information:

1. A physical or electronic signature of a person authorized to act on behalf of the owner of an exclusive right that is allegedly infringed;
2. Identification of the copyrighted work claimed to have been infringed, or, if multiple copyrighted works at a single online site are covered by a single notification, a representative list of such works at that site;
3. Identification of the material that is claimed to be infringing or to be the subject of infringing activity and that is to be removed or access to which is to be disabled, and information reasonably sufficient to permit the service provider to locate the material;
4. Information reasonably sufficient to permit the service provider to contact the complaining party, such as an address, telephone number, and, if available, an electronic mail address at which the complaining party may be contacted;
5. A statement that the complaining party has a good faith belief that use of the material in the manner complained of is not authorized by the copyright owner, its agent, or the law; and
6. A statement that the information in the notification is accurate, and, under penalty of perjury, that the complaining party is authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.

Once an effective DMCA takedown request is submitted, UMGC will act expeditiously to remove or block access to the infringing material.

Nondiscrimination

University of Maryland Global Campus (UMGC) is committed to ensuring that all individuals have equal access to programs, facilities, admission, and employment and that no person shall be excluded from participation in, be denied the benefit of, or otherwise be subjected to unlawful discrimination in this institution's programs and activities. In accordance with federal, state, and local laws and regulations, UMGC does not discriminate against any person on the basis of race, religion, color, creed, sex, gender, gender identity or expression, marital status, sexual orientation, age, national origin, ancestry, political affiliation, mental or physical disability, genetic information, veteran status (including Vietnam-Era veterans), or any other legally protected characteristic. Specifically, under Title IX of the Education Amendments of 1972, UMGC prohibits discrimination on the basis of sex in its programs and activities. UMGC will take steps to eliminate prohibited conduct, prevent its recurrence, and remedy its effects.

All inquiries regarding UMGC's Nondiscrimination Statement or compliance with applicable statutes and regulations regarding equal opportunity should be directed to the fair practices and equal opportunity officer, Office of Diversity and Equity, 3501 University Boulevard East, Adelphi, MD 20783-8000 (phone 301-985-7940 or e-mail fairpractices@umuc.edu).

For UMGC Policy 040.30 Affirmative Action and Equal Opportunity, see umgc.edu/policies/adminpolicies/admin04030.cfm.

Inquiries regarding Title IX/sexual misconduct may be directed to the Title IX coordinator, Office of Diversity and Equity, 3501 University Boulevard East, Adelphi, MD 20783-8000 (phone 301-985-7021 or e-mail titleixcoordinator@umuc.edu) or a member of UMGC's Title IX Compliance Team.
See umgc.edu/diversity/title-ix-sexual-misconduct/index.cfm. For UMGC Policy 041.00 Sexual Misconduct, see umgc.edu/policies/adminpolicies/admin04100.cfm.

For external inquiries regarding the notice of nondiscrimination, including Title IX information, contact the Office for Civil Rights, U.S. Department of Education, Wanamaker Building, Suite 515, 100 Penn Square East, Philadelphia, PA 19107, or call 800-421-3481.

Sexual Misconduct Awareness

UMGC is committed to providing an education and work environment that is free from sexual misconduct. Sexual misconduct is a form of discrimination based on sex or gender that includes dating violence, domestic violence, sexual exploitation, sexual harassment, sexual intimidation, sexual violence, and stalking. UMGC promotes awareness and addresses sexual misconduct issues through educational programs, training, and complaint resolution. All administrators, supervisors, and faculty members are required to promptly and appropriately report allegations of sexual misconduct that are brought to their attention.

If you have any questions regarding sexual misconduct or you need to report a complaint, contact Steven Alfred, Title IX coordinator, by phone at 301-887-7295 (voice and text) or via e-mail at titleixcoordinator@umuc.edu.

Religious Observance

So that academic programs and services of UMGC shall be available to all qualified students who have been admitted to its programs, regardless of their religious beliefs, students shall not be penalized because of observances of their religious holidays. More information on Policy 051.00 Religious Observances may be found at umgc.edu/policies/academicpolicies/aa05100.cfm.

Annual Security Information Report and Consumer Disclosures

In accordance with U.S. Department of Education regulations, University of Maryland Global Campus distributes an Annual Safety and Security Report to all current students, staff, and faculty. It is also available to prospective students, staff, and faculty, upon request. The annual report provides important information about rights and responsibilities on the following topics:

- Campus safety and security policies and services
- Sexual misconduct policy
- Emergency procedures
- Notification of rights under FERPA for postsecondary institutions
- Peer-to-peer file sharing
- Drug prevention program
- Clery Act crime statistics by location for the previous three calendar years

You can read the Annual Safety and Security Report online at umgc.edu/inform. If you have questions or wish to receive a copy of the current annual report, contact the UMGC Director of Security at 301-985-7471.

To help you stay informed, additional consumer disclosures can be found at umgc.edu/disclosures.
State Authorizations

As an online university, UMGC offers online courses and services throughout the United States. UMGC also offers courses and services on-site in certain locations within the United States. For information regarding state authorizations and the states where UMGC provides services and offers classes in a hybrid format, visit umgc.edu/stateauthorizations.

The following states require the catalog disclosures found below:

Virginia

The University System of Maryland and the Maryland Higher Education Commission have approved all programs offered by UMGC, including those programs offered at Virginia sites. Any credit earned for coursework at UMGC in Virginia shall be applied in the same manner as if the credit was earned online or at any other UMGC location. UMGC is certified by the State Council of Higher Education for Virginia.

The university's largest site in Virginia is

UMGC at Quantico
525 Corporate Drive
Stafford, VA 22554

The university maintains locations with administrative capability at

Fort Belvoir
Barden Education Center, Building 1017
9625 Belvoir Road
Room 128
Fort Belvoir, VA 22060

Joint Base Myer-Henderson Hall
Education Center, Building 417
239 Sheridan Avenue
Room 215
Fort Myer, VA 22211

Joint Expeditionary Base Little Creek-Fort Story
1481 D Street
Building 3016
Virginia Beach, VA 23459

Naval Station Norfolk
1680 Gilbert Street
Building IE
Norfolk, VA 23511

Thomas Nelson Community College
525 Butler Farm Road
Hampton 3 Building
Hampton, VA 23666

Washington

University of Maryland Global Campus is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes University of Maryland Global Campus to offer specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430 or by e-mail at degreeauthorization@wsac.wa.gov.

The transferability of credits earned at University of Maryland Global Campus is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of study at University of Maryland Global Campus will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at University of Maryland Global Campus to satisfy an admission requirement of another institution is at the discretion of the receiving institution. Accreditation does not guarantee credentials or credits earned at University of Maryland Global Campus will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned.

CPA Requirements

UMGC's programs in accounting may help prepare you to sit for the Uniform Certified Public Accountant Exam and/or obtain initial licensure as a Certified Public Accountant (CPA) in Maryland. To sit for the CPA Exam in Maryland, a candidate is required to have successfully completed 120 credits toward an accounting degree. Many other states, however, require candidates to successfully complete 150 credits prior to sitting for the CPA Exam.

To obtain initial licensure as a CPA in Maryland and most other states, a candidate is required to have successfully completed
150 credits. UMGC graduate accounting programs help prepare you to become licensed as a CPA in Maryland.

If you intend to request transfer credits from a nonregionally accredited institution or a third-party provider or facility or an institution located outside of the United States, or if you intend to request transfer of ACE-evaluated credit, be aware that doing so may impact your ability to become licensed as a CPA. For information regarding licensure in other states and transfer credit, please visit umgc.edu/professional-licensure.

Retention of Student Records

UMGC maintains records of students’ admission, enrollment, grades, transfer of credits, transcripts, and graduation while the student is enrolled and permanently after graduation.

MyUMGC Terminology

The following is an explanation of terms students may encounter when using MyUMGC.

Academic Advisement Report (Degree Plan): A review of the academic progress that a student has made within his/her UMGC program.

Activation: The automated process of verifying a student's record for enrollment eligibility each term based on certain criteria. This process enables a student to register for courses.

Admission: The process of being admitted to the university, which includes completing an application and paying the fees required for entrance.

Campus: The UMGC division where a student is located. UMGC has three major campuses—UMGC Asia, UMGC Europe, and UMGC Stateside. Within those campuses are additional locations where classes are held or staff and academic advisors may be reached.

Career: Graduate or undergraduate level of study.

Class Number: The unique, five-digit number assigned to each class at UMGC.

Drop: To cancel your enrollment in a class before the end of the drop period posted on the UMGC website for your division.
**APPENDIX**

**eApp:** An abbreviation for electronic application, which is an application to the university that is filled out and submitted online.

**EmplID (or Student ID):** A system-generated identification number for student use. Students should record their EmplID in a safe, secure place, as it will be needed to access various services. GoArmyEd students should note that their UMGC EmplID will be different from their GoArmyEd EmplID.

**Enrollment Activity:** The process of adding or dropping a class.

**Lower-Level (LL) Courses:** Courses that are numbered 100–299.

**Mid-Session (or “Intensive Session”):** A shorter class period held between the standard eight-week sessions.

**Official Evaluation (or Academic Advisement Report):** A review of the academic progress that a student has made within his/her UMGC program.

**Portal:** A website that integrates online applications, such as e-mail, databases, references to other websites, and proprietary applications, under one unique URL, often allowing secure access with one unique login and password.

**Real-Time:** This means that transactions are implemented at the moment a user makes them, regardless of time zone. There is no time delay; all information is current up to the moment users access it.

**Semester:** Also known as a term (usually a five-month period divided into two sessions).

**Session:** Usually an eight-week period within a term (weeks may vary), during which classes are offered.

**Subject and Catalog Number:** The four-letter abbreviation and three-digit number for UMGC classes. For example, in COMM 300, “COMM” stands for communications and “300” is the catalog number.

**Term:** A full semester, which may be subdivided into sessions. Student finance and financial aid offices use this time period for instructional accounting.

**Third-Party Payment:** A payment made by a third party, such as tuition assistance (TA), Army Emergency Relief (AER), and scholarships. (Note: Loans and federal grants are not third-party payments.)

**Units:** Credit value the university assigns to a course.

**Upper-Level (UL) Courses:** Courses that are numbered 300–499.

**UserID:** A student’s user name for logging into MyUMGC. Students will need both their UserID and password to log in.

**Withdraw:** To cancel your enrollment in a class after the end of the drop period posted on the UMGC website for your division.

ACCREDITATION

University of Maryland Global Campus is accredited by the Middle States Commission on Higher Education, 3624 Market Street, Philadelphia, PA 19104 (267-284-5000), an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation. UMGC is a constituent institution of the University System of Maryland and is governed by the USM Board of Regents. UMGC is certified to operate by the State Council of Higher Education for Virginia. UMGC at Quantico, Corporate Center, 525 Corporate Drive #101, Stafford, VA 22554.
ABOUT UMGC

University of Maryland Global Campus was founded more than 70 years ago specifically to serve the higher education needs of working adults and servicemembers. Today, UMGC continues its global tradition with online and hybrid courses, more than 140 classroom and service locations worldwide, and more than 90 degrees, certificates, and specializations backed by the reputation of a state university and the University System of Maryland. For more information, visit umgc.edu.

Visit UMGC on the web at umgc.edu.

To speak with an advisor, call 800-888-8682 or send an e-mail to grad.advisor@umuc.edu.
